

ROLLING STOCK SOLUTIONS

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

KEEPING THE WHEELS TURNING

YOUR ONE-STOP SOLUTION FOR ROLLING STOCK MANUFACTURING AND MAINTENANCE.

Save time and money with Enerpac rail tools and solutions, delivering ultra-reliable quality, safety, and precision. Trusted by rail owners, operators, and contractors worldwide, our proven equipment streamlines your operations, helping you to manufacture and maintain rail fleets efficiently.

From the simplest pulling task to extensive truck maintenance or lifting a full train assembly, you can count on Enerpac equipment to keep your operations on schedule. Expertly engineered for reliability, our products will enhance productivity and efficiency across all your rail car facilities, ensuring you perform your work more safely, while maximizing cost and time savings.

POW'R-RISER

Enerpac POW'R-Risers are wheeled jacks that offer safe lifting and lowering of heavy loads. Their portability and rugged, fully enclosed frame without any exposed fittings makes them ideal for rolling stock maintenance applications. Choose from a wide range of tonnage capacities and models driven either by compressed air or an electric power source.

RWL25 25-TON RAILCAR WHEEL LIFT KIT

This ready-to-use kit provides everything needed to lift railcar trucks to allow the bearing adapter and/or shear pad to be replaced. Kit includes a 25-ton hydraulic cylinder, cordless pump and accessories.

RCL10 10-TON RAILCAR COUPLER LIFT KIT

This ready-to-use kit provides everything needed to raise a railcar coupler to enable the efficient replacement of wearplates. Kit includes a 10-ton hydraulic cylinder, cordless pump, and a selection of accessories.

THE RIGHT TOOLS TO ASSEMBLE, LIFT, MOVE, SECURE, DISASSEMBLE AND MAINTAIN THE WORLD'S LARGEST RAIL FLEETS

PULLERS

Commonly known as bearing pullers and wheel pullers, Enerpac hydraulic and mechanical pullers provide an efficient and safe solution for removing shaft mounted items such as bearings, gears, sleeves, wheels, and sprockets. They eliminate time-consuming and unsafe hammering, heating, or prying. Damage to parts is minimized through the use of controlled hydraulic power. Our 100-ton hydraulic pullers are ideal for removing wheels and use a synchronous action that allow easy positioning and alignment.

HYDRAULIC PRESSES

Enerpac Hydraulic Presses are available in a wide variety of standard capacities and configurations. The press frames offer maximum strength and durability, and when combined with the power of high-pressure hydraulics they provide years of safe and dependable service. Capacities up to 200-tons are available, and press types include Arbor, Bench, H-Frame, C-Clamp, Roll-Frame, and workshop presses.

MAINTENANCE SETS

For rail maintenance teams, it can be advantageous to buy a complete set of tools in preparation for everyday and unexpected jobs. These hydraulic tool sets are available in options to suit a variety of general force applications, and typically include a selection of hydraulic cylinders, a hand pump, spreader, hydraulic oil, and hoses. Component boxes are also available with the ancillaries needed to address common field issues.

HYDRAULIC CYLINDERS AND JACKS

If your application requires lifting, pushing, pulling, bending, or holding there's an Enerpac hydraulic cylinder perfectly matched to your application. The extensive range of single and double-acting cylinders includes models for general purpose use, high-tonnage, hollow, lightweight, pulling, locknut, production, telescopic, and climbing jacks.

CUTTERS AND NUT SPLITTERS

When you need to cut through heavy duty bar, chain, cable, or nuts, our extensive line-up of hydraulic, electric, and manual cutters offer quick, safe and cost-effective solutions. When removing seized nuts, using hydraulic force takes less time than other methods and avoids costly damage to joint components.

HYDRAULIC PUMPS

Enerpac hydraulic pumps are available in hundreds of different configurations. Whether your work demands speed, control, intermittent use, or heavy-duty performance, there's a hydraulic power unit to suit your application. Featuring hand, battery, electric, air and gasoline powered models, and with multiple reservoir and valve configurations, Enerpac offers the most comprehensive line of high-pressure pumps available.

HEAVY LIFTING TECHNOLOGY

HYDRAULIC GANTRIES

Energac Hydraulic Portable Gantries feature self-contained hydraulics and electronics and the Intelli-Lift wireless control system. Choose from a wide selection from the highly portable 40 tons Mini-Lift Gantry to the largest 1178 tons model.

ULTRA-RELIABLE QUALITY, SAFETY, AND PRECISION

As the world leader in industrial tools and services, Energac offers elite professionals on-demand access to the safest, most technically advanced solutions on the planet, so they can confidently tackle the toughest jobs in the most demanding situations anywhere in the world. Backed by our global legacy of ultra-reliable quality and superior precision, Energac industrial tools ensure our customers operate safely and productively, every day, every year, year after year.

HYDRAULIC TURNTABLES

Hydraulic turntables provide safe and controlled rotation of heavy loads and simplify the handling, adjustment, and orientation of loads up to 450 US-tons.

EMLS BATTERY POWERED LOAD SKATES

EMLS/EMV Series Battery-Powered Machine Skates eliminate the need to manually push or pull the load, allowing the operator to work at a safe distance away from the load.

MULTI-POINT LIFTING

Achieving high-precision movement of heavy objects relies on the control and synchronization of multiple lifting points. By eliminating manual intervention multi-point lifting systems help to maintain structural integrity and increase the productivity and safety of a lift.

SELF-LOCKING CUBE JACK

The SCJ50 Self-Locking Cube Jack is a safer, more efficient alternative to jack-and-pack methods that rely on wooden cribbing. They provide an effective solution for lifting loads from below up to 6.7 feet, especially where space is restricted.

CUSTOM HEAVY LIFTING SOLUTIONS

When the demand for a new and unique solution arises, we stand ready to collaborate with you in crafting custom-designed equipment that perfectly suits your needs.
