Introduction

The Right Tool 2-3

Cylinders & Lifting Products 4 - 73

Introduction & Overview 4 - 5

RC-Series, Single-Acting, General Purpose Cylinders 6 - 9

A, CAT, JBI, RB, RE-Series,
Cylinder Accessories for RC-cylinders 10

RA-Series, Aluminium Cylinders, Introduction 11

RAC-Series, Single-Acting, Aluminium Cylinders 12 - 13

RACL-Series, Single-Acting,
Aluminium Lock Nut Cylinders 14 - 15

RACH-Series, Single-Acting,
Aluminium Hollow Plunger Cylinders 16 - 17

RARRH-Series, Double-Acting,
Aluminium Hollow Plunger Cylinders 18 - 19

RAR-Series, Double-Acting,
Aluminium Cylinders 20 - 21

CULP-Series, Ultra-Flat Cylinders with Stop Ring 22

CUSP-Series, Ultra-Flat Cylinders, High Tonnage 23

LPL-Series, Single-Acting,
Low-Height Lock Nut Cylinders 24 - 25

RSM, RCS-Series,
Single-Acting, Low-Height Cylinders 26 - 27

RLT-Series, Low-Height Telescopic Cylinders 28 - 29

RT-Series, Telescopic Cylinders 30 - 31

BRC, BRP-Series, Single-Acting, Pull Cylinders 32 - 33

RCH-Series, Single-Acting,
Hollow Plunger Cylinders 34 - 35

RRH-Series, Double-Acting,
Hollow Plunger Cylinders 36 - 37

BRD-Series, Double-Acting,
Precision Production Cylinders 38 - 39

RR-Series, Double-Acting,
Long Stroke Cylinders 40 - 43

High Tonnage Cylinders,
HCG, HCR, HCL, HCRL-Series, Introduction 44 - 45

Quick Selection 46 - 47

HCG-Series, Single-Acting, High Tonnage Cylinders 48 - 51

HCR-Series, Double-Acting,
High Tonnage Cylinders 52 - 55

HCL-Series, Single-Acting,
High Tonnage Lock Nut Cylinders 56 - 59

HCRL-Series, Double-Acting,
High Tonnage Lock Nut Cylinders 60 - 61

SC-Series, Cylinder-Pump Sets 62 - 63

P, RC, V-Series, Extreme Environment Products 64

SC, SL, SR, SW-Series, Power Box
Portable Tool Sets 65

JH, JHA-Series, Aluminium and Steel Jacks 66

GBJ-Series, Steel Bottle Jacks 67

PR-Series, POW'R-RISER® Mobile Lifting Jacks 68 - 69

PL-Series, POW'R-LOCK® Mobile Lifting Systems 70 - 71

Custom Hydraulic Cylinders 72

Overview Heavy Lifting Capabilities 73

Pumps & Directional Control Valves 74 - 125

Introduction & Overview 74 - 75

P-Series, Lightweight Hand Pumps 76 - 77

P-Series, Steel Hand Pumps 78 - 79

P-Series, Low Pressure Hand Pumps 80 - 81

MP-Series, Multifluid Hand Pumps 82

P-Series, Foot Pump 83

P, 11-Series, Ultra-High Pressure Hand Pumps 84 - 85

XC-Series, Cordless Hydraulic Pumps, portable 86 - 87

ZC-Series, Cordless Hydraulic Pumps 88 - 89

PU-Series, Economy Electric Pumps 90 - 91

ZE2-Series, Electric Pumps 92 - 93

E-Series, E-Pulse® Electric Pumps 94 - 95

Z-Class Power Pumps Introduction 96 - 97

ZU4-Series, Portable Electric Pumps 98 - 103

ZE-Series, Electric Pumps 104 - 109

PA-Series, Air Hydraulic Foot Pumps 110

PAM-Series, Air Hydraulic Pumps 111

PATG-Series, Turbo II, Air Hydraulic Pumps 112 - 113

XA-Series, Air Driven Foot Pumps 114 - 115

ZA4-Series, Modular Air Hydraulic Pumps 116 - 117

ZG-Series, Gasoline Hydraulic Pumps 118 - 119

Custom Hydraulic Pumps 120

Directional Control Valves 121 - 125

Introduction & Overview 121

VM, VE-Series, Pump Mounted Valves 122 - 123

VC-Series, Remote Mounted Valves 124 - 125

VC, VM, VE-Series, Valve Dimensions 125

System Components & Control Valves 126 - 145

Introduction & Overview 126 - 127

H700-Series, High Pressure Hoses 128 - 129

A, C, F, T-Series, Hydraulic Couplers 130 - 131

HF-Series, Hydraulic Oil 132

A, AM-Series, Manifolds 132

FZ, BFZ, XSC-Series, Fittings 133

SFM-Series, Split-Flow Manifolds 134 - 135

GF, GP-Series, Force & Pressure Gauges 136 - 137

G, H-Series, Pressure Gauges 138 - 139

T-Series, Test System Gauges 140

DGR-Series, Digital Pressure Gauge 141

GA45GC-Series, Gauge Adaptor Assembly 142

AMGC-Series, 4-Way Manifold Assemblies 142

GA, NV, V-Series, Gauge Accessories 143

V-Series, Pressure and Flow Control Valves 144 - 145

Hydraulic Presses 146 - 155

Introduction & Overview 146

Custom Hydraulic Presses 147

XLP, VLP-Series, Bench & Workshop Presses 148 - 149

BPR-Series, Roll-Frame Presses 150 - 151

A-Series, C-Clamp and Arbor Presses 152 - 153

A, BSS, IPL, VB, VHJ-Series, Press Accessories 154

XLP, Safety Cages & Safety Screen 154

TM-Series, Tension Meter 155

LH-Series, Load Cells 155

Pullers 156 - 171

Introduction & Overview 156 - 157

BHP-Series, Master Puller Sets 158

BHP-Series, Grip Puller Sets 159

BHP-Series, Cross Bearing Puller Sets 160

BHP-Series, Bearing Cup and Bearing Pullers 161

LGM-Series, Mechanical Lock-Grip Pullers 162 - 163

LGH-Series, Hydraulic Lock-Grip Pullers 164 - 165

BHP-Series,
Hydraulic Master Lock-Grip Pullers 166

LGHMS-Series,
Hydraulic Master Lock-Grip Pullers 167

IPM-Series, Internal Puller 168

SGH, GPS-Series,
100 ton Hydraulic Sync Grip Pullers & Sets 169

EPH-Series, Posi Lock®
100 ton Hydraulic Grip Pullers 170 - 171

Specialty Tools 172 - 191

Introduction & Overview 172 - 173

MS-Series, Maintenance Sets 174 - 177

SP-Series, Lightweight 35 ton Hydraulic Punch 178 - 179

SP-Series, 50 ton Double-Acting Punch 180 - 181

LW-Series, Hydraulic Vertical Lifting Wedge 182

SOH-Series, Hydraulic Machine Lifts 183

ER-Series, Heavy Duty Load Skates 184 - 185

CM-Series, Industrial Storage Cases 186

A, WR-Series, Wedgie & Spread Cylinders 187

STB-Series, Pipe Bender Sets 188 - 189

RP-Series, Hydraulic Rail Stressor 190 - 191

Cutters 192 - 209

Introduction & Overview 192 - 193

EB-Series, Bar Cutters 194

EBH-Series, Hydraulic Bar Cutters 195

EBC-Series, Electric Bar Cutters 196

EBC-Series, Cordless Bar Cutters 197

EDCH-Series, Decommissioning Cutters 198

EFBE-Series, Electric Flat Bar Cutters 199

ECCE-Series, Electric Chain Cutters 200 - 201

EWCH-Series, Hydraulic Wire and Cable Cutters 202 - 203

EWCE-Series Electric Wire and Cable Cutters 204

ECSE-Series, Cutter/Spreader Combination Tools 205

WHC, WHR-Series, Hydraulic Cutterheads 206

WMC-Series, Self-Contained Hydraulic Cutters 207

ZC, ZE, CH-Series Pumps & Hoses for Cutters 208-209

Bolting Tools and Pumps 210 - 317

Introduction & Overview 210 - 211

S-Series, Square Drive Torque Wrenches 212 - 215

BSH-Series, Heavy-Duty Impact Sockets 216

BUS-Series, Back-Up Spanners 217

STTL-Series, Safe T™ Torque Lock 218 - 219

W-Series, Hexagon Hydraulic Torque Wrenches 220 - 229

W-SL-Series, Ultra-Slim Bi-Hexagonal Cassettes 230 - 231

TSP, WTE, WRP-Series, Accessories for W-Series 232

Custom Torque Wrenches & Bolt Tensioners 233

RSL-Series, Hydraulic Torque Wrenches 234 - 245

RLP-Series, Hexagon Cassettes for RSL-Series 236 - 240

ERA, ERT, TWM-Series, Accessories for RSL-Series 241

RLP-SL-Series, Slimline Hexagon Cassettes 242 - 243

RSQ-Series, Square Drive Cassettes 244 - 245

DSX-Series, Square Drive Torque Wrenches 246 - 248

THQ-Series, Twin Hoses 249

HMT-Series, Modular Torque Wrenches 250 - 255

HLP-Series, Hexagon Cassettes for HMT 252 - 253

HSQ Square Drive Torque Wrenches 254 - 255

E-Series, Manual Torque Multipliers 256 - 257

PTW-Series, Pneumatic Torque Wrenches 258 - 261

STTC-Series, Safe T™ Torque Checker 262 - 263

MCS-Series, Mobile Calibration System 264

Optimum Wrench-Pump-Hose Combinations 265

XC-Series, Cordless Torque Pumps 266 - 267

E-Series, E-Pulse® Electric Torque Pumps 268 - 269

TQ-Series, Electric Torque Pumps 270 - 271

ZU4T-Series, Electric Torque Pumps 272 - 275

ZET-Series, Electric Torque Pumps 276 - 277

LAT-Series, Air Hydraulic Torque Pump 278 - 279

ZA4T-Series, Air Driven Torque Pumps 280 - 285

Tensioners & Pumps (1500 bar) 286 - 305

HM-Series, Hydramax Topside Bolt Tensioners 286 - 289

GT-Series, Topside Bolt Tensioners 290 - 291

EAJ-Series, Aquajack Subsea Tensioners 292 - 293

PGT-Series, Power Generation Bolt Tensioners 294 - 295

FTR-Series, Foundation Bolt Tensioners 296 - 297

FTE-Series, Foundation Bolt Tensioners 298 - 299

HPT-Series, Tensioning Hand Pump 300

HT, B-Series, Hoses, Couplers, Hose Reels,
T-Pieces, Y-Pipe Assemblies 301

ZUTP-Series, Electric Tensioning Pump 302

ATP-Series, Ultra-High Pressure Air Pump 303

Multi Stud Tensioning (MST) 304

Hydraulic Nuts 305

Joint Assembly & Separation 306 - 317

ATM-Series, Flange Alignment Tools 306 - 307

FSC, FSH, FSM-Series, Wedge Spreaders 308 - 309

NC-Series, Hydraulic Nut Splitters 310 - 311

NSC, NSH-Series, Hydraulic Nut Splitters 312 - 313

NSH-Series, Hydraulic Nut Splitters 314 - 315

FF-Series, Mechanical Pipe Flange Face Tool 316 - 317

Flange Maintenance Tools 318 - 333

Introduction & Overview 318 - 319

SWI-Series, Flange Spreading Tools 320 - 323

SG-Series, Flange Spreading Tools 324 - 327

VC-Series, Valve Change-Out Tools 328 - 329

MG-Series, Flange Spreading Tool 330

FC-Series, Flange Pulling & Closing Tools 331

TFA-Series, Wind Tower Flange Alignment Tools 332

HP-Series, Hydraulic Sealed Hand Pumps 333

**CUSTOMER-DRIVEN
INNOVATION**

**INDUSTRY LEADING
TECHNOLOGY**

**CONTINUOUS
IMPROVEMENT**

ENDLESS INNOVATION RESULTS IN THE RIGHT TOOL

We believe it takes advanced technical expertise and ingenuity to develop the industry's most trusted solutions. Our relentless pursuit to deliver the highest standard of excellence means never compromising on quality. Yet, it all starts with a thorough understanding of our customer needs, the environments they work in and the ideas of tomorrow that help get jobs done faster, easier and safer.

SOLVING CUSTOMER PROBLEMS

One of our core values is to continually innovate and solve customer problems. That all begins with the discovery process. Through the efforts of a dedicated innovation team and several centers of excellence, new ideas are uncovered by listening to our customer's pain points and observing how they perform tasks in their own environments. These inputs lead to the forming of ideas and eventually prototypes that can be tested, refined and transformed into finished products.

FIND OUR NEWEST PRODUCTS AT...

enerpac.com/innovation

Continuous improvement means new products are introduced and made available to customers on a regular basis throughout the year. Find the newest Enerpac products at Enerpac.com/innovation.

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

Backed by a global legacy of ultra-reliable quality and superior precision, Enerpac is pushing the industry forward with a wide range of advanced industrial tools and services that first and foremost ensure our customers operate safely and productively every day. It isn't about being compliant. Or "as good" as the next guy; we outpace the competition by delivering technically superior solutions that are easy to get, safe to use and built to outlast.

NEVER COMPROMISE

Enerpac combines technical excellence with proven performance – every day, every year, year after year. We believe customers shouldn't have to compromise – they can rest easy knowing that even in the most complex situations, their reputations and productivity are protected by the most trusted industrial tools available.

SAFETY AND PRODUCTIVITY

Our customers put their physical well-being and reputations on the line each day they go to work; we take the fact that they put their trust in us very seriously. Enerpac team members are obsessively committed to developing solutions that keep the world's workers safe and productive in highly demanding working conditions.

ON-DEMAND ACCESS

For us, offering the ideal customer experience means working overtime to make sure our customers can be heroes when it matters most by providing on-demand access to a vast catalog of products and services, extensive training and mobilized field teams no matter where they are in the world.

As a global market leader in high-pressure hydraulic tools, controlled force products and solutions for precision positioning of heavy loads, Enerpac products have maintained and moved some of the largest structures on earth. They are the industry standard in aerospace, infrastructure, manufacturing, mining, oil & gas, power generation and much more.

110
YEARS OF HISTORY

~2600

100+
COUNTRIES

2500+
DISTRIBUTORS

3500+
POINTS OF SALE

Enerpac hydraulic cylinders are available in hundreds of different configurations. Whatever the industrial application... lifting, pushing, pulling, bending, holding... whatever the force capacity, stroke length, or size restrictions... single- or double-acting, solid or hollow plunger, you can be sure that Enerpac has the cylinder to suit your high force application. Enerpac jacking cylinders fully comply to ASME B30.1 (except BRD-Series).

With the 3rd Generation comes a trio of key features

The next evolution of the legendary Enerpac RC-Series hydraulic cylinder. The driving force of the Enerpac cylinder range, the new **RC-TRIO** is as **versatile** as ever. Featuring a new Trio Bearing System for **enhanced durability** and a hybrid spring-return system for **faster retraction** and even **greater productivity**.

System for **enhanced durability** and a hybrid spring-return system for **faster retraction** and even **greater productivity**.

NEW RC-TRIO SERIES CYLINDERS

New TRIO Bearing System

- Includes up to 4 high-performance wear bands that offer increased resistance to damage, reducing bearing load and increasing cylinder lifespan.
- Hardened composite material wear bands increase bearing surface area for greater sideload resistance - Significantly improving cylinder life.
- New high-performance Polyethylene seals last longer than ever, improving lifespan and keep you working for longer.

New TRIO Stop Ring

- Part of the Trio Bearing System, the Trio Stop Ring includes an additional wear band or high-strength bronze to absorb greater side load
- Capable of taking full cylinder extension force
- Features durable wiper to help prevent contamination from entering the cylinder during retract cycles.

New TRIO Spring System

- Hybrid pre-tensioned return springs for up to 3x faster retraction and increased productivity.
- High-strength steel wire improves spring life
- Spring retention design improves serviceability while allowing higher pre-load during assembly
- Spring is easily removed without special tools.

Durable Piston Rod

- High-strength steel plunger for improved life and sideload resistance
- Nickel-plated plunger coating improves corrosion protection
- Internal plunger threads for easy tool fixturing.

Enhanced Ergonomics

- Standard carry handles on cylinders from 15 up to 25 kg. Sizes above include certified lifting eyes or optional handles.
- Collar threads, plunger threads and base mounting holes enable easy fixturing (on most models).

Improved Saddle Retention

- Hardened plunger saddle protects plunger end during all lifting operations
- Easily removable for access to plunger mounting threads
- Tilt and smooth saddles available as accessories (compatible with new range of CATS-Series Tilt Saddles).

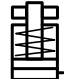

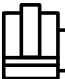

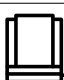

Enduring Compatibility

- For full compatibility and peace of mind, the new RC-Series model numbers, external dimensions and threads remain unchanged from prior RC-Series cylinders. Ensuring compatibility with historical versions and systems.

Note: The cut-away drawing is representative of typical cylinder construction, and may not represent all cylinders in this section.

Hydraulic Cylinders and Lifting Products Section Overview

Capacity ¹⁾ ton (kN)	Stroke Range (mm)	Cylinder Type and Functions	Series	Page

▼ From left to right: RC2510, RC53, RC1002, RC108, RC5010, RC156

- Trio Bearing system with hardened composite wear bands for optimal side load resistance
- Strengthened Trio Stop Ring improves durability and side load resistance
- Trio Hybrid pre-tensioned spring system provides faster retraction
- High-grade polyethylene seals for low wear and long service life
- Plunger wiper reduces contamination, extending cylinder life.
- Collar and plunger threads and base mounting holes enable easy fixturing (on most models)
- Standard certified lifting eyes on cylinder models above 25 kg weight. Interchangeable with optional CHM6 carrying handle
- Designed for use in all positions
- Baked enamel finish for increased corrosion resistance
- Includes CR400 coupler, dust cap and collar thread protector
- RC-Series model numbers, external dimensions and threads remain unchanged from prior RC-Series cylinders

▼ *Foundation repair: to re-stabilize the foundation, the 308 ton silo needed to be lifted, levelled and structurally supported. 25 ton RC-Series hydraulic jacks were attached to a bracket on the top of each steel pier. Powered by a Z-Class pump, the hydraulic jacks applied 20 ton of force at each placement to lift the silo 5,1 cm.*

The Industry Standard General Purpose Cylinder

Saddles

All RC cylinders (except RC50 and RC101) have a hardened removable grooved saddle. For tilt and flat saddles, see the RC-Series accessory page. All CATS-Series Tilt Saddles use a nitrocarburization surface treatment for improved corrosion protection.

Page: 10

Base Plates

To ensure the stability of cylinders for lifting applications, base plates are available for 10, 25 and 50 ton RC cylinders.

Page: 10

Specialty Attachments

For solving all kinds of application problems, specialty attachments are available for 5, 10 and 25 ton RC cylinders.

Page: 176

▼ *Synchronous lifting set-up for 200 ton petrochemical process module using twelve RC2510 cylinders. To ensure the stability of the cylinders JBI25 base plates are installed.*

Single-Acting, General Purpose Cylinders

Optional Carrying Handle CHM6

Standard certified lifting eyes on cylinder models above 25 kg weight (RC5010 and heavier models). Interchangeable with optional carrying handle. Order model number **CHM6**.

▼ **QUICK SELECTION CHART** For complete technical information see next page.

Cylinder Capacity	Stroke	Model Number	Cylinder Effective Area	Oil Capacity	Collapsed Height	
ton (kN)	(mm)		(cm ²)	(cm ³)	(mm)	(kg)

* Available as set, see note on this page.

RC-Trio Series

Capacity:
5 - 95 ton

Stroke:
16 - 362 mm

Maximum Operating Pressure:
700 bar

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits. Good practice encourages using only 80% of these ratings.

Page: **396**

Lightweight Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the **RAC-Series** are the perfect choice.

Page: **13**

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components

Section for a full range of gauges.

Page: **127**

Cylinder-Pump Sets

All cylinders marked with an * are available as **sets** (cylinder, gauge, couplers, hose and pump) for your ordering convenience.

Page: **62**

Speed Chart and Pump Selection Tool

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed. See Pump Selection Tool on website for help to choose the most suitable pump for your application.

Page: **405**

¹⁾ Available as set, see note on page 7.

²⁾ RC50 cylinder has a non removable grooved saddle and no collar thread.

³⁾ RC50: D1 = 41 mm, L = 20 mm, M = 25 mm.

⁴⁾ RC101 has plunger with two thread holes and non-removable saddle.

Single-Acting, General Purpose Cylinders

Couplers Included!

CR-400 couplers included on all models. Fits all HC-Series hoses.

Capacity:

5 - 95 ton

Stroke:

16 - 362 mm

Maximum Operating Pressure:

700 bar

The Enerpac Lightweight Aluminium Cylinders

▼ From left to right: RAC, RACL, RACH, RAR

- **Lightweight, easy to carry and position to allow a higher cylinder capacity-to-weight-ratio**
- **Non-corrosive by design, aluminium has always been a good material for use in many caustic environments**
- **Composite Bearings on all moving surfaces guarantee no metal-to-metal contact, to resist side loads and increase cylinder life.**

RA Series

Capacity:
10 - 150 ton

Stroke:
50 - 250 mm

Maximum Operating Pressure:
700 bar

Think Safety

Manufacturer's rating of load and stroke are maximum safe limits.

Good practice encourages using only 80% of these ratings.

Page: 396

Aluminium versus Steel

Aluminium cylinders, while offering the most lightweight solution, also have some unique limitations due to material properties. It differs from steel in that it has a lower finite fatigue life. Aluminium cylinders should NOT be used in high-cycle applications such as production.

The Enerpac line of aluminium cylinders are designed to provide 5000 cycles at their recommended pressure. **This limit should not be exceeded.** In normal lifting and many maintenance applications, this should provide a lifetime of use.

Steel Base Plate

The steel base plate protects the cylinder from damage, it should not be removed.

The base holes in these aluminium cylinders are designed for securing the steel base plate. They will not withstand the capacity of the cylinder.

Do not use the base holes in these aluminium cylinders to attach any device to the cylinder.

▼ Shown from left to right: RAC5010, RAC15010, RAC304, RAC208

Lightweight for Maximum Portability

Saddles

All RAC-cylinders are equipped with bolt-on removable hardened steel saddles. For Tilt Saddles see next page.

Page: 13

Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P392 or P802 make the optimal lightweight set.

Page: 76

- Composite bearings prevent metal-to-metal contact, increasing cylinder life and resistance to side-loads of up to 10%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Handles included on all 30 - 150 ton models
- For protection against load-induced damage a saddle is standard on all models
- Steel base plate is standard on RAC 20 ton models and above. The steel base plate is optional only on RAC10 and 15 ton models
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 standard.

- Aluminium Lock Nut provides mechanical load holding for extended periods
- Hardened steel stop ring increasing cylinder life and resistance to side-loads of up to 5%
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Composite bearings increase cylinder life and side load resistance
- Handles included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 standards.

◀ The portable lock nut cylinder RACL1506 used for extended load supports during epoxy injection for bridge reinforcement.

Saddles

All RACL-cylinders are equipped with bolt-on removable hardened steel saddles. For Tilt Saddles see next page.

The Lightweight Solution for Tensioning and Testing

Saddles

All RACH-cylinders are equipped with bolt-on hollow removable saddles of hardened steel.

Lightweight Hand Pumps

The Enerpac composite lightweight hand pumps P392 or P802 make the optimal lightweight set.

Page: 76

- Hollow plunger design allows for both pull and push forces
- Composite bearings increase cylinder life and sideload resistance
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Floating center tube increases seal and product life
- Handles standard on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- High strength return spring for rapid cylinder retraction
- CR400 coupler and dustcap included on all models
- All cylinders meet ASME B-30.1 standards.

▼ Shown from left to right: RARH6010 and RARH306

- Lighter and shorter collapsed height than equivalent RACH models
- Double-acting for rapid retraction, regardless of hose lengths or system losses
- Built-in safety valve prevents accidental over-pressurization
- Hollow plunger design allows for both pull and push forces
- Hard coat finish on all surfaces resists damage and extends cylinder life
- Handles and CR400 couplers with dust caps included on all models
- Floating center tube increases seal life
- Steel baseplate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- All cylinders meet ASME B-30.1 standards.

The Lightweight Solution for Double-Acting Applications

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: 128

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components section for a full range of gauges.

Page: 127

4-Way Control Valve

The P84 and P464 hand pumps feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system set-up information:

* Intermediate strokes and other tonnages available upon request.

Aluminium Double-Acting Hollow Plunger Cylinders

Steel Base Plate

The steel base plate protects the cylinder base from damage, it should not be removed. The base holes in these aluminum cylinders are designed for securing the steel base plate.

They will not withstand the capacity of the cylinder. Do not use the base holes in these aluminum cylinders to attach any device to the cylinder.

Optional Threaded Hollow Saddles

Saddle Type	Cylinder Model Number	Saddle Model Number	Saddle Dimensions (mm)		
			A	B	C
Threaded Hollow	RARH302, 306, 3010	HP3015	63	1 1/4" - 7 UN	9
	RARH602, 606, 6010	HP5016	91	1 3/8" - 5 1/2 UN	12
	RARH1002, 1006, 10010	HP10016	126	2 1/2" - 8 UN	13

Smooth hollow saddles are standard on all RARH-models.

Steel Base Plate Mounting Holes (mm)

Cylinder Model / Capacity (ton)	Bolt Circle U	Thread V	Thread Depth ¹⁾ Z
RARH30	110	M6	12
RARH60	160	M6	12
RARH100	200	M10	12
RARH150	250	M10	12

¹⁾ Including Base Plate Height of 6 mm and four (4) base plate bolts.

RARH Series

Capacity:

30 - 150 ton

Stroke:

50 - 250 mm

Center Hole Diameter:

34 - 79 mm

Maximum Operating Pressure:

700 bar

RACH-Series, Single-Acting, Spring Return

To be used when a single-acting pump is available and retraction time is not critical.

Page: 16

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 398

Saddles

All RAR-cylinders are equipped with bolt-on removable hardened steel saddles. For Tilt Saddles see next page.

Page: **21**

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Page: **128**

- Double-acting for rapid retraction, regardless of hose lengths or system losses
- Composite bearings increase cylinder life and sideload resistance
- Hard-Coat finish on all surfaces resists damage and extends cylinder life
- Handles and CR400 couplers included on all models
- Steel base plate and saddle for protection against load-induced damage
- Integral stop ring prevents plunger over-travel and is capable of withstanding the full cylinder capacity
- Built-in safety valve prevents accidental over-pressurization.

▼ An RAR506 was easy to position under a bulldozer for repair of frame member.

▼ CULP50 Ultra-Flat Cylinder, with Stop Ring

- Up to 4% side load of maximum capacity
- Stop ring for maximum stroke limitation
- Extremely low collapsed height
- Nitrocarburized surface treatment for harsh conditions.

▼ The Ultra-Flat cylinders are designed for applications where high lifting forces are required in confined spaces starting at 2,8 cm.

CULP Series

Capacity:

10 - 100 ton

Stroke:

6 mm

Maximum Operating Pressure:

700 bar

IMPORTANT!

All Ultra-Flat Cylinders require a solid lifting surface for correct support. The use of these flat cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

INCORRECT!

Rough soil

CORRECT!

Flat lifting surface

For more safety instructions see our 'Yellow Pages'.

²⁾ Coupler CR400 including dustcap: use HC-Series hose including CH604 coupler to connect to your pump.

High Tonnage, Ultra-Flat Cylinders

▼ CUSP-Series, Ultra-Flat High Tonnage Cylinders, integrated tilting function.

- Up to 4% side load of maximum capacity
- Extremely low collapsed height
- Integrated tilting function up to 4 degrees to evenly distribute the load
- Nitrocarburized surface treatment for harsh conditions
- “Red Line” for visual maximum stroke indication.

CUSP Series

Capacity:

10 - 1000 ton

Stroke Straight / Tilted Stroke:

7 - 17 mm / 6 - 10 mm

Integrated:

Tilting Function

Maximum Operating Pressure:

700 bar

IMPORTANT!

CUSP-Cylinders DO NOT have a Stop Ring for stroke limitation!

IMPORTANT!

All Ultra-Flat Cylinders require a solid lifting surface for correct support. The use of these flat cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

See instructions on page 22 or more safety instructions in our Yellow Pages.

▼ LPL-Series, Low-Height Lock Nut Cylinders

- Lock nut provides mechanical load holding for a safe work environment
- Integrated tilt saddle allows for up to 5 degrees of misalignment
- Extreme low height for use in confined areas
- Side-load resistance 5-10% of maximum capacity
- Overflow port as stroke limiter to prevent plunger blow-out
- Single-acting, gravity-return.

▼ Only the extreme low-height LPL-cylinder fits in this confined area to lift the construction. The lock nut provides positive and safe mechanical load holding over a long period of time.

Integrated Tilt Saddles

All LPL-Series cylinders include integral tilt saddles with maximum tilt angles up to 5°.

The Summit Edition

Innovation is at the heart of the new Summit Edition of cylinders, delivering the high quality construction that you expect from Enerpac. The durability ensures your job gets done safely and reliably.

- Replaceable plunger support bearing adds support for eccentric loads *
- Nitrocarburization surface treatment for improved load and wear resistance and corrosion protection
- Low wear, high pressure seals provide longer service life.

* Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side load. Increased bearing surface maintains stability and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

Cylinder Capacity	Stroke	Model Number	Maximum Cylinder Capacity at 700 bar ton (kN)	Side-load Resistance of Maximum Capacity	Cylinder Effective Area
ton	(mm)				(cm ²)
60	50	LPL602	62 (606)	10%	86,6

500	45	LPL5002	522 (5114)	5%	730,6

Single-Acting, Low-Height Lock Nut Cylinders

IMPORTANT!

All LPL-Series cylinders require a solid lifting surface for correct support. The use of these cylinders on surfaces such as sand, mud or dirt, may result in cylinder damage.

For more safety instructions see our 'Learning Center' on www.enerpac.com

LPL Series

Capacity:

60 - 500 ton

Stroke:

45 - 50 mm

Maximum Operating Pressure:

700 bar

Longer Stroke Lock Nut Cylinders

For longer stroke applications **HCL and HCRL-Series** lock nut cylinders are the perfect choice.

Page: 46

SFP-Series, Split-Flow Pumps

SFP-Series Pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points

these pumps are a far better alternative than using separately operated pumps.

Page: 336

Synchronous Lifting Systems

EVO-Series pumps the multi-functional lifting system and multiple lift point capabilities.

Maximum Power-to-Height Ratio

Saddles

All RCS-Series cylinders have plunger mounting holes for installation of tilt saddles. See table for selection and dimensional information.

Page: 27

Low Clearance Lifting

The LW-Series Lifting Wedges and SOH-Series Machine Lifts are the perfect choice for lifting the first few millimeters.

Page: 182

RSM-series, Low-Height Cylinders

- Compact, flat design for use where most other cylinders will not fit
- Single-acting, spring return
- RSM750, 1000 and 1500 have handles for easy carrying
- Mounting holes permit easy fixturing
- Baked enamel finish for increased corrosion resistance
- CR400 coupler and dust cap included on all models¹⁾
- Hard chrome plated high quality steel plungers
- Grooved plunger ends require no saddle.

RCS-series, Low-Height Cylinders

- Lightweight, low profile design for use in confined spaces
- Single-acting, spring return
- Baked enamel finish for increased corrosion resistance
- Plunger wiper reduces contamination, extending cylinder life
- CR400 coupler and dust cap included on all models
- Grooved plunger end with threaded holes for mounting tilt saddles
- Integral handle on RCS1002 for easy carrying
- Plated steel plungers.

▼ Only a couple of centimeters will do for an RSM-cylinder to lift a large construction.

▼ RLT-Series, Low-Height Telescopic Cylinder

- **Single-acting, load-return**
- **Nitrocarburized surface treatment inside and out provides corrosion protection**
- **For use in confined spaces: machinery positioning, tool fastening**
- **Mounting bolt holes for easy fixing**
- **Up to 3% side-load of maximum capacity**
- **Design safety factor complies with ASME B30.1 & EN1494**
- **CR400 coupler for compatibility with standard product**
- **High-Alloy steel for maximum strength.**

For longer cylinder strokes in confined spaces

RLT-Series, Low-Height Telescopic Cylinders

Enerpac compact, low-height telescopic cylinders are available with two or three pistons, and can lift loads up to 40 mm in a single movement.

Nitrocarburization surface treatment for improved wear resistance and corrosion protection for increased safety and longer service life in harsh conditions. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

Multi-Stage Cylinders

1st Stage: maximum load capacity at lower stroke.

2nd Stage: extended stroke with lower capacity than the 1st stage.

Final Stage: maximum stroke extension with lowest capacity.

Cylinder Capacity at Maximum Stroke ton (kN)	Maximum Stroke (mm)	Model Number	Collapsed Height	Extended Height	Oil Capacity (cm ³)
			A (mm)	B (mm)	
4,4 (43)	17	RLT40	45,0	62,0	21
4,4 (43)	23	RLT41	54,0	77,0	51
11,4 (111)	18	RLT110	54,5	72,5	48
11,4 (111)	40	RLT111	89,0	129,0	241

Low-Height Telescopic Cylinders, Single-Acting

Assisted-return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction,

Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting load and spring-return cylinders. See enerpac.com for details.

Page: 123

4-way Manifold assembly complete with gauges

Offering ease of portability and convenience with an ergonomic robust design,

ready for use. Enerpac's CR400 female couplers on all ports allow the manifold to be quickly connected to up to 4 cylinders. Glycerine filled, 700 bar gauges allow operators to work safely. All protected by the robust protection frame.

Manifold Type (Used for cylinders)	Model Number
4x Single-acting	AMGC41
4x Double-acting	AMGC42

RLT Series

Capacity:

4,4 - 74,1 ton

Stroke:

17 - 40 mm

Maximum Operating Pressure:

700 bar

WARNING:

If several telescopic cylinders need to be controlled simultaneously Enerpac recommend the use of EVO-Series Synchronous Lifting Pumps. Enerpac advise not to use SFP-Series Split-Flow pumps to operate several telescopic cylinders at a time due to the volume difference on the different stages.

▼ RT3311 Telescopic Cylinder (shown with plunger extended and retracted)

- Nitrocarburized surface treatment inside and out provides corrosion protection
- 3% side-load of full capacity
- Double or triple wear bearings support lifting stages
- Tilting saddles with 5 degrees of maximum tilt standard on all models
- Design Safety factor complies with ASME B30.1 & EN1494
- Certified lifting eyes for safe handling and positioning
- CR400 coupler for compatibility with standard product
- Steel cylinder base for maximum strength.

◀ *The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.*

Moving a load a greater distance

RT-Series, Multi-Stage Cylinders

Enerpac compact, multi-stage telescopic cylinders are available with two or three pistons, and can lift loads up to 600 mm in a single movement.

Nitrocarburized surface treatment inside and out provides unparalleled sideload resistance and corrosion protection for safe use in the harshest conditions. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

Multi-Stage Cylinders

1st Stage: maximum load capacity at lowest maximum stroke

2nd Stage: extended stroke but at lower maximum capacity than the 1st stage

Final Stage: maximum stroke extension but lowest maximum capacity.

WARNING: If several telescopic cylinders need to be controlled simultaneously Enerpac recommend the use of EVO or EVOB-Series Synchronous Lifting Pumps. Enerpac advise not to use SFP-Series Split-Flow pumps to operate several telescopic cylinders at a time due to the volume difference on the different stages.

Tilt Saddles

All RT-Series cylinders include integral tilt saddles with maximum tilt angles up to 5 degree.

Cylinder Capacity at Maximum Stroke ton (kN)	Maximum Stroke (mm)	Model Number	Collapsed Height	
			A (mm)	B (mm)
14,0 (137)	270	RT1510	283	553
		RT1817	345	780
20,2 (198)	300	RT2111	317	617
	500	RT2119	395	895
31,5 (309)	300	RT3311	352	652
	600	RT3323	476	1076

Multi-Stage Telescopic Cylinders, Single-Acting, Load Return

- 1 **Wiper Ring** on each stage to minimize contamination.
- 2 **Nitrocarburized Coating** for maximum corrosion protection and surface hardness. Exterior in nitrided and Enerpac yellow epoxy.
- 3 **Stop Ring** full load capable to prevent plunger overstroke.
- 4 **Wear Bearings**. Double or triple wear bearings for maximum sideload capability and wear resistance.
- 5 **Seals** for maximum compliance and high wear resistance.

RT Series

Capacity:
14 - 31,5 ton

Stroke:
270 - 600 mm

Maximum Operating Pressure:
700 bar

Assisted-return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting load and spring-return cylinders. See enerpac.com for details.

▼ Shown from left to right: RRH3010, RRH1001, RRH6010

- Relief valves prevent damage in case of over-pressurisation
- Baked enamel finish for increased corrosion resistance
- Collar threads enable easy fixturing (except RRH1001 and RRH1508)
- Double-acting version for fast retraction
- Nickel-plated, floating center tube increases product life
- Hollow plunger allows for both pull and push forces
- CR400 coupler and dust cap included on all models
- Plunger wiper reduces contamination, extending cylinder life.

Versatility in Testing, Maintenance and Tensioning Applications

Ultra-Lightweight Aluminium Cylinders

If you need a higher cylinder capacity-to-weight-ratio the lightweight **RRH-Series** are the perfect choice.

Page: 18

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components

Section for a full range of gauges.

Page: 127

Saddles

All RRH-Series cylinders are equipped with smooth saddles. See table at next page for optional threaded saddles and all dimensional information.

Page: 37

▼ Double-acting hollow plunger cylinders are applied for bridge launching systems.

High Precision and High Cycle Performance

Speed Chart

See the Enerpac Cylinder Speed Chart in our 'Yellow Pages' to determine your approximate cylinder speed.

Page: **405**

- Designed for long life, the best choice for production applications
- Unique mounting configurations simplify fixturing
- Baked enamel finish for increased corrosion resistance
- Double-acting operation develops force in both directions, providing maximum versatility
- Plunger wiper reduces contamination, extending cylinder life
- Imperial models (RD-series) available on request.

▼ Clamping application using Enerpac BRD cylinders (with clevis eye attachments on both ends) for their high pressure capability and mounting flexibility.

RR-Series, Double-Acting Cylinders

ENERPAC 

▼ Shown from left to right: RR10013, RR1502, RR20013, RR1010, RR7513

- Collar threads, plunger threads and base mounting holes for easy fixturing (on most models)
- Baked enamel finish for increased corrosion resistance
- Removable hardened saddles protect plunger during lifting and pressing
- Built-in safety valve prevents accidental over-pressurization
- CR400 couplers and dust caps included on all models
- Plunger wiper reduces contamination, extending cylinder life.

▼ A lateral bridge slide method was utilized to slide the new bridge into position. Two RR-Series double acting hydraulic cylinders with ZU4-Series electric pumps were used to push the bridge into position over PTFE sliding elements.

Most Versatile Performers

Rugged enough for the toughest job site uses and precision designed for high-cycle industrial uses.

Optional Snap-in Saddles

Optional snap-in saddles for RR-Series double-acting cylinders up to 75 ton.

Page: **41**

Optimum Performance

Enerpac's range of Z-Class electric pumps, fitted with manual or solenoid operated 4-way valves, offer optimum combinations with RR-Series cylinders.

Page: **96**

▼ RR-cylinders provide power and precision in a special hydraulic press.

Double-Acting Long Stroke Cylinders

Pump Selection

A double-acting cylinder must be powered by a pump with a 4-way valve.

Page: 75

RR756, 7513
RR1502, 15032

RR4006 - RR50048

Base mounting hole location is for reference only, as it is affected by assembly.

Cylinder retract capacity for certain RR cylinders may be less than theoretical values, as a result of reduced relief valve pressure settings:

RR308/3014: 275 bar
RR506/5013/5020: 480 bar
RR756/7513: 495 bar

◀ For full features see previous page.

▼ HCL2006, HCG2002, HCR2006

Reaching the Summit Edition:

- Nitrocarburized hardened surfaces offers improved protection against side-load scoring and cyclic wear
- Weather protected, inside and out
- Low-friction locking rings spin easy, save time and effort ¹⁾
- State of the art bearing materials reduce wear and avoid bore damage even in high side-load conditions

Low wear, high pressure seals

- Improved seal design and material selection increases seal performance even in harsh conditions
- Low friction for faster retraction, longer life

Versatile

- Over 220 models in 5 configurations ¹⁾
- Certified lifting eyes, base mounting holes and collar threads are included for secure handling and cylinder mounting ¹⁾

¹⁾ See specific models technical data for more information.

Highest Level of Durability

The Summit Edition

Innovation is at the heart of the new Summit Edition cylinders, delivering the high quality construction you expect from Enerpac. The design and durability add safety and reliability to your job.

- Plunger support bearing adds support for eccentric loads ²⁾
- Nitrocarburization surface treatment for improved wear resistance and corrosion protection
- Low wear, high pressure seals provide longer service life.

²⁾ Eccentric load (or "side-load") is inevitable in heavy lifting. Our unique Summit Edition features provide the ultimate protection against side-load. Increased bearing surface maintains stability and nitrocarburization treatment prevents scoring on the inside of the cylinder. Side-load poses a real problem.... our new cylinder features are the solution!

▼ Bridge lifting and launching system. The load is balanced on groups of lock nut cylinders. The hydraulic movements are synchronised using the Enerpac PLC-controlled synchronous lift system.

High Tonnage Cylinders

The Enerpac High Tonnage Cylinders are particularly suitable for (multipoint) lifting applications.

HCG, HCR, HCL-Series Cylinders

- 50 - 1000 ton lifting capacity
- 50 - 300 mm stroke

HCG-Series - single-acting

- gravity return
- stop ring to prevent plunger blow-out
- designed to withstand up to 10% side-load of maximum capacity.

HCR-Series - double-acting

- hydraulic advance and retract for controlled movement
- designed to withstand up to 10% side-load of maximum capacity.

HCL-Series - lock nut, single-acting

- gravity return
- lock nut for mechanical load holding
- overflow port to prevent plunger blow out
- designed to withstand 10% side-load up to 90% of maximum stroke.

HCRL-Series - lock nut, double-acting

- hydraulic advance and retract
- designed to withstand up to 10% side-load of maximum capacity
- integrated tilt saddle
- lock nut for mechanical load holding
- 50 - 300 ton lifting capacity
- 150 - 300 mm stroke

LPL-Series - lock nut, low height, single-acting (see page 24)

- 60 - 500 ton lifting capacity;
- 45 - 50 mm lifting stroke
- integrated tilt saddle
- gravity return
- lock nut for mechanical load holding
- 5-10% side-load of maximum capacity.

In combination with our state of the art power packs, you will have a world class hydraulic system to perform the most challenging lifting jobs in a safe and professional manner. See **page 75** for more information on our pump offering.

Page: 46

HCG HCR HCL HCRL Series

Capacity:

50 - 1000 ton

Stroke:

50 - 300 mm

Maximum Operating Pressure:

700 bar

Assisted Return Pumps

Enerpac HCG, HCL and LPL-Series cylinders are hydraulic advance and gravity return. To improve productivity and plunger retraction Enerpac offers assisted return on ZU4 and ZE-Series pumps featuring Enerpac **Venturi Valve technology**, specifically to facilitate the faster return of single-acting, spring and gravity return cylinders. See enerpac.com for details.

Page: 100

Split-Flow Pumps

SFP-Series pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points these pumps are a far better alternative than using separately operated pumps.

Page: 336

Synchronous Lifting Systems

EVO-Series pumps the multi-functional lifting system and multiple lift point capabilities.

Page: 340

HCG-50 - 150 ton

HCG-200 - 300 ton

HCG-Series, Single-Acting, Gravity Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand 10% side-load of maximum capacity ¹⁾
- Stop ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and collar threads.
- Standard collar thread up to 250 ton models. Collar thread is optional on 300 ton models and higher.

SELECTION CHART 50 - 300 TON HCG-MODELS

For 400 - 1000 ton models, see pages 50-51.

For full product features see pages 44-45.

²⁾ A1 = Collapsed height including CATS-Series tilt saddle.

HCG-Series, Single-Acting, Gravity Return Cylinders

- Hardened surface resists side-loading and cyclic wear
- Designed to withstand 10% side-load of maximum capacity
- Stop ring to prevent plunger blow-out
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes
- Optional collar threads on 300 ton models and higher capacities.

Optional Collar Thread (mm)		
Model / Capacity ton	Thread Size	Thread Length
	W	X
HCG400	M350 x 3	83
HCG500	M400 x 4	90
HCG600	M430 x 4	100
HCG800	M505 x 5	122
HCG1000	M570 x 5	137

Collar thread is optional on 300 ton models and higher. For collar thread on cylinder add suffix "E002" to model number. Example: **HCG400E002**

The collar thread length is designed for the full rated cylinder capacity.

²⁾ A1 = Collapsed height including CATS-Series tilt saddle.

HCR-Series, Double-Acting Cylinders

- Fast advance and retract
- Designed to withstand 10% side-load of maximum capacity
- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Upper and lower replaceable bearings enclose the cylinder plunger for support throughout the stroke
- Certified lifting eyes, base mounting holes and optional collar threads
- Optional collar threads on 300 ton models and higher capacities.

SELECTION CHART & DETAILS OF 400 - 1000 TON HCR-MODELS

For 50 - 300 ton models, see pages 52-53.

For full product features see pages 44-45.

Cylinder Capacity ton	Stroke (mm)	Model Number	Maximum Cylinder Capacity at 700 bar ton (kN)	Cylinder Effective Area (cm ²)	Oil Capacity (cm ³)		Collapsed Height A (mm)

	300	HCR100012			45.616	18.378	692

Optional Collar Thread (mm)

Model / Capacity ton	Thread Size	Thread Length
	W	X
HCR400	M350 x 3	83
HCR500	M400 x 4	90
HCR600	M430 x 4	100
HCR800	M505 x 5	122
HCR1000	M570 x 5	137

Collar thread is optional on 300 ton models and higher. For collar thread on cylinder add suffix "E002" to model number. Example: HCR4006E002

The collar thread length is designed for the full rated cylinder capacity.

Base Mounting Holes (mm)

Model / Capacity ton	Bolt Circle	Thread Size	Minimum Thread Depth	Number of Holes	Angle from Coupler
	U	V	Z		
HCR400	300	M16 x 2	25	3	60°
HCR500	340	M24 x 3	36	3	60°
HCR600	370	M24 x 3	36	3	60°
HCR800	440	M24 x 3	36	3	60°
HCR1000	500	M24 x 3	36	3	60°

Double-Acting, High Tonnage Cylinders

▲ The superlifting and launch of a 43,000-ton floating oil production system in Malaysia for the Gumusut-Kakap offshore field has set high benchmarks for safety through its use of sophisticated EVO-Series synchronous hydraulics to lift, balance, weigh and smoothly launch massive resource structures.

HCR Series

Capacity:
400 - 1000 ton

Stroke:
50 - 300 mm

Maximum Operating Pressure:
700 bar

HCL-Series, Single-Acting, Gravity Return Cylinders

- Lock nut provides positive and safe mechanical load holding
- Low-friction locking rings spin easy, save time and effort
- Designed to withstand 10% side-load up to 90% of maximum stroke
- Hardened surface resists side-loading and cyclic wear
- Overflow port as stroke limiter to prevent plunger blow-out
- Weather protected, inside and out
- Replaceable bearings enclose the plunger for support throughout the stroke
- Certified lifting eyes and base mounting holes.

SELECTION CHART 50 - 300 TON HCL-MODELS

For 400 - 1000 ton models, see pages 58-59.

For full product features see pages 44-45.

HCRL-Series, Double-Acting Lock Nut Cylinders

▼ HCRL2006, HCRL506

- Hydraulically controlled fast retraction
- Lock nut provides mechanical load holding for a safe work environment
- Designed to withstand up to 10% side-load of maximum capacity
- Integrated tilt saddle allows up to 5 degrees of misalignment
- Hardened surface resists side-loading and cyclic wear
- Weather protected, inside and out
- Replaceable bearings enclose the plunger external and internally for support
- Certified lifting eyes, base mounting holes and collar thread as standard
- Stop-ring to prevent plunger blow-out
- Low friction lock nut, to spin easily, save time and effort.

HCRL300	260	M16 x 2	25

Double-Acting Lock Nut Cylinders

Higher Capacities, Larger Strokes

The HCRL-Series Cylinders are available up to 2000 ton capacity and additional stroke lengths available on request.

HCRL Series

Capacity:

50 - 300 ton

Stroke:

150 - 300 mm

Maximum Operating Pressure:

700 bar

Synchronous Lifting Systems

EVO-Series pumps the multi-functional lifting system and multiple lift point capabilities.

Single-Acting Cylinder-Pump Sets

SET SELECTION:

- 1** Select the cylinder
- 2** Select the pump
- 3** Find the set model number in the gray matrix

SELECTION EXAMPLE

Selected cylinder:

- RC106, Single-Acting cylinder with 156 mm stroke

Selected pump:

- P392, Lightweight hand pump

Set model number:

- SCR106H

Included:

- HC7206 hose
- GF10B gauge
- GA2 adaptor

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one partnumber for a pre-assembled gauge, gauge adaptor and coupler.

Page: 142

SC Series

Capacity:

5 - 95 ton

Stroke:

38 - 362 mm

Maximum Operating Pressure:

700 bar

Power Box

Tool box with hand pump, gauge adaptor assembly, hose and LW-, RC-, RCS, RSM- or WR-Series cylinder.

¹⁾ With XA12 air pump.

²⁾ Cordless Pump includes 230V Charger. For 115V charger replace the "E" by the "B" in the model number.

▼ From left to right: P142ALSS, P392ALSS, V152NV, V66NV, RC256NV, RC106NV, RC53NV

- Corrosion resistant, nickel-plated valves and cylinders
- Stainless steel pump inserts will not corrode
- Viton® Seals provide heat and chemical resistance
- Anodized aluminum pump reservoirs and plastic encapsulated pump bodies resist wet environments
- Two-speed operation reduces pump handle strokes 78% compared to single-speed pumps
- Pump handles lock for easy carrying.

RC, P, V Series

Cylinder Capacity:
5 - 25 ton

Stroke:
51 - 156 mm

Maximum Operating Pressure:
700 bar

Applications

For use in wet environments such as food processing, pulp and paper, mining, construction and applications in high temperature or in welding areas.

Multifluid Hand Pumps

MP-Series corrosion resistant hand pumps for low pressure filling and high pressure testing applications, suitable for a wide range of fluids.

²⁾ With P142 two-speed lightweight hand pump.

▼ The Power Box – the portable tool set – applicable everywhere.

▼ Shown from left to right: JHA356, JHA156

JH, JHA Series

Capacity:
7 - 100 ton

Stroke:
76 - 155 mm

Maximum Operating Pressure:
700 bar

- All-directional operation on 7, 15 and 35 ton JHA-series
- Internal relief valve to prevent overloading
- Machined flat front and bottom surfaces permit flush alignment in tight corners
- Chrome plated plungers
- Pumping handle included
- Automatic by-pass port to prevent over-extension (JH-series).

Lifting Wedge and Machine Lifts

Ideal to lift the load the first few centimeters. The LW16 Lifting Wedge requires a very small access gap of only 10 mm.

Page: **182**

Load Skates

For moving heavy loads easily and safely.

Industrial Steel Bottle Jacks

▼ Shown: GBJ010A, GBJ030A, GBJ003A

GBJ Series

Capacity:

2 - 100 ton

Stroke:

62 - 460 mm

Screw Extension Feature

Heat treated, adjustable extension screw with cleated saddle on selected GBJ models helps adjusting and prevents slipping.

- Lower handle effort reduces operator fatigue
- Fully serviceable
- High-strength beam and pump linkage for long life
- Pumping handle included on all models
- Safety relief valve to prevent overload
- Automatic by-pass port to prevent over-extension
- Wiper seal for extended life
- Thick base material with large area for increased strength and stability during lifting
- Positioning handle on 20 ton through 50 ton models.

Cylinder-Pump Sets

As an alternative to bottle jacks where the operator is required to stand remote from the jacking point, see our range of cylinder-pump sets.

Safe, Efficient, Mobile Load Lifting

Pendant cord

Supplied with 3,5 m pendant cord for air driven units with pneumatic valves and 6 m pendant cord for electric driven units keeps operator away from the load.

- 54, 90, 136 and 181 ton capacities with pneumatic or electric pumps for the toughest jobs
- 102 mm ground clearance for transport over rail and rough terrain
- Double-acting cylinder
- Three position handle provides easy tilt back and transport
- Complies with ASME/ANSI B30:1 2015 and CE specifications
- Easy to change external filter minimizes down time
- Rugged, fully enclosed 610 mm wide frame with no exposed fittings or hoses
- SUP-R-STACK™ Extension System allows lifting at all heights without blocking.

POW'R-LOCK™ – Self-Locking Mobile Lift System

A self-locking jack that performs automatic locking during lifting, lowering and holding.

For power source, the following characters should be inserted in the 5th space of the model number.

Ordering Example:

Model No. PREME06014L is a 356 mm stroke, 54 ton model, with a manual valve and a 230 VAC, 1-ph, 50 Hz electric motor.

A Air Pump, 1416 l/min air consumption at 5,5 bar

B 115 VAC, 1-ph., 50-60 Hz, 20 A

E 208-240 VAC, 1-ph., 50-60 Hz, Euro Plug, 10 A

I 208-240 VAC, 1-ph., 50-60 Hz, USA Plug, 10 A

G ¹⁾ 208-240 VAC, 3-ph., 50-60 Hz

W ¹⁾ 380-415 VAC, 3-ph., 50-60 Hz

J ¹⁾ 440-480 VAC, 3-ph., 50-60 Hz

R ¹⁾ 575 VAC, 3-ph., 50-60 Hz.

¹⁾ Not available for 54 ton capacity.

▼ Shown: PL20025-ASA and PL20014-ASA

- Provides continuous locking protection during lift, lower and hold functions
- Patent-pending control technology synchronizes cylinder and lock nut for smooth and efficient lifting and lowering
- Unique double-acting cylinder offers a low collapsed height to accommodate more lifting applications
- Simple 2-button pendant allows operation of raise and lower functions from up to 6,1 metres away
- All load-bearing cylinder components have a nitrocarburized treatment to improve wear characteristics and resist corrosion
- Ergonomic handle has six positions for comfortable handling and folds when not in use
- Meets ANSI/ASME B30.1-2015, AS/NZS-2538, AS/NZS-2693 certification criteria.

Efficient Lifting with Continuous Automatic Load Locking

POW'R-LOCK™ Self-Locking Lift System

Only the POW'R-LOCK™ Lift System provides continuous positive locking of the load through all stages of lifting and lowering. No operator intervention is required to activate or de-activate the automatic locking system.

Two different stroke lengths are available. Both models are powered by an external compressed air system (user-supplied).

A convenient two-button pendant controls operation of the Lift System's air motor and directional control valve.

Tilt Load Cap

All POW'R-LOCK™ Lift System models feature a Tilt Load Cap to reduce side-loading.

Safety First

When lifting large, heavy vehicles certain precautions must be followed. Follow your published safety directions for lifting and cribbing your loads. The Pow'R-LOCK™ Lift System provides load/lock protection, but you must follow the safety directions for load cribbing operations.

◀ The PL-Series POW'R-LOCK™ Portable Lift System.

POW'R-LOCK™ Mobile Lift System

Accessories

Flat Load Cap – Non-tilt load cap has lower profile for tight lifting spaces.

Spacers – Minimize gap between load cap and lifting point to maximize hydraulic stroke of the jack.

Extensions – Stackable, with large alloy steel locating studs to resist effects of side-loading.

Extension Base Adapter – Extension Base Adapter design eliminates risk of improper stacking when using more than one extension.

PL Series

Rated Lifting Capacity:

181 ton

Stroke:

356 - 622 mm

Maximum Operating Pressure:

700 bar

Model Number	Description	Height (mm)	PL20014-ASA	PL20025-ASA
PLC1	Flat Load Cap	34	x	x
PLS1	Spacer	26	x	x
PLS2	Spacer	51	x	x
PLE5	Extension	127	x	x
	PLE7	Extension	178	x
	PLE9	Extension	229	x
	PLE11	Extension	280	x
PLE14	Extension	356	x	-
PLB12	Extension base adapter	305	x	-

WARNING!

PLE11 and **PLE14** Extensions and **PLB12** Extension Base Adapter are to be used with the "short" model **PL20014-ASA** only. Use of these extensions on the "tall" model **PL20025-ASA** will result in an excessive maximum lifting height. Load could become unstable and drop, resulting in possible personal injury and/or property damage.

Model Number	Maximum Additional Stack Height *
PLS20014-ASA	712 mm
PLS20025-ASA	229 mm

* Using optional PLB and PLE-Series extensions and PLS-Series spacers. Load cap height is NOT included in the stack height.

PR-Series, POW'R-RISER® Mobile Lifting Jack

When automatic load-locking is not required, the POW'R-RISER® jack provides a mobile lifting solution.

Page: 68

Capacity ton (kN)	Stroke (mm)	Model Nr. with Air Pump	Cylinder Lifting Speed ¹⁾ (mm/min)		Recommended Air Supply ²⁾		A ³⁾ (mm)	B ³⁾ (mm)	 (kg)
			Load	No Load	(l/min)	(bar)			
181 (1779)	356	PL20014-ASA	51	61	3681 - 4247	3,8 - 6,9	1219	864	501
	622	PL20025-ASA	51	61			1778	1156	599

¹⁾ Depending on available airflow, regulator setting, pump speed and load weight.

²⁾ Minimum dynamic air pressure of 3,8-4,1 bar. 6,2-6,9 bar required to achieve 1779 kN capacity.

³⁾ Height A and B are with Swivel Load Cap installed. Subtract 51 mm if flat load cap is used.

There's no substitute for experience in customizing hydraulic cylinders and Enerpac meets the needs of the most demanding applications.

Cylinders are the primary workhorse in hydraulic systems required to push or pull. Although Enerpac offers a wide variety of cylinders to fit many application requirements, there are many applications that require customization.

These may include special corrosion protection, ability to handle extreme side loads, or having special mounting needs.

◀ Large capacity, double-acting lock nut cylinders with an external lock ring used for bridge work.

◀ Double-acting cylinders with pilot-operated check valves and rod eyes on both ends for lifting and positioning applications.

◀ Custom private-label cylinders for OEM applications.

Overview Custom Cylinders

▲ Custom 500 ton double-acting cylinders with 1,83 m stroke for lifting electric rope shovels.

CUSTOMIZABLE FEATURES:

- Stroke
- Capacity
- Paint
- Pressure Rating
- Fitting
- Special Attachments
- Seals
- Imbedded Sensors
- Collapsed Height
- Rod Modifications
- Special Mounting
- Corrosion Resistance

Custom Hydraulic Pumps

Enerpac offers a wide variety of hydraulic pumps for all your custom needs. Still, many applications require a customized pump to operate the system.

Overview Enerpac Heavy Lifting Capabilities

336

SFP-SERIES, SPLIT-FLOW PUMPS

The split-flow pump is an economical solution for multi-point controlled lifting applications. Split-Flow pumps distribute an equal amount of hydraulic oil to a maximum of 8 outlets.

340

EVO-SERIES, SYNCHRONOUS LIFTING SYSTEMS

EVO-pumps: modular and multi-functional system to control 4, 8 or 12 lifting points. Network capability to link up to 48 lifting points with 4 EVO-units.

342

SCJ-SERIES, SELF-LOCKING CUBE JACKS

Compact incremental lifting system with automated mechanical locking. Safe, more efficient alternative to the jack-and-pack method with wooden cribbing. Cube Jack utilizes base lifting frames and self-aligning, lightweight steel cribbing blocks.

346

BLS-SERIES, CLIMBING JACKS

Double-acting stage lift cylinders with solid plunger design allows for a load to be lifted many times the stroke of the cylinder. The solution for incremental lifting.

348

JS-SERIES, JACK-UP SYSTEMS

The jack up system is a custom developed multi-point incremental lifting system – synchronously lift and mechanically hold. A typical system setup includes four jack up units positioned under each corner of a load.

350

HSL-SERIES, STRAND JACKS

Compact high capacity system for controlled lifting and lowering. Strand jack systems that provide fully controlled precise lifting.

352

SHS, SHAS-SERIES, SYNCHOIST

High precision hoisting and load positioning systems to enhance a crane's capability. SHAS-Series, – Wireless remote control and integrated hydraulics.

354

ML, SL, SBL-SERIES, HYDRAULIC GANTRIES

Telescopic hydraulic gantries are heavy lifting systems that offer control and stability, even in confined spaces. Wireless control system is included and offer superior safety and control for your most demanding lifting and rigging operations.

358

HSK, LH-SERIES, SKIDDING SYSTEMS

A system comprised of a series of skid-shoes powered by hydraulic push-pull cylinders, traveling over a pre-constructed track. LH-Series includes low-height skid beams that can fit in tight spaces while still offering high capacity.

364

ETR-SERIES, ELECTRIC TROLLEY SYSTEMS

Safe & synchronized travel. The ETR-System is comprised of electrically-driven trolleys which can carry heavy loads along a fixed track system. The entire system is controlled by a hand held wireless control system.

366

ETT-SERIES, HYDRAULIC TURNTABLES

Safe and controlled rotation. The ETT-Series is your solution for rotating heavy loads during, before or after a lifting and skidding operation.

367

SPMT-SELF-PROPELLED MODULAR TRANSPORTER

A trailer with a slim design to transport large and heavy objects. Hydraulic strength in a linear drive transport system.

Enerpac hydraulic pumps are available in over 1000 different configurations. Whatever your high-pressure pump needs are... speed, control, intermittent or heavy duty cycle or pumps for multiple lift point capabilities and synchronous lifting systems, you will find an Enerpac pump suited to the application.

⑦ Featuring Hand, Battery, Electric, Air and Gasoline powered models, with multiple reservoir and valve configurations, Enerpac offers the most comprehensive pump line available.

Pump Selection

For help in selecting the correct pump for your application, please view our 'Yellow Pages'. If you require further assistance, contact the Enerpac office located near you.

Page:  398

Torque Pumps

System matched air and electric pumps provide control to operate Enerpac Torque Wrenches.

Page:  265

Pumps for Multiple Lift Point Capabilities

The SFP-Series Split-Flow Pumps are an economical solution for multi-point controlled lifting and lowering applications and a far better alternative than using separately operated pumps.

Pumps for Synchronous Lifting Systems

The multi-functional EVO-Series lifting system to control 4, 8, 12 upto 48 lifting points.

- Lightweight and compact design
- Durable glass-filled nylon reservoir and nylon encapsulated aluminium pump base for maximum corrosion resistance
- Two-speed operation reduces handle strokes by as much as 78% over single speed pumps
- Lower handle effort to minimize operator fatigue
- Integral 4-way valve on P842 for operation of double-acting cylinders
- Handle lock and lightweight construction for easy carrying
- Large oil capacities to power a wide range of cylinders or tools
- Non-conductive fiberglass handle for improved operator safety
- Internal pressure relief valve for overload protection.

▼ Cylinder-pump set SCR254H used to support the construction while monitoring pressure and load with the gauge.

Exclusively from Enerpac

- Reduced handle effort and ergonomic grip for less operator fatigue
- Two-speed operation for fast and easy operation (except P39)
- Vent free reservoir eliminates spills
- Quick grip handle allows for easy transport
- Integral reservoir over-pressurization protection
- All steel construction, chrome plated plunger and wiper system for durable, long lasting performance
- 4-way valving on the P84 and P464 for operation of double-acting cylinders.

▼ In the absence of a power supply, the P80 Hand Pump offers a powerful solution.

The Solution for Tough Jobs

Two Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to load contact, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Foot Pump Conversion Kits

Convert your P39, P77, P80 or P801 to foot power with the PC11 Kit. Includes instructions for easy conversion.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 142

4-Way Control Valve

P84 and P464 feature a manual 4-way control valve, designed for use with one double-acting or two single-acting cylinders. For system

▼ Shown from left to right: P25, P51, P18

When Less Than 700 bar is All You Need

- P25 and P50 pump oil in both forward and reverse handle movement improving overall efficiency, ideal when mounting space is restricted
- External load-release valve
- Internal pressure-relief valve for overload protection
- For use with single-acting cylinders and tools
- P18 vertical operation requires pump head facing down
- P25 and P50 vertical operation requires pump vent side facing down
- P51 for horizontal operation only.

GA45GC Gauge Adaptor

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 142

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

▼ MP110

- Superior corrosion resistance
- Standard Nitrile seals – can be used for a wide range of fluids such as demineralised water, oil/water emulsions, waterglycols, mineral oils
- Two speed pumps up to 1000 bar pressure
- Buna Nitrile seals can be exchanged with optional EPDM seal for use with Skydrol or brake fluids
- Impregnated aluminium anodized pump housing with stainless steel internal pumping components
- Externally adjustable pressure relief valve
- 1/4" NPTF gauge port
- For use with single-acting cylinders and tools.

MP Series

Flow at Rated Pressure:

1,6 - 20,6 cm³/stroke

Maximum Operating Pressure:

110 - 1000 bar

Optional Reservoir Kit

Includes 10 litres tank with skid frame, top plate with reservoir seal, suction pipe and mounting bolts. Useable oil capacity is 7,4 litres. Order modelnr.: **MP10T**.

Stainless Steel Hand Pump

Also available as stainless steel hand pump, model number **11-400**.

Page: **84**

MP110, 350, 700, 1000

- ① Suction / Tank return port 3/8"-18 NPTF
- ② Pressure port 3/8"-18 NPTF
- ③ Gauge port 1/4"-18 NPTF

Pump Type	Usable Oil Capacity * (cm ³)	Model Number **	Pressure Rating (bar)		Oil Displacement per Stroke (cm ³)		Max. Handle Effort (kg)	Piston Stroke (mm)	Weight (kg)

Pump-Cylinder Sets

The P392FP is available as **set** (pump, cylinder, gauge, couplers and hose) for your ordering convenience.

Page: **62**

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: **128**

▼ P392FP offers the advantage of hands free operation to handle and control the tool or cylinder.

P, 11-Series, Ultra-High Pressure Hand Pumps **ENERPAC**

▼ Shown from left to right: 11-100, P2282

- Two-speed operation on the P2282 allows for faster fill operation, reducing cycle times for many testing applications
- 303 Stainless steel construction on the 11-100 and 11-400 models enable use with many different fluids, such as distilled water, diesters, silicones, soluble oils and petroleum
- Large release knob for improved control of pressure release
- Outlet ports are 3/4"-16 cone for 2800 bar rating
- Ultra-high pressure fittings feature all stainless steel construction except adaptor 41-366 which features nickel plated carbon steel construction.

Cone Seal

Stainless Steel High Pressure fittings seal on a 'cone' surface and do not require pipe sealer. The Gland Nut holds the sleeve and tubing tight against the cone surface to provide a 2800 bar seal.

Ultra-High Pressure up to 2800 bar

2-Way Shut-Off Valve Model Number 72-750

For 2800 bar applications requiring a shut-off valve or gauge snubber. Made of 318 Stainless Steel and utilizing .38 inch cone fittings, it is the perfect selection for use with your ultra-high pressure hand pump.

Test System Gauges

Ideal for monitoring pressure in your hydraulic circuit. Test System Gauges, such as the T6010L, are available with cone threads or NPTF threads and a variety of pressure ranges.

Page: 140

▲ Typical Test System

▲ Test System with Gauge and Snubber

▼ XC1201ME

- Cordless, zero emission pump
- Lightweight design with integrated handle and carrying strap for portability
- Bladder reservoir prevents contamination and allows pump usage in any position
- Powerful 0,37 kW motor and 28 Volt Lithium-Ion battery deliver exceptional speed and superior run time
- High-strength fiberglass reinforced composite shroud for superior durability in demanding job site environments
- Cordless technology eliminates tripping hazards found in other electric or air powered pumps
- Three valve options for single- and double-acting cylinders: 3-way/2-position, 4-way/3-position or Dump & Hold
- Also available as torque pumps.

Performance of a Powered Pump Portability of a Hand Pump

Interactive Pendant on XC-1302S Models

Available only on **XC1302S** pump models. The interactive pendant allows user to easily toggle from "jog operation" to "dump system pressure" with a push of a button. (Cord length is 3 metres).

28-Volt Battery

The **XC28V** with Lithium-Ion technology for maximum battery performance and superior run time.

Roll Cage

Optional Roll Cage XC-Series pumps. Please order model number **XCRCTK**.

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 142

◀ Portable power and simplicity for the toughest jobs.

XC-Series Cordless Pumps

The XC-Series cordless pump is ideal for jobs that require a combination of portability, speed, and safety. These cordless pumps are perfect for remote locations without access to power, but also indoors where trip hazards, ergonomics or size is a concern.

The XC-Series cordless pump is compatible with all Enerpac hydraulic tools and small to medium sized cylinders. The XC-Series cordless pump is CSA and CE compliant.

Lithium-Ion battery for superior run time:

- 279 cuts of 10 mm reinforcing bar using a WHC750 Cutter
- 112 lifts with a WR5 Spreader
- 44 splits on M27 - 8.8 nuts using a NC3241 Nut Cutter
- 28 times lifting with a RC104 cylinder (10 ton, 100 mm stroke).

Note: Actual number of cycles per charge will vary depending on condition of battery, tool and ambient conditions. Battery life with double-acting tools is approximately 75% of that for comparable, single-acting tools.

XC Series

Reservoir Capacity:
1,0 - 2,0 litres

Flow at Rated Pressure:
0,25 l/min

Maximum Operating Pressure:
700 bar

- ① Outlet "Advance" Port 3/8"-18 NPTF
- ② Oil Fill (must use funnel)
- ③ User Adjustable Relief Valve Access Port
- ④ Directional Control Valve
- ⑤ Shoulder Strap Connection Points
- ⑥ Safety Lock Feature
- ⑦ On/Off Switch
- ⑧ Inlet "Retract" Port (double-acting models only)

Productivity, Performance, Safety

- High-flow cordless solution saves users time and money by eliminating the need for using a generator and extension cords
- Brushless 1,0 kW motor and 3 stage pump maximizes pump and tool productivity while minimizing heat buildup and downtime
- The Lithium-Ion battery provides superior run time, even under extreme job site conditions
- Convenient 3 m pendant cord for hassle-free operation
- Reduced noise level 80 dBA max.
- Zero emission hydraulic power pack.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac

hydraulic hoses.

Page: 128

◀ Special Enerpac ZC-Series Cordless Hydraulic Pump used for rail stressing applications (page 190).

ZC-Series, Cordless Pumps

The Enerpac ZC-Series pump combines the performance of an electric pump with the convenience and portability of a battery pump. This quiet, cordless solution is ideal for applications where emission and noise are a concern, or when electricity or air is not readily available.

The Lithium-Ion battery provides impressive run times

Power for the pump is supplied by a rechargeable 82V lithium-ion battery.

The lithium-ion battery is capable of providing impressive run times, even under extreme job site conditions.

- 50 times lifting with RC1006 cylinder (95 ton, 168 mm stroke)
- 90 times lifting with RC504 cylinder (50 ton, 101 mm stroke).

Valve Options

- 4-way/3-position manual control valve used with double-acting cylinders
- 3-way/3-position manual control valve used with single-acting cylinders
- 4-way/3-position manual control valve with locking and power seat functions used in post tensioning concrete applications.

Applications

- High-flow cordless solution for industrial applications
- Foundation repair
- Rail industry
- Post-tensioning concrete.

* For 115 volt applications replace 'E' suffix with 'B'.

** Electric dump valve for auto-retract of cylinders.

About the Economy Pump

The Economy pump is best suited to power small to medium size cylinders or hydraulic tools. Its lightweight and compact design make it ideal for applications which require easy transport of the pump. The universal motor works well on long extension cords or generator-driven electrical power supplies.

For further application assistance refer to the 'Yellow Pages'.

PUD1100 Series

- Provides advance-retract of single-acting cylinders
- Ideal for punching applications
- For applications not requiring load holding
- 3 m cord with pendant controls motor and valve operation.

PUD1300 Series

- Provides advance-hold-retract of single-acting cylinders
- Ideal for applications requiring load-holding
- For applications requiring solenoid valve operations
- 3 m cord with pendant controls motor and valve operation.

PUJ-Series

- Manual valves provide advance-hold-retract tool operation
- Available with 3- and 4-way valves for single or double-acting cylinders
- 3 m cord with pendant controls the motor operation.

▼ ZE2208ME, ZE2-Series, Electric Pump

- 0,56 kW induction motor for long life and quiet operation
- 71 to 79 dBA across the pressure range
- 6,8 liter, steel reservoir offers capacity and cool operation for wide range of applications
- IP54 protection
- Heavy duty bearings extend pump life by reducing heat, improving lubrication and reducing wear
- Replaceable piston check valves increase service life of major pump components
- VE32D solenoid dump valve model available
- Pendant and manual control options for ease of use.

Durable, reliable, easy to use

Gauges

Minimize the risk of overloading and ensure long, dependable service from your equipment. Refer to the System Components

Section for a full range of gauges.

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 405

ZE2-Series, Electric Pumps

The ZE2-Series is part of the proven Enerpac ZE-Series and utilizes many of the same design elements as the larger pumps in the family.

The 0,56 kW induction motor enables productive flow rates, long cycle life and quiet operation. Combined with the efficient, robust and easy to service pumping element the ZE2 is ideal for manufacturing and shop environments.

Multiple valve and control options provide the flexibility to match the pump to a wide range of pressing, punching and other operations.

Compare the ZE2 to the other pumps in the ZE-Series and determine the best pump for the application.

ZE2 Series

Reservoir Capacity:

6,8 litres

Flow at Rated Pressure:

0,27 l/min

Motor Size:

0,56 kW

Maximum Operating Pressure:

700 bar

¹⁾ "B" suffix model numbers shown are 115 VAC, 1-phase, 50/60 Hz, CE compliant

"I" indicates pump is available in 208-240V, 1-phase, 50/60 Hz with NEMA 6/15 plug, CE compliant

"E" indicates pump is available in 208-240V, 1-phase, 50/60 Hz with European plug, CE compliant

¹⁾ All models can be ordered with the following Factory Installed Accessories/Options:

F = with Return Line Filter, **G** = with 0-1000 bar gauge (ø 63,5 mm), **S** = Single-stage pump unit

²⁾ Models can be ordered with Pressure Switch (P)

▼ EP3204JE-G, E-Pulse® Electric Hydraulic Pump

High productivity through innovative design

Interactive Pendant

Integrated pendant control with a magnet that fits securely into the handle of the pump.

- Operation, programming and diagnostics status provided to operator with yellow, green, and red LED as well as vibration pulses.
- Fault codes warn operators of any issues related to voltage, temperature, button controls, or if professional service is required.

Performance

- Two-stage pump with high flow/pressure ratio: 2,13 l/min at 175 bar; 0,52 l/min at 700 bar
- Smart controls enable motor to maintain constant power across the pressure range
- 24VDC power regulator minimizes effects of poor power supply
- Six-piston block design provides even flow for smooth operation of cylinder or tool.

Durability

- Durable aluminium housing
- High-efficiency permanent magnet, direct drive motor enables continuous use and long service life
- Built-in thermal protection
- IP Rating: IP54 on the pump, IP67 on the pendant.

Convenience

- Speed control with dial adjustment for precise operation *
- Pendant and cord management system
- Integrated pressure gauge with scalereading in bar, MPA and psi
- Convenient oil fill port, oil level indicator and automatic breather.

Variable Speed Control *

Speed control with dial adjustment for precise tool or cylinder operation. The adjustable speed range is approximately 25 to 100% of full rated output.

Tie Down Bracket

Enables pump mounting to a work surface: **MBEP-1** optional Tie Down Bracket.

Manifold Mounting Bracket

Ability to mount AM21 and AM41 split-flow hydraulic manifolds: **MMBEP-1** optional Manifold Mounting Bracket.

E-Pulse®, Electric Hydraulic Pumps

E-Pulse® Pumps

The Enerpac E-Pulse® pums drives high productivity through its innovative design.

Smart controls enable the motor to maintain constant power providing higher flow than traditional pumps.

Adjustable speed control * enables precision as required. E-Pulse® pumps are designed for convenience.

Features include a cord management system and integrated pendant control with a magnet that fits securely into the handle of the pump.

The durable aluminum housing is designed to give easy access for serviceability. E-Pulse is the heart to any hydraulic system, ensuring high performance and providing ultimate convenience.

Introducing the Z-Class power pumps from Enerpac – pumps that run cooler, use less electricity and are easy to service.

Enerpac has used the latest metallurgical, bearing and seal technologies to produce a pump whose features and benefits far surpass the electric pumps that are available today. By reducing the number of moving parts, improving flow dynamics and decreasing friction, Z-Class pumps will stay on the job longer, require less energy to operate and when needed, have lower service costs.

Z-Class power pumps from Enerpac – simply the best pump you will ever use.

CLASS

Z-Class, An Innovation in Pump Design

Z-Class Pumping Element – The Heart of Your Hydraulic System

Highly efficient design provides increased flow rates, reduced heat generation and a decrease in power consumption. This means improved tool speed and increased service life – which results in higher productivity and lower operating costs.

Heavy-duty bearings extend pump life by reducing friction, reducing surface-loading and lowering bearing stresses.

Pump cavity oil bath extends pump life by reducing heat, improving lubrication and reducing wear.

Self-priming, high-flow 1st stage pump increases pump performance by super-charging the 2nd stage piston pump – improving oil flow in both hot and cold weather operation.

Balanced rotating components reduce vibration creating a smoother running pump – reducing wear, friction and sound levels.

Replaceable piston check-valves increase service life of major pump components.

Ergonomic pendant features sealed switches and operates at 24 V for improved operator safety.

Z-Class factory options & accessories

Extensive list of accessories including heat exchanger, roll cage, skid bar, pressure transducer, return line filter and level and temperature switches, allow complete pump control over a wide range of industrial applications.

Z-Class power pumps for your application

Available in one flow range for universal motor and eight flow ranges for induction motor. Choose from single or two-stage models to provide the optimum cylinder and tool performance for almost any industrial application.

ZA4T, ZU4T, ZE4T and ZE5T-Series are Torque Wrench Pumps.

Back-lit LCD on select Z-Class pumps

- pump usage information, hour and cycle counts
- low-voltage warning and recording
- offers self-test and diagnostic capabilities
- information displayed in 6 languages
- pressure read-out (when used with the optional pressure transducer)
- adjustable trigger pressure setting (when used with the optional pressure transducer).

Back-lit LCD available on ZU and ZE-Series Electric Pumps. ▶

ZU-Series Pump Applications

- **Mobile:** when frequent pump transport is required and/or on remote locations
- **Universal motor:** 1-phase, runs well under poor voltage supply, using generator power supply or using long extension cord
- **Duty-cycle:** for intermittent applications
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed
- **Pump speed:** two stage pump unit.

ZE-Series Pump Applications

- **Stationary:** when pump remains in one location
- **Induction motor:** 1 and 3-phase for high cycle usage
- **Duty-cycle:** for heavy-duty, extended cycle application
- **Cylinders and tools:** for medium to large size single and double-acting applications and high speed
- **Pump speed:** single or two stage pump unit.

▼ ZU4308ME (Classic), ZU4420SEH (Pro)

- High-efficiency two-speed pump design – higher oil flow and bypass pressure
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, moulded composite shroud protects motor and electronics, while providing an ergonomic, non-conductive handle for easy transport.

Pro-Series models only

- Back-lit LCD readout provides pressure display and a number of diagnostics and readout capabilities never offered on a portable pump before:
 - pump usage information, hour and cycle counts
 - self-test, diagnostic and read-out capabilities
 - pressure readout and auto-mode pressure settings.

◀ *Designed to be tough, the ZU4-Series with steel reservoirs will take the abuse of today's construction sites.*

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high by-pass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4-Series Pumps are built to power small to large-sized cylinders or hydraulic tools, or wherever high-speed, intermittent duty, remote hydraulic power is needed.

Classic Electric Pumps

- The Classic has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics.
- The Classic delivers durable, safe and efficient hydraulic power for demanding markets like construction, post-tensioning and foundation repair.

Standard Electric Pumps

- For applications that do not require digital display features of the Premium Pump. Available in all manual or jog versions.

Pro Electric Pumps

- Digital (LCD) display features a built-in hour meter and shows self-diagnostic, cycle-count and low voltage warning information.
- Pressure can also be displayed when the pump is equipped with an optional pressure transducer.

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

ZU4-Series, Specifications and Dimensions

▼ STEP 1: Select a pump from the Pump Ordering Matrix

The functionality of the pump can be determined by the model number. Utilize the guide below to select the best pump for the application from the pump ordering matrix.

Z	U	4	4	08	J	E	-	H	R
1 Product Type	2 Motor Type	3 Flow Group	4 Valve Type	5 Reservoir Capacity	6 Valve Operation	7 Voltage		8 Factory Installed Accessories	

1 Product Type

Z = Pump Series

2 Motor Type

U = Universal electric motor

3 Flow Group

4 = 1,0 l/min @ 700 bar

4 Valve Type

- 1** = Dump (**VE32D**)
- 2** = 3 way/2 position manual or electric (**VM32** or **VE32**)
- 3** = 3 way/3 position manual or electric (**VM33** or **VE33**)
- 4** = 4 way/3 position manual or electric (**VM43** or **VE43**)
- 6** = 3 way/3 position locking manual with pilot operated check valve (**VM33L**)
- 7** = 3 way/2 position manual (**VM22**)
- 8** = 4 way/3 position locking manual with pilot operated check valve (**VM43L**)
- 9** = 4 way/3 position manual w/power seating (**VM43LPS**)
- 10** = 3 way/3 position manual Venturi valve (**VM33VAC**)
- 11** = 3 way/3 position electric Venturi valve (**VE33VAC**)

5 Reservoir Capacity

- 04** = 4,6 litres
- 08** = 6,8 litres
- 20** = 19,8 litres
- 40** = 39,0 litres

6 Valve Operation

- D** = Dump solenoid valve with pendant and LCD Electric
- J** = Jog manual valve with pendant (without LCD)
- L** = Manual valve with LCD Electric (without pendant)
- M** = Manual valve (without pendant and LCD)
- P** = Manual valve with pendant (without LCD)
- S** = Solenoid valve with pendant and LCD Electric

7 Voltage

- B** = 115V, 1 ph, 50/60Hz
- E** = 208-240V, 1 ph, 50/60 Hz (with European plug and CE EMC compliant)
- I** = 208-240V, 1 ph, 50/60 Hz (with NEMA 6-15 plug)

▼ STEP 2: Factory Installed Accessories

Select factory installed accessories and add to the pump model number after the hyphen. The example above shows that a **Heat Exchanger (H)** and **Roll Cage (R)** have been added to the pump.

8 Factory installed accessories include the following:

- | | |
|---|--|
| F = Return Line Filter | N = Lifting Eyes (no reservoir handles) |
| G = Pressure Gauge ¹⁾ | R = Roll Cage |
| H = Heat Exchanger | T = Pressure Transducer |
| K = Skid Bar | U = Foot Switch |
| L = Level/Temperature Switch ²⁾ | |

¹⁾ + ²⁾: See the notes about Pressure Gauge and Level/Temperature Switch in right column.

Two Speed Pumps

Recommended for applications where cylinder plunger must advance rapidly to load contact, and applications where greater oil capacities are required, such as multiple cylinder hook-ups.

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 405

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

Page: 122

Spring Centred Valve Kits

VM and VC-Series manual 3-position valves can be easily converted into spring centred valves. With these retro-fit kits the handle will automatically move into the neutral valve position when released.

Page: 123

Pressure Gauge, Level/Temperature Switch

¹⁾ Pressure Gauge (**G**) not available on pump models with pressure transducer (**T**). The pressure transducer provides digital pressure read-out on LCD-display.

²⁾ Level/Temperature Switch (**L**) requires electric package. Not available on reservoirs 04 and 08.

¹⁾ S/A or D/A = For use with Single-Acting or Double-Acting cylinders and tools. ²⁾ Additional details can be found in the Directional Control Valve section

³⁾ "B" indicates pump is available in 115V, 1-phase, 50/60 Hz. Model number order example: **ZU4208MB**.

"I" indicates pump is available in 208-240V, 1-phase, 50/60 Hz with NEMA 6-15 plug. Model number order example: **ZU4208MI**.

⁴⁾ Classic Electric Pump has traditional electro-mechanical components (transformers, relays, switches) in place of solid-state electronics.

⁵⁾ Weights given for pump with manual valve. For Standard Electric with pendant add 0,5 kg and Classic Electric with pendant add 1,5 kg.

NOTE: Valve operation "L" available on pumps with manual valve. Substitute "M" for "L" valve operation. Example: **ZU4608LE**.

Roll Cage (R)

- Protects and stabilizes the pump.

Popular Pump Models with Factory Installed Roll Cage	
ZU4108DE-R (B, I)	ZU4308ME-R (B, I)
ZU4208JE-R (B, I)	ZU4320ME-R (B, I)
ZU4220JE-R (B, I)	ZU4408ME-R (B, I)
ZU4208SE-R (B, I)	ZU4420ME-R (B, I)
ZU4308JE-R (B, I)	ZU4408JE-R (B, I)
ZU4320JE-R (B, I)	ZU4420JE-R (B, I)
ZU4308SE-R (B, I)	ZU4408SE-R (B, I)
ZU4320SE-R (B, I)	ZU4420SE-R (B, I)

Accessory Kit Model Nr.	Fits on Reservoir
	
ZRC-04	4,6 and 6,8 litres ¹⁾
ZRC-04H	4,6 and 6,8 litres ²⁾
ZRB-20	19,8 litres
ZRB-40	39 litres

¹⁾ Without heat exchanger

²⁾ With heat exchanger

Foot Switch (U)

- 3 metres cord, hands-free control.

Popular Pump Models with Factory Installed Foot Switch	
ZU4108DE-U (B, I)	
ZU4208SE-U (B, I)	
ZU4220SE-U (B, I)	
ZU4320SE-U (B, I)	
ZU4408SE-U (B, I)	
ZU4420SE-U (B, I)	

Accessory Kit Model Nr.	Can be used on ZU4 Pumps with solenoid dump and 3-position valves, LCD electric
	
ZCF-2	Solenoid VE-Series valves

Heat Exchanger (H)

- Removes heat from bypass oil
- Increases oil life, reduces wear on hydraulic components.

Popular Pump Models with Factory Installed Heat Exchanger	
ZU4108DE-H (B, I)	
ZU4208SE-H (B, I)	
ZU4308SE-H (B, I)	
ZU4408SE-H (B, I)	
ZU4420SE-H (B, I)	

Accessory Kit Model Nr.	Can be used on
	
ZHE-U115	115 V pumps
ZHE-U230	230V pumps

Pressure Transducer (T)

- More durable than analog gauges
- Displays psi, bar or Mpa
- Motor shutoff or shift to neutral at set pressure.

Popular Pump Models with Factory Installed Pressure Transducer, Requires LCD Electric Pump	
ZU4108DE-T (B, I)	
ZU4208SE-T (B, I)	
ZU4308SE-T (B, I)	
ZU4408SE-T (B, I)	
ZU4420SE-T (B, I)	

Accessory Kit Model Nr.	Adjustable Pressure Range	Switch-Point Repeatability	Dead-band
	(bar)	(%)	(bar)
ZPT-U4	3,5 - 700	± 0,5	3,5

Note: The pressure transducer provides digital pressure read-out on LCD-display.

Level/Temperature Switch (L) ¹⁾

- Shuts off pump when high operating temperature or low oil is reached
- Plugs directly into pump electrical enclosure
- Easy installation to pump reservoir
- Requires LCD electric.

Return Line Filter (F)

- 25 micron filter removes contaminants from return oil flow
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25.

ZU4 Series

Reservoir Capacity:

4,6 - 39 litres

Flow at Rated Pressure:

1,0 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

700 bar

Accessory Kit Model Nr.	Operating Temperature (°C)	Maximum Pressure (bar)	 (kg)
ZLS-U4	5 - 110	10	0,1

¹⁾ Level/Temperature switch (L) not available on 4,6 or 6,8 litres reservoir.

Accessory Kit Model Nr.	Max. Pressure (bar)	Max. Oil Flow (l/min)	By-Pass Setting (bar)
ZPF	14	45	1,7

Heat Exchanger

Stabilizes oil temperature at a maximum of 54 °C at 21 °C ambient temperature.

Do not exceed maximum oil flow and pressure ratings. Heat exchanger is not suitable for water-glycol or water based fluids.

Thermal Transfer * (Btu/h)	Maximum Pressure (bar)	Maximum Oil Flow (l/min)	Voltage (VDC)
900	20,7	26,5	12

* At 1,9 l/min at 21 °C ambient temperature.

Skidbar (K)

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces
- Cannot be used in combination with roll cage.

Pressure Gauge (G)

- Minimize risk of overloading to ensure long life of equipment
- ø 63 mm face diameter, glycerin filled
- Dual scale in bar and psi.

Hoses

Enerpac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

Accessory Kit Model Nr.	Fits on Reservoir	 (kg)
SBZ-4	4,6 and 6,8 litres ²⁾	2,2
SBZ-4L	4,6 and 6,8 litres ³⁾	3,2

²⁾ Without heat exchanger

³⁾ With heat exchanger

Accessory Kit Model Nr.	Description
G2536L	0 - 1000 bar, 0 - 15.000 psi

Note: Pressure Gauge not available on pump models with pressure transducer. The pressure transducer provides digital pressure read-out on LCD-display.

▼ Shown from left to right: ZE3304ME-K, ZE4110DE-FHR

- High-efficiency pump design – higher oil flow and by-pass pressure
- High-strength, moulded electrical box protects electronics, power supplies and LCD readout and stands up to harsh industrial environments
- IP54 protection and isolation class
- Back-lit LCD provides self test, diagnostic and read-out capabilities never before offered on an industrial pump (included on pump with electric valves, optional on other models)
- Totally enclosed, fan-cooled industrial electric motors for extended life
- User adjustable relief valve built-in on manual and solenoid valves. Oil ports on valves are 3/8" NPTF
- Steel fan guard on all electric motors
- Full sight oil level glass on 9,8, 19,8 and 39 litres reservoirs, oil level indicators on 4,6 and 6,8 litres reservoirs.
- 40 micron filter breather with splash guard
- Durable steel reservoirs.

◀ Rail wheel pulling using RACH aluminium cylinder powered by ZE-Series pump.

ZE Series

Reservoir Capacity:

4,6 - 39 litres

Flow at Rated Pressure:

0,55 - 2,73 l/min

Motor Size:

0,75 - 5,60 kW

Maximum Operating Pressure:

700 bar

Z Tough
Dependable
Innovative
CLASS

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 405

Locking Valves

For applications requiring positive load holding, VM-Series valves (except VM32) are available with a pilot-operated check valve

VM33L and VM43L. This provides hydraulic locking of the load until the valve is shifted into the retract position.

Assisted Return Pumps

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder retraction

speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders. See valve type in ordering matrix and details in section Directional Control Valves.

Page: 122

ZE-Series, Specifications & Dimensions

▼ ZE-SERIES PERFORMANCE CHART

Pump Series	Output Flow Rate at 50 Hz * (l/min)				Pump Unit	Available Reservoir Sizes (litres)	Motor Size (kW)	Relief Valve Adjustment Range (bar)	Sound Level (dBA)
	low pressure		high pressure						
	at 7 bar	at 50 bar	at 350 bar	at 700 bar					
ZE3	0,59	0,59	0,57	0,55	Single-stage	4,6 - 6,8 - 9,8	0,75	70-700	75
	6,15	5,26	0,57	0,55	Two-stage	19,8 - 39			
ZE4	0,87	0,87	0,84	0,82	Single-stage	4,6 - 6,8 - 9,8	1,12	70-700	75
	8,88	8,20	0,84	0,82	Two-stage	19,8 - 39			
ZE5	1,75	1,72	1,68	1,64	Single-stage	9,8 - 19,8 - 39	2,24	70-700	75
	11,61	11,27	1,68	1,64	Two-stage				
ZE6	3,00	2,94	2,86	2,73	Single-stage	9,8 - 19,8 - 39	5,60	70-700	80
	12,29	12,15	2,86	2,73	Two-stage				

* Oil flow will be approximately 6/5 of these values at 60 Hz.

Single or Two-Stage

Choose single-stage pumps for applications that require constant flow regardless of pressure such as testing or clamping. Two-stage pumps have an increased output flow at low pressure to allow fast movement towards the load, for reduced cycle times and increased productivity.

ZE-Series Pumps with 4,6 - 6,8 litres reservoir

ZE-Series Pumps with 9,8 - 19,8 - 39 litres reservoir

- ① User adjustable relief valve on all manual and solenoid valves. 3/8" NPTF on A and B ports; 1/4" NPTF on auxiliary ports.
- ② Electric Box
- ③ Heat Exchanger
- ④ Roll Cage
- ⑤ Return Line Filter
- ⑥ Skid Bar
- ⑦ Magnetic Oil Drain
- ⑧ Oil Drain / Oil Level & Temperature Switch

Reservoir Size (litres)	ZE-Series Pump Dimensions (mm)						
	A	B	C	D	E	E1	H
4,6	457	143	279	152	-	-	513
6,8	457	143	279	206	-	-	513
9,8	533	158	419	305	384	371	600
19,8	558	180	419	422	501	488	625
39	648	270	399	505	576	572	715

▼ STEP 1: Select a pump from the Pump Ordering Matrix

The functionality of the pump can be determined by the model number. Utilize the guide below to select the best pump for the application from the pump ordering matrix.

Z	E	4	4	20	M	E	-	F	H
1	2	3	4	5	6	7		8	
Product Type	Motor Type	Flow Group	Valve Type	Reservoir Capacity	Valve Operation	Voltage		Factory Installed Accessories	

1 Product Type

Z = Pump Class

2 Prime Mover

E = Induction electric motor

3 Flow Group

3 = 0,55 l/min @ 700 bar

4 = 0,82 l/min @ 700 bar

5¹⁾ = 1,64 l/min @ 700 bar

6¹⁾ = 2,73 l/min @ 700 bar

4 Valve Type

0 = No valve, with cover plate

1 = 3/2 Dump valve **VE32D**

2 = 3/2 manual **VM32**

3 = 3/3 manual **VM33** or electric **VE33**

4 = 4/3 manual **VM43** or electric **VE43**

6 = 3/3 manual locking valve **VM33L** with pilot operated check

8 = 4/3 manual locking valve **VM43L** with pilot operated check

10⁶⁾ = 3 way/3 position manual **Venturi** valve **VM33VAC**

11⁶⁾ = 3 way/3 position electric **Venturi** valve **VE33VAC**

5 Reservoir Capacity

04 = 4,6 litres (not available on ZE5, ZE6)

08 = 6,8 litres (not available on ZE5, ZE6)

10 = 9,8 litres

20 = 19,8 litres

40 = 39,0 litres

6 Valve Operation

D = Dump solenoid valve with pendant and LCD

L = Manual valve with LCD Electric (without pendant)

M = Manual valve, without pendant or LCD

N = No valve, no electric box

S = Solenoid valve, with pendant and LCD

7 Motor Voltage

Single phase motor (not on ZE5, ZE6)

B¹⁾ = 115V, 1 ph, 50-60 Hz

E = 208-240V, 1 ph, 50-60 Hz with European SCHUKO Plug

I = 208-240V, 1 ph, 50-60 Hz with USA Nema 6-15 plug

Three phase motor³⁾

G = 208-240V, 3 ph, 50-60 Hz

J = 460-480V, 3 ph, 50-60 Hz

W = 380-415V, 3 ph, 50-60 Hz

▼ STEP 2: Factory Installed Accessories

Select factory installed accessories and add to the pump model number after the hyphen. The example above shows that a **Return Line Filter (F)** and **Heat Exchanger (H)** have been added to the pump.

8 Factory installed accessories include the following:

F = Return Line Filter

G = Pressure Gauge⁴⁾

H = Heat exchanger²⁾

K = Skid Bar

L = Level/Temperature switch²⁾

N = Lifting Eyes (no reservoir handles)⁷⁾

P = Pressure Switch²⁾

R = Roll Cage

S = Single stage pump unit⁵⁾

T = Pressure transducer²⁾⁴⁾

U = Foot switch²⁾

¹⁾ 115-volt pumps are supplied with 15-Amp plug for intermittent use. 20-Amp circuit recommended for frequent full pressure use.

²⁾ These accessories (H, L, P and T) require LCD electrical package. Level/Temperature switch (L) not available on 4,6 or 6,8 litres reservoir. Pressure switch option (P) only available on manual valves without locking valve. The LCD electrical package can accept either a pressure switch or pressure transducer, but not both.

³⁾ Pump with 3-ph motors without Electric Box shipped without cord, motor starter or overload protection.

⁴⁾ Pressure gauge (G) not available on pump models with pressure transducer. Pressure transducer provides digital pressure readout on LCD display.

⁵⁾ Not available on pumps with Venturi Valve Type 10 or 11.

⁶⁾ Not available on ZE3-Series pumps.

⁷⁾ Lifting eyes (N) not available on reservoir capacities 04 or 08.

▼ ZE-SERIES PUMP MODELS

No Valve, with coverplate, no electric box	
Manual Valve without Electric Box or LCD	<ul style="list-style-type: none"> • Ideal choice for most applications • Manual valve control, for both single-acting or double-acting applications • Venturi Valve Technology (VM33VAC) for faster retract of single-acting cylinders • Manual motor control • On/off switch on 1-phase electric motor.
Solenoid Dump Valve, Electric Box and LCD	<ul style="list-style-type: none"> • Ideal for punching, crimping and cutting • For use when load holding is not required • Push-button control pendant with 3 m. cord controls the valve and motor.
Solenoid 3-position Valve with Electric Box	<ul style="list-style-type: none"> • Ideal for production and lifting applications • All valves are 3-position for Advance-Hold-Retract • Venturi Valve Technology (VE33VAC) for faster retract of single-acting cylinders • Push-button control pendant with 3 m. cord controls the valve and motor.

¹⁾ S/A or D/A = For use with Single-Acting or Double-Acting cylinders and tools. ²⁾ Additional details can be found in the Directional Control Valve section.

³⁾ "E" suffix model numbers shown are 230 VAC, 1-phase, 50/60 Hz. "W" suffix model numbers shown are 400 VAC, 3-phase, 50/60 Hz. Other voltages available as shown.

Replace "E" voltage suffix with selected voltage character. Model number order example: **ZE4108DB** is 115VAC, 1 phase, 50/60 Hz. See Ordering Guide page 106 for voltage descriptions.

NOTE: Voltage options K (440 VAC, 3-phase, 50/60 Hz) and R (575 VAC, 3-phase, 60 Hz) are available on select models. Contact your local representative for availability.

NOTE: Valve operation "L" available on pumps with manual valve. Substitute "M" for "L" valve operation. Example: **ZE3608LE**.

Electric Box ¹⁾

- Back-lit LCD
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Pressure read-out ²⁾
- Auto-mode pressure setting ²⁾
- Information can be displayed in six languages ³⁾

¹⁾ Included on pumps with solenoid valves.

²⁾ When used with optional pressure transducer.

³⁾ English, French, German, Italian, Spanish and Portuguese.

Level & Temperature Switch (L) ⁴⁾

- Shuts down pump before oil level reaches an unsafe level, avoiding damage due to cavitation
- Shuts down pump when unsafe oil temperature is reached
- Ideal if pump is used in remote area without visual access to oil level.

⁴⁾ 24 V, requires Electric Box. Available for 9,8; 19,8 and 39 litres reservoirs.

Return Line Filter (F)

- 25 micron nominal filter removes contaminants from return oil flow before allowing it back into tank
- Internal by-pass valve prevents damage if filter is dirty
- With maintenance indicator
- Replaceable filter element PF25.

Accessory Kit Modelnr.	Fixed Temperature Signal (°C)	Operating Temperature (°C)	Max. Pressure (bar)
ZLS-U4	80	5 - 110	10

Accessory Kit Modelnr.	Maximum Pressure (bar)	Maximum Oil Flow (l/min)	By-pass Setting (bar)
ZPF	13,8	45,4	1,7

Roll Cage (R)

- For easy portability and hoisting
- Protects pump and electric box
- Available for all reservoir sizes.

Skid Bar (K)

- Provides easy two-hand lift
- Provides greater pump stability on soft or uneven surfaces.

Foot Switch (U) ⁷⁾

- Hands-free remote control on solenoid dump and 3-position valves
- With 3 meters cord.

⁷⁾ 15 V, requires Electric Box.

Accessory Kit Nr.	Fits on reservoir size:	(kg)
ZRC-04	4,6 and 6,8 litres ⁵⁾	5,5
ZRC-04H	4,6 and 6,8 litres ⁶⁾	6,5
ZRB-10	9,8 litres	6,0
ZRB-20	19,8 litres	6,0
ZRB-40	39 litres	6,0

⁵⁾ For pump without heat exchanger

⁶⁾ For pump with heat exchanger.

Accessory Kit Nr.	Fits on reservoir size:	(kg)
SBZ-4	4,6 and 6,8 litres ⁵⁾	2,2
SBZ-4L	4,6 and 6,8 litres ⁶⁾	3,2

⁵⁾ For pump without heat exchanger

⁶⁾ For pump with heat exchanger.

Accessory Kit Nr.	Can be used on ZE-Series pumps with
ZCF-2	Solenoid VE-Series valves

Pressure Transducer (T) ¹⁾

- Displays pressure on LCD in bar, MPa or psi
- More accurate than analog gauge
- Calibration can be fine-tuned for certification
- Easy-viewing variable rate display
- "Set pressure" feature turns off motor at user defined pressure.

¹⁾ 24 V, requires Electric Box.

Pressure Switch (P) ²⁾

- Controls pump, monitors system
- Adjustable pressure 35-700 bar
- Includes glycerine filled 1000 bar pressure gauge G2536L
- Accuracy $\pm 1,5\%$ of full scale.

²⁾ 24 V, requires Electric Box. Not available in combination with pressure transducer. Not available on LCD-electronics.

Accessory Kit Modelnr.	Adjustable Pressure Range (bar)	Switch-point repeatability	Dead-band (bar)
ZPT-U4	3,5 - 700	$\pm 0,5\%$	3,5

Accessory Kit Modelnr.	Switch-point repeatability	Deadband (bar)	Oil Ports (NPTF)
ZPS-E3	$\pm 2\%$	8 - 38	3/8"

Heat Exchanger (H) ³⁾

- Removes heat from by-pass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

³⁾ 24 VDC, requires electric box.

Pressure Gauge (G)

- Minimize risk of overloading to ensure long life of equipment
- \varnothing 63 mm face diameter, glycerin filled
- Dual scale in bar and psi.

Note: Pressure Gauge not available on pump models with pressure transducer. The pressure transducer provides digital pressure read-out on LCD-display.

Accessory Kit Nr.	Fits on reservoir size:	(kg)
ZHE-E04	4,6 and 6,8 litres	4,1
ZHE-E10	9,8; 19,8 and 39 litres	4,1

Accessory Kit Model Nr.	Description
G2536L	0 - 1000 bar, 0 - 15.000 psi

ZE Series

Reservoir Capacity:

4,6 - 39 litres

Flow at Rated Pressure:

0,55 - 2,73 l/min

Motor Size:

0,75 - 5,60 kW

Maximum Operating Pressure:

700 bar

ZPT-U4 Pressure Transducer

More durable against mechanical and hydraulic shock than analog gauges.

- Digital pressure read-out provides accuracy of 0,5% of full scale.
- Easy-viewing variable rate display automatically varies increments between 3, 14, 35 and 145 bar as rate of pressure change increases.
- "Set pressure" feature turns off motor at user defined pressure (or shifts valve to neutral on VE33 and VE43 valves).

ZHE-Series Heat Exchangers

Heat exchanger stabilizes oil temperature at 54 °C at 21 °C ambient temperature. Thermal transfer at

1,9 l/min and 21 °C ambient temperature: 900 Btu/hour [950 kJ].

Do not exceed max. oil flow of 26,5 l/min and max. pressure of 20,7 bar. Not suitable for water-glycol or high water based fluids.

PA-Series, Air Hydraulic Foot Pumps

ENERPAC 

▼ Shown: PA1150, PA133

PA Series

Reservoir Capacity:
0,6 - 1,3 litres

Flow at Rated Pressure:
0,13 l/min

Air Consumption:
255 l/min

Maximum Operating Pressure:
700 bar

Reservoir Conversion Kit

Double the reservoir capacity of your existing PA133 with this easy to install conversion kit.

Model Number

PC66

- Rugged construction – built for long life and easy service
- Swivel coupling simplifies hydraulic connection and pump operation
- Three-position treadle provides cylinder advance, hold or retract operation
- Operates in all positions for increased versatility in use and mounting (except PA1150)
- Base mounting slots provided on PA133.

OIL FLOW VERSUS PRESSURE

at 6,9 bar air pressure

Used with Cylinder	Usable Oil Capacity (cm ³)	Model Number	Pressure Rating (bar)	Output Flow Rate (l/min)		Valve Function	Air Pressure Range * (bar)	Air Consumption (l/min)	Sound Level (dBA)	Weight (kg)
				No load	Load					
Single-Acting	589	PA133	700	0,65	0,13	Advance / Hold / Retract	4,1 - 8,3	255	85	5,4
	1311	PA1150	700	0,65	0,13	Advance / Hold / Retract	4,1 - 8,3	255	85	8,2

* Recommended Regulator-Filter-Lubricator: **RFL102**.

PAM-Series, Air Hydraulic Pumps

▼ Shown: PAM1041

PAM Series

Reservoir Capacity:

4,0 - 8,0 litres

Flow at Rated Pressure:

0,15 l/min

Air Consumption:

510 l/min

Maximum Operating Pressure:

700 bar

Locking Valves

Pumps with 4/3 manual valves are available with 4/3 manual locking valves **VM4L** instead. Add suffix "L" to pump model number. Example: **PAM1042L**.

Page: **122**

- Twin air motor configuration delivers high-flow performance in first stage, up to 14 bar, for rapid cylinder advance
- 4 and 8 litres reservoirs for use with a wide range of cylinders
- Integral shroud protects air motors and provides easy portability.

Remote Air Valve

For remote operation of PAM-Series air pumps. Permits either hand or foot operation.

Model Number

VA2

OIL FLOW VERSUS PRESSURE

* Recommended Regulator-Filter-Lubricator: **RFL102**.

▼ Shown from top to bottom: PAMG1402N, PARG1102N, PATG1102N, PATG1105N

- External adjustable pressure relief valve (behind sight glass)
- Return-to-tank port for use in remote valve applications
- Internal pressure relief valve provides overload protection
- Quieter operation – reduced noise level to 76 dBA
- Operating air pressure: 2,8 - 8,8 bar, enables pump to start at extremely low pressure
- High efficiency cast aluminium air motor
- Reinforced heavy-duty lightweight reservoir for applications in tough environments
- Air pendant for remote control operation.

Compact Air Over Hydraulic

Regulator-Filter-Lubricator

Recommended for use with all Turbo air pumps. Provides clean, lubricated air and allows for air pressure adjustment. Steel bowl guards are standard.

Model Number

RFL102

Large Reservoir Models

The Turbo II Air Pump is also available with an enlarged reservoir: **PATG1105N**, **PAMG1405N** and **PARG1105N**.

Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: **128**

	3770	PAMG1405N

PA-Series, Turbo II Air Hydraulic Pumps

PATG-models use a foot or hand operated treadle to control air and valve functions.

PAMG-models use a treadle with a locking feature to control air, and a 4-way manual valve to control hydraulics.

PARG-models use air pendant for remote control.

PATG PAMG PARG Series

Reservoir Capacity:
2,5 - 5,0 litres

▼ Shown: **XA11G**

- Ergonomic design for less operator fatigue
- Variable oil flow & fine metering for precise control
- Higher oil flow for increased productivity
- Closed hydraulic system prevents contamination and allows pump usage in any position
- Pedal lock function for retract position
- External adjustable pressure setting valve
- Ground screw for improved ATEX explosion safety.

▼ *Easy operated by foot. No need to fully lift up foot – rest bodyweight on heel, resulting in a handsfree and stabile working position.*

Productivity & Ergonomics

Optional Pressure Gauge

Integrated gauge with calibrated scale reading in bar, psi and MPa for actual pressure reading.

4/3 Control Valve

For powering double-acting hydraulic cylinders and tools.

2 Litres Reservoir

Double oil capacity for powering larger hydraulic cylinders and tools.

“Joy-stick” Lever Kit

Customer installed set of handles for manual operation of both pedals.

Model Number¹⁾

XLK1

Swivel Connector

Customer installed swivel connector for optimal orientation of the hydraulic hose. See page 133 for details.

Model Number¹⁾

XSC1

¹⁾ Accessories must be ordered separately.

Air Driven Hydraulic Foot Pumps

Production Application

XA11 pump is used with a 13 tons hollow cylinder to compress and position diesel engine valve springs.

The operator benefits from the fine metering capacities of this pump to apply the mandatory precise stroke and force.

XA Series

Reservoir Capacity:

1,0 - 2,0 litres

Flow at Rated Pressure:

0,25 l/min

Air Consumption:

283 - 991 l/min

Maximum Operating Pressure:

700 bar

▼ XA-SERIES PERFORMANCE CHART

Z Tough Dependable Innovative CLASS

ATEX 95 Certified

The Enerpac ZA4-series air pumps are tested and certified according to the **Equipment Directive 94 / 9 / EC** "ATEX Directive" for equipment and protective systems intended for use in potentially explosive atmospheres.

II 2 GD ck T4
DEKRA 0602

Page: 395

- ATEX 95 certified for use in potentially explosive atmospheres
- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation reduces cycle time for improved productivity
- User adjustable relief valve built-in on manual valves. Oil ports on valves are 3/8" NPTF
- Optional heat exchanger warms exhaust air to prevent freezing and cools the oil
- Full sight oil level glass on 9,8, 19,8 and 39 litres reservoirs, oil level indicators on 4,6 and 6,8 litres reservoirs.

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

²⁾ Actual oil flow will vary with air supply.

³⁾ Dynamic air pressure range: 4 - 7 bar.

Modulair Air Hydraulic Pumps

▼ This is how a ZA4-Series pump model number is built up:

1 Product Type

Z = Pump Class

2 Prime Mover

A = Air motor

3 Flow Group

4 = 1,3 l/min @ 700 bar

4 Valve Type

- 0** = No valve, with cover plate
- 2** = 3/2 manual valve **VM32**
- 3** = 3/3 manual valve **VM33**
- 4** = 4/3 manual valve **VM43**
- 6** = 3/3 manual locking valve **VM33L** with pilot operated check
- 7** = 3/2 manual valve **VM22**
- 8** = 4/3 manual locking valve **VM43L** with pilot operated check.

5 Reservoir Size

- 04** = 4,6 litres
- 08** = 6,8 litres
- 10** = 9,8 litres
- 20** = 19,8 litres
- 40** = 39 litres

6 Valve Operation

- M** = Manual valve
- N** = No valve

7 Motor Voltage

- X** = Not applicable

8 Options

- F** = Return Line Filter
- G** = 1000 bar gauge
- H** = Heat exchanger (on 4,6 and 6,8 litres reservoir only)
- K** = Skid Bar (on 4,6 and 6,8 litres reservoir only)
- N** = No reservoir handles (includes lifting eyes on 9,8, 19,8 and 39 litres)
- R** = Roll Cage

Ordering Example

Model Number: **ZA4208MX-FHK**

ZA4208MX-FHK is an air operated pump with a 3-way, 2-position manual valve, 6,8 litres reservoir, filter, heat exchanger and skid bar.

ZA4 Series

Reservoir Capacity:

4,6 - 39 litres

Flow at Rated Pressure:

1,3 l/min

Air Consumption:

2840 l/min

Maximum Operating Pressure:

700 bar

- ① User adjustable relief valve on all manual valves. 3/8" NPTF on A and B ports; 1/4" NPTF on auxiliary ports.
- ② Air inlet 1/2" NPTF
- ③ Return Line Filter (optional)
- ④ Oil Sight Gauge
- ⑤ Roll Cage (optional)
- ⑥ Oil Drain
- ⑦ Lifting eyes (optional)
- ⑧ Handles
- ⑨ Skid Bar (Modelnr. SBZ4) (optional)

Z Tough,
Dependable,
Innovative
CLASS

- Features Z-Class high efficiency pump design, higher oil flow and bypass pressure
- Two-speed operation reduces cycle time for improved productivity
- User adjustable relief valve built-in on manual valves. Oil ports on valves are 3/8" NPTF
- Available in three 4-cycle engine sizes: 4,1 kW Honda and 4,8 kW and 9,7 kW Briggs & Stratton
- Full sight oil level glass on all reservoirs allow quick and easy oil level monitoring.

ZG6-Series

- Easy serviceable 9,7 kW, 4-cycle gasoline engine with electric start, pressurized oil and 12 Volt charge output for accessories
- Dual forced air heat exchanger stabilizes hydraulic oil temperature
- Sturdy wheeled cart with collapsible handles.

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 142

User Adjustable Relief Valve

All VM-Series directional valves have a user adjustable relief valve to allow the operator to easily set the optimum working pressure.

Page: 122

ZG Series

Reservoir Capacity:

9,8 - 19,8 - 39 litres

Flow at Rated Pressure:

1,6 - 3,3 l/min

Engine Size:

4,1 - 4,8 - 9,7 kW

Maximum Operating Pressure:

700 bar

High Pressure Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Page: 128

Speed Chart

To determine how a specific pump will operate your cylinder, see the Pump-Cylinder Speed Chart in the 'Yellow Pages'.

Page: 405

Enerpac offers a wide variety of hydraulic pumps for all your custom needs. Still, many applications require a customized pump to operate the system.

Hydraulic pumps are at the heart of any hydraulic system. Different systems require different flow, pressure and control.

Enerpac offers a wide variety of hydraulic pumps from small hand-operated pumps to large gasoline-powered pumps.

Still, many applications require a customized pump to operate the system. These may include larger reservoir capacity, custom valve configurations or added electrical controls. Enerpac also specializes in power units and controls used for synchronous lifting/lowering of multiple jacking points.

◀ Private-label hand or foot pumps with fire-resistant oil and special exterior paint.

◀ XC-Series Cordless Pump with custom black shroud for private-label OEM customer to be used with a variety of hand held hydraulic tools.

◀ Electric pump with large cooler and controls for high-temperature applications.

Overview Custom Pumps

▲ Custom hydraulic pumps for a bridge deck launching system.

CUSTOMIZABLE FEATURES:

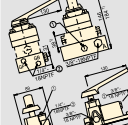

- Reservoir and Frame
- Valves
- Controls
- Oil
- Seals
- Pressure and Flow
- Coolers and Heaters
- Paint
- Motor Type

Directional Control Valves

Energac hydraulic valves are available in a wide variety of models and configurations.

Whatever your requirements... directional control, flow control, or pressure control... you can be sure that Energac has the correct valve to match your application exactly.

Designed and manufactured for safe operation up to 700 bar, the range of Energac valves allows for direct pump mounting, remote mounting, manual or solenoid actuation, and in-line installation, giving you flexible solutions to control your hydraulic system.

Page: 395

▼ Shown from left to right: VM32, VE33, VM33, VM43L, VE43

- Advance/Retract and Advance/Hold/Retract operation of single- and double-acting cylinders and tools
- Manual or solenoid operation
- Pump mounting will retrofit on most Enerpac pumps
- Available “locking” option on VM-Series valves for load-holding applications
- Standard “locking” feature on VE-Series 3-position valves
- User adjustable relief valve allows the operator to easily set the working pressure.

Venturi Valve Technology

- For fast return of single-acting gravity and spring return cylinders
- Available as manual or solenoid valve on ZU4- and ZE-Series electric pumps
- Retrofit Venturi valve kits for field installation on existing ZU4- and ZE-Series electric pumps.

Adjustable relief valve

All valves feature several gauge ports for “system”, A port and B port pressure monitoring. User adjustable relief valves are included on all models to allow the operator to easily set the optimum working pressure for each application.

VM33 and VE43 valves include “System Check” feature, for more precise pressure holding and improved system control.

The VM33 has improved porting which provides faster cylinder retraction while motor is running.

Locking Valves

For applications that require positive load holding, VM-Series valves (except VM22 and VM32) are available with a pilot-operated check valve. This option provides hydraulic locking of the load until the valve is shifted into the retract position.

Assisted Return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to

accelerate your cylinder retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting gravity and spring return cylinders.

See valve type in ZU4 and ZE-pump ordering matrix on pages 100 and 106.

Venturi Valve Retrofit Kits

For field installation on existing ZU4, ZE and ZA-Series pumps, Retrofit Kits are available for manual and solenoid operated valves.

For valve model	For valve operation	Retrofit Kit Model Nr.

Valving Help

See Basic System Set-Up and Valve Information in our 'Yellow Pages'.

Page: 406

Enerpac System Components:

All the additional elements you need to complete your high pressure hydraulic system and get started.

Engineered to work with your Enerpac cylinders, pumps and tools, all Enerpac components are designed to the most exacting standards.

With this complete line of hydraulic hoses, couplers, fittings, manifolds, oil and gauges, Enerpac has the accessories to complement your system and ensure the efficient operation, long life and safety of your hydraulic equipment.

Yellow Pages

For sample system set-ups and how to correctly specify your system components, please view the Enerpac "Yellow Pages" section in this catalogue.

Page: 394

Maintain System Integrity

Use Enerpac System Components, designed to interface with Enerpac cylinders, pumps and tools to ensure your system operates at peak performance.

Thermo-Plastic Safety Hoses (H700-Series)

- For demanding applications, featuring a 4:1 safety factor
- Maximum working pressure of 700 bar
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Exhibits low volumetric expansion under pressure to enhance overall system efficiency
- Vinyl strain relief guard on both ends of hose to improve life and durability on all models.

▼ To prevent back pressure and to increase cylinder retraction speed, when using long hoses with single-acting cylinders, the Enerpac HC7300-Series of hoses with increased internal diameter is the best choice.

Safety and Quality

To ensure the integrity of your system, specify only Enerpac hydraulic hoses.

WARNING !

- Do not exceed 700 bar maximum pressure.
- Do not handle hoses which are under pressure.

More safety instructions in our 'Yellow pages'.

Hose Oil Capacity

When using greater hose lengths, it is sometimes necessary to fill the pump reservoir after filling the hoses.

To determine the hose oil capacity, use the following:

For 6,4 mm inside diameter hoses:

Capacity (cm³) = 32,1699 x Length (m)

For 9,7 mm inside diameter hoses:

Capacity (cm³) = 73,8981 x Length (m)

H700 Series

Inside Diameter:

6,4 - 9,7 mm

Length:

0,6 - 15 m

Maximum Operating Pressure:

700 bar

3/8" High Flow Couplers

- Standard equipment on most Enerpac cylinders
- Recommended for use on all Enerpac pumps and cylinders where space and porting permits
- Includes "2-in-1" dust cap for use on male and female couplers.

3/8" High Pressure 'Flush-face' Couplers

- Featuring "Push-to-connect" operation, to guarantee good connection every time
- Flush-face, zero-leak operation for minimal spillage and reduced pressure drop
- HTMA * recognized for safety and performance
- Will not interchange with low pressure couplers.

3/8" Regular Spee-D-Couplers®

- For medium duty applications with hand pumps
- Includes female aluminium dust cap.

1/4" Regular Couplers

- For use with small cylinders and hand pumps
- Includes female aluminium dust cap.

1/4" Spin-on Torque Wrench Couplers

- For use with 700 bar S, W, RSL, DSX and HMT-Series torque wrenches, THQ-Series hoses and 700 bar torque wrench pumps.

* Hydraulic Tool Manufacturers Association.

Quick Connection of Hydraulic Lines

Thread sealer

To seal NPTF threads use one of the new anaerobic thread sealers or Teflon paste. When using Teflon Tape, apply the tape one thread from the end of a fitting to prevent it from winding up in the hydraulic system.

WARNING!

Couplers should be pressurized only when completely connected and should not be coupled or uncoupled when pressurized.

More safety instructions in our 'Yellow Pages'.

Page: 396

F-Series

Flush-faced couplers provide reduced pressure drop versus other types and are preferred in dirty, grimy construction and mining environments due to easy clean, non-dirt trapping faces.

▼ With the use of Enerpac high flow couplers, hoses are easily installed for multiple hydraulic line connections in this 34 points PLC-controlled lifting system.

Hydraulic Couplers

CT604 Safety Tool

Use the Enerpac CT604 to relieve hydraulic back pressure by safely bleeding the hydraulic coupler.

NOTE: For use on CR400 and CH604 700 bar High-Flow Couplers only

Minimize injuries from projectile parts and under-skin hydraulic fluid injections by eliminating unsafe coupler bleeding practices. The CT604 is Enerpac-engineering safe for use at 700 bar.

▼ Shown from left to right: SFM41, SFM42 Split-Flow Manifolds

- Split-Flow Manifolds improve safety, precision and control in lifting and lowering operations
- Pressure gauge, flow control valve in each outlet port; CR400 couplers installed in each inlet and outlet port
- Regulates both advance and retract speeds: lifting and lowering
- 1 inlet, 4 outlets. Maximum of 4 cylinders per manifold: SFM41 for single-acting cylinders, SFM42 for double-acting cylinders
- Minimum pump oil flow: 1,40 l/min to deliver 0,15 - 0,25 l/min per cylinder
- Maximum difference among outlets: 10% of the stroke (in 150 mm)
- More cylinders can be controlled simultaneously by connecting several SFM-models parallel.

Improved safety on basic simultaneous lifting applications

Pressure Gauges G2535L

Glycerine filled pressure gauges are installed in each outlet pressure line to monitor the pressure of each cylinder.

Optimum Performance

Minimum pump oil flow must be 1,40 l/min to deliver 0,15 - 0,25 l/min per cylinder. Enerpac recommends to use Z-Class

electric or gasoline pumps from the ZE5 and ZG-Series.

SFP-Series, Split-Flow Pumps

When a higher accuracy is required across cylinder strokes in a multi-point lifting or lowering application Enerpac recommends

to use the SFP-Series Split-Flow Pumps.

◀ To repair the foundation, silos needed to be lifted, levelled and structurally supported. Powered by a ZE5-Series electric pump the split-flow manifold used to operate multiple hydraulic cylinders.

Split-Flow Manifolds

The SFM-Series offer an economical solution for basic multi-point simultaneous lifting applications and enables a single operator to control a maximum of 4 lifting points from one manifold.

The Split-Flow Manifolds are equipped with pressure compensated flow control valves, to preset and limit advance and retract speed of each cylinder, allowing to move up to 4 cylinders simultaneously.

The SFM-Series provide more lifting and lowering control compared to AM-Series Control Manifolds. See flow control valve adjustments table below.

Minimum pump oil flow must be 1,40 l/min (ZE5-Series pumps) to deliver 0,15 - 0,25 l/min per cylinder. Several SFM-models can be connected parallel to the same pump to allow simultaneous operation of 8, 12 or 16 cylinders.

Higher flow pumps are required to achieve faster advance speeds. A 20% higher oil flow must be considered for a proper speed compensation.

Example : when using 4 cylinders: if oil flow of 0,45 l/min is required per cylinder, the pump oil flow must be:
 $4 \times 0,45 = 1,8 \text{ l/min} + 20\% = 2,16 \text{ l/min}$.

The maximum stroke deviation between the cylinders can reach up to 10% (in 150 mm) depending on the cylinder pressure. Oil flow adjustment is also possible during cylinder operation by fine tuning using the flow control valves.

All cylinders connected to the SFM-manifold must have the same capacity (effective area). Both advance and retract speed are limited by the same valves. Use hoses of the same lengths to improve the accuracy of the hydraulic system. Improved precision when difference of pressures among the cylinders is within 200 bar.

SFM Series

Inlet Connection:

1x power pump

Outlet Connections:

Max. 4 cylinders

Minimum Pump Flow Required:

1,40 l/min

Maximum Operating Pressure:

700 bar

Load Holding

Use **V66 check valves** for load holding applications with single-acting cylinders.

SFM42

▼ SPLIT-FLOW MANIFOLDS

For use with cylinders	Model Number	Minimum oil flow to each cylinder (l/min)	Female couplers included	Dimensions L x W x H (mm)	(kg)
4x single-acting	SFM41	0,15	CR400	370 x 335 x 375	24
4x double-acting	SFM42	0,15	CR400	370 x 335 x 375	30

Hoses

Energac offers a complete line of high-quality hydraulic hoses. To ensure the integrity of your system, specify only Energac hydraulic hoses. Energac recommends to use hoses of the same lengths between the SFM and cylinders to improve system accuracy.

Flow Control Valves

The Split-Flow Manifold has pressure compensated flow control valves installed in each outlet line. The oil flow from the SFM-Manifold to each cylinder can be adjusted by turning the knob on the valve.

Flow Control Valve Adjustments

Number of Knob Turns	Oil Flow (l/min)	Number of Knob Turns	Oil Flow (l/min)
1/2	0,15	3	1,9
1	0,45	3 1/2	3,6
1 1/2	0,75	4	5,6
2	0,90	4 1/2	8,3
2 1/2	1,3	Open	10,3

Hydraulic Force & Pressure Gauges

Maximum Indicator Pointer

Indicator retains peak readings of pressure or force generated by the system.

Can easily be installed on GP and H-Series gauges. Order model nr: **BSA881**.

Pressure Gauges

To measure the input pressure into cylinders or high pressure systems. Also for all testing applications.

Force Gauges

To measure external load supported by a cylinder or jack in kN. For pressing parts together under pre-determined loads, weighing, testing, etc.

GP-Series are dry gauges.

GF-Series are glycerine filled gauges.

Page: 133

V Series

Maximum Operating Pressure:
700 bar

Valve Type and Model Number		Description		Hydraulic Symbol
Needle Valve V82 V182 V8F		V82: To control cylinder speed. Can also be used as shutoff valve for temporary load holding. 3/8" NPTF ports, nickle plated. V182: Same as V82, but with 1/4" NPTF female ports, nickle plated.	Also suitable for gauge snubbing (also V82). V8F: Like V82, but with very fine metering for precise flow control 0,16 - 14,7 l/min at 275 bar. Not recommended as shutoff valve.	
Snubber Valve V91		V91: Infinitely adjustable for metering oil out of a gauge to prevent snapping of gauge pointer when load or pressure is suddenly released.	Also suitable as shutoff valve to protect the gauge during high cycling applications. 1/2" NPTF male and female threads for use with GA1, GA2 or GA4 gauge adaptors.	
Auto Damper® Valve V10		V10: To be used when gauge pressure must be monitored during high cycle applications. Creates a flow resistance when load is released suddenly.	No adjustments are necessary. 1/2" NPTF male and female threads for use with GA1, GA2 or GA4 gauge adaptors.	
Check Valve V17		V17: Ruggedly built to resist shock and operate with low pressure drop. Closes smoothly without pounding. 3/8" NPTF female port.		
Pilot Operated Check Valve V42		V42: Can be mounted at the cylinder to hold the load in case of system pressure loss. Normally used with doubleacting cylinders where pilot port receives pressure from a Tee-fitting in the cylinder retract line.	3/8" NPTF female ports. Pilot presure ratio 14% (6,5:1).	
Manually Operated Check Valve V66, V66NV * V66F		V66, V66NV: For load holding applications with single and double acting cylinders. Valves allow oil to flow back to tank when cylinder retracts.	V66NV with Viton seals, nickelplated. V66F: Similar to V66, but with very fine metering capability for precise flow control. V66F is not designed for load holding.	
Pressure Relief Valve V152 V152NV *		V152: Limits pressure developed by the pump in hydraulic circuit, thus limiting the force imposed on other components. Valve opens whenever preset pressure is reached.	To increase pressure setting, turn handle clockwise. Includes: • 0,9 m return line hose kit, • ± 3% repeatability, • 55 - 700 bar adjustment range.	
Sequence Valve V161		V161: To control oil flow to a secondary circuit. Flow is blocked until system pressure rises to the V161 setting. When this pressure level is reached, the V161 opens to allow flow to the secondary circuit.	A pressure differential is always maintained between the primary and secondary circuit. Mininum operating pressure: 140 bar.	

* See page 64 for more information about products for use in high temperature and extreme environment applications.

Enerpac Hydraulic Presses are available in a variety of capacities and sizes. The press frames are designed for maximum strength and durability. Strong frames and powerful high-pressure hydraulics will provide years of dependable service in many applications.

Enerpac Presses are available in Bench, C-Frame, Arbor, Workshop and Roll-Frame models.

Available in capacities from 10 to 200 ton, each Enerpac press consists of three basic high quality components: press frame, power source and a cylinder.

Capacity ton (kN)	Press type and functions		Series	Page
10 (101)	Bench Presses	VLP		148 ▶
25 - 200 (232 - 1995)	Workshop Presses	XLP VLP		148 ▶

5 - 20 (45 - 178)	C-Clamp Presses	A		152 ▶
10 - 30 (101 - 295)	Arbor Presses	A		152 ▶
10 - 200 (101 - 1995)	Press Accessories	A, VB BSS IPL, XLP		154 ▶
900 - 90.000 kg	Tension Meters Load Cells	TM LH		155 ▶

IMPORTANT!

The pressframe of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

Page: 154

With decades of experience and in-house capabilities look to Enerpac to help find solutions to your customization needs.

Next to our large range of standard workshop presses, Enerpac offers the possibility of customization. Because many customers have specific requirements, we offer turn-key project management, including design, engineering and manufacturing. As the market leader, we listen to our customers and with our world

wide experience we offer the best solutions, especially when safety is not negotiable. Whether a longer stroke, wider frame or complete new design is required, our custom product group has many years of experience in multiple industries to deliver a solution that meets or exceeds expectations.

Overview Custom Presses

▲ Enerpac's hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.

◀ Fully Automated PLC-Controlled 1800-Ton, High-Accuracy Press. The pressing and heating cycle, during the production of magnetic acceleration coils, required high force and high-accuracy to ensure absolute quality

◀ 600 Ton High-Accuracy Collar Press. For the production of accelerator coils, sheet metal needs to be formed into a specific shape and size.

◀ 50 ton Workshop Press for maintenance jobs.

CUSTOMIZABLE FEATURES:

- Capacity
- Cylinder Stroke
- Pump Type
- Controls
- Guarding
- Daylight Dimensions

CONFIGURATIONS:

- Vertical and horizontal press
- Cylinders mounted in upper and lower bolsters
- Height built to customer specifications
- Daylight (vertical and horizontal) built to customer specifications

▼ From left to right: XLP256XA11G, XLP506XA12G, VLP106P142

No Workshop can do without one

XA-Series Foot Pump

The XLP-press with XA-Series air powered foot pump: no need to fully lift up foot – rest bodyweight on heel, resulting in a handsfree and stable working position – safe and controlled press operation (see page 114 for XA-Series Pumps).

Gauges

All press models include a gauge and gauge adaptor, matching the press capacity.

Side-to-side cylinder movement

Cylinder can be positioned horizontally side-to-side on all XLP-Series presses.

Safety Cages & Screen

Optional safety cages and screen with polycarbonate glass for additional operator protection.

Page: **154**

XLP-Series Presses

- Multi-functional presses in kit form (50 and 75 ton presses)
- Easy grip forklift access on 50 and 75 ton presses
- Height adjustment of upper or lower bed with winch (50 & 75 ton)
- Width adjustment allows cylinder to move from side-to-side
- Pump options include XA-Series air-operated foot pump
 - pressure gauge integrated in pump for optimal control
 - suitable for delicate pressing jobs from variable oil flow.

VLP-Series presses

- Unique “Hydrajust” bed positioning device on 100 and 200 ton VLP-presses allows adjustment of the lower bed.

75, 100	VB101
200	A200

VLP 10 ton

"Hydrajust" Bed Positioning

Allows vertical adjustment of the lower bed on 100 and 200 ton VLP presses.

IMPORTANT: The "Hydrajust" bed positioning is not designed to withstand full cylinder capacity, only to be used for bed adjustment.

Page: 154

XLP 25 ton

XLP, VLP Series

Capacity:

10 - 200 ton

Maximum Daylight x Width:

1340 x 1220 mm

Maximum Operating Pressure:

700 bar

IMPORTANT!

The pressframe of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

▼ Shown: BPR5075

Expert Designed Versatility

- Quality welded frame for maximum strength and long life
- Frame rolls easily on 4 steel roller bearings
- Exclusive 'Hydra-Lift' bolster for effortless adjustment of the vertical daylight
- Standard roller head design allows lateral movement and locking of the cylinder up to 300 mm left or right of centre
- All models in the quick selection chart have been matched to an electric pump, double-acting cylinder, hose and gauge, offering the complete package
- Roll-Frame design features a stationary bed with the ability to support heavy loads
- Hydraulic clamp cylinder locks roll-frame into position.

Cylinder adjustment

Cylinder adjustment allows horizontal side to side cylinder positioning.

Hydra-Lift

Allows easy, effortless daylight adjustment. Standard on all Roll-Frame presses.

Page: 154

Optional V-Blocks

These V-Blocks are designed for easy fixturing of round stock and other non-uniform materials. Featuring precise fit into the press bolster.

Page: 154

Roll-Frame Presses

▲ For offshore application high capacity spring loaded cylinders need to be assembled and tested. A special 100 ton roll frame press, with long stroke cylinder has been constructed. All movements are operated and monitored through a PLC controlled pendant.

IMPORTANT!

The frameworks of the presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

BPR Series

Capacity:

50 - 200 ton

Maximum Daylight x Width:

1295 x 1222 mm

Maximum Operating Pressure:

700 bar

Gauges

All press models include a gauge and gauge adaptor, matching the press capacity:

Press Capacity	Gauge Model Number	Adaptor Model Number
ton		
50	GF50B	GA2
100	GF871B	GA3
200	GF200B	GA3

For more information on gauges, please refer to the System Components section.

Page: 136

Spring Centred Valves

Manual valves on electric and air pumps of Enerpac presses are Spring Centred Valves. The handle will automatically move into the neutral valve position when released.

The Standard Workshop Tools

Push Pin A183

For applications requiring precision pressing, such as shaft removal and insertion. This attachment fits 10 ton cylinders and requires the use of a threaded adaptor saddle (A13).

Page: 176

Smooth Saddle A185

For pressing applications of delicate parts, such as aluminium castings, this saddle decreases surface marks during the pressing application. Requires 10 ton cylinder and threaded adaptor saddle (A13).

Page: 177

10 ton Bench Presses

For 10 ton VLP-Series Bench Presses selection see:

Page: 148

C-Clamp Press

- 5, 10 and 20 ton capacity
- Operational in all positions.

Arbor Press

- 10 and 30 ton capacity
- Foot mounting holes for horizontal or vertical positioning
- Machined working surfaces for easier fixturing
- Slotted back to simplify loading and unloading of longer parts.

▼ A310 Arbor Press

IMPORTANT!

The pressframe of the workshop presses are exclusively designed for pressing operations, not for pulling. For pulling applications please contact Enerpac.

In order to fully comply with CE regulations, some presses must be equipped with specific safety components, such as spring centered valves, two-hand control devices, guards or others.

Enerpac standard general purpose presses are supplied without guards, and have a plunger speed of less than 10 mm/second.

However, your application may require that measures should be taken to reduce the risk of injury to operators and other personnel by providing appropriate safeguarding, training and conducting a risk assessment, which eliminates or reduces danger.

Health & safety within your workplace is your responsibility, not that of Enerpac.

Advice on such matters is available from your local enforcement agency. If you require any further information on Enerpac accessories that may help you conform to the Machinery Directive or European legislation contact Enerpac.

Press Frame

Press frames include features like workpiece side-loading and height adjustment of the upper bed and lower bed.

Power Source: Depending on the production requirements, Enerpac presses can be powered by manual, air-hydraulic and electric-drive power sources.

Cylinder: Depending on the application, double-acting cylinders offer increased efficiency. Check out the Selection Charts for the press best suited for your needs.

Gauge: All Workshop presses and Roll-Frame Presses feature an easy to monitor pressure/force gauge for increased safety.

Tension Meter and Load Cells

▼ Shown: LH102 and TM5 (in middle)

TM LH Series

Capacity:

900 - 90.000 kg

Accuracy, % of full scale:

± 2%

TM and LH models are 100% tested to verify accuracy within a ± 2% range.

If your application requires a calibrated tool, it must be submitted for certification testing. Certification is NOT available from Enerpac.

Tension Meter TM5

- Accuracy ± 2% of full scale
- Zinc and bronze plated to resist corrosion
- Dual-range readout in kilograms and pounds
- Maximum indicating pointer reading for pre-selected forces or to maintain force readings
- Cushioned metal case provides safe storage and transport.

Load Cells LH-Series

- Accuracy ± 2% of full scale
- Swivel loading pad reduces eccentric loading for improved accuracy
- Maximum indicating pointer reading pre-selected forces or to maintain maximum force readings
- Dual-range readout in kilograms and pounds.

TM5

* BC = Bolt Circle

Enerpac offers a complete line of pullers with the widest range of sizes, capacities and styles. Whether your application requires mechanical, hydraulic or the patented Lock-Grip system, Enerpac can satisfy your requirements.

Made of high strength steel alloys, you can depend on Enerpac pullers to provide years of trouble-free operation, even in the harshest environments.

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying. Damage to parts is minimized through the use of controlled hydraulic power.

Lock-Grip Pullers

The puller's self-centering closing system allows all jaws to move simultaneously, making it easy for a single operator to mount the puller and to perform the application.

CAUTION!

Not all puller components and configurations are rated at the set capacity. Please contact Enerpac for details.

IMPORTANT!

Always wear Safety Goggles and Gloves while using pullers.

Puller Section Overview

When selecting a puller it is important to consider 3 basic specifications:

1. The Capacity:

is the amount of force the puller is capable of producing.

Typically, the capacity required for a job can be determined by using the shaft diameter of the part being pulled.

For manual pullers, the center bolt diameter of the puller should be at least half the diameter of the shaft being pulled from.

For hydraulic pullers, the capacity in tons should be 0,28 to 0,4 times the shaft diameter in mm. Use the following chart:

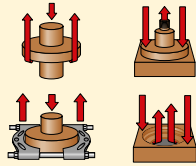

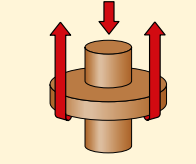

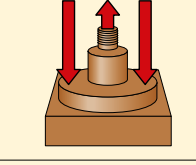

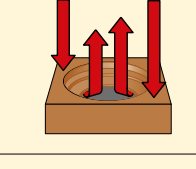

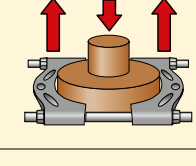

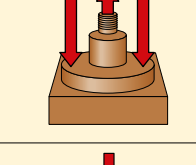

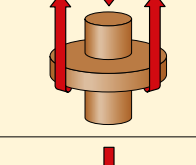

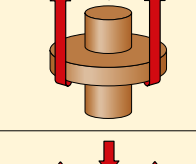

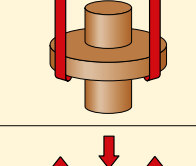

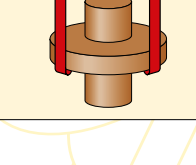

Shaft Diameter	Puller Capacity
0 - 25 mm	13 ton
25 - 50 mm	22 ton
50 - 89 mm	33 ton
89 - 140 mm	45 ton

2. The Reach:

is the distance between the bottom of the base and the jaw flats. The puller's reach must equal or exceed the same distance of the part being pulled.

3. The Spread:

is the distance between the jaws. The puller's spread needs to be greater than the width of the part being pulled.

Puller Function	Capacity ton	Puller Type	Series	Page
	13-45	Master Puller Sets Max. Reach: 252 - 700 mm Max. Spread: 247 - 1100 mm	BHP	 158 ▶

▼ Shown: Master Puller Set BHP3751G

Multi Purpose Puller Set

WARNING

Do not exceed 50% of the rated puller capacity when using two jaw configurations, a double crosshead (2 grip arms) or when using puller legs in combination with bearing puller attachments.

- Supplied with a full hydraulic set including pump, hose, cylinder, gauge, gauge adaptor and wooden case
- High quality, forged steel components provide superior reliability and service
- Sets include speed crank and adjusting screw for fast contact to work before hydraulics are applied
- All Master Puller Sets include a Grip Puller, a Cross Bearing Puller, a Bearing Cup Puller and a Bearing Separator, which can be ordered separately, see items nr. 10, 20, 30 and 40.

▼ Maintenance engineers throughout the industry greatly appreciate the Enerpac Master Puller sets.

* Bearing Separator rated at 50% of puller capacity. See warning on this page.

Bearing Separator

Bearing Separator has wedge shaped edges for placing puller behind hard to reach bearings, gears, etc., where clearance prevents direct application of grip puller arms.

The Bearing Separator can be used with the Cross Bearing Puller or the Grip Puller.

▼ 2 and 3-Jaw Mechanical Lock-Grip Pullers

- Quickly and easily mount on a wide range of applications
- Lock-on jaws offer a secure grip for safe and easy operation
- Synchronous jaw movement enables entire pulling job to be performed by a single operator
- Available in 2 and 3-jaw configurations.

▼ Lock-Grip Pullers – the simple, safe and cost-effective way to remove shaft-mounted parts.

The simple, safe and cost-effective way to remove shaft-mounted parts

LGM-Series, Mechanical Lock-Grip Pullers

LGM-Series, Lock-Grip Pullers

LGM-Series pullers are an ideal solution for pulling small to medium-size wheels, sprockets, bearings and other similar shaft-mounted parts. The puller's self-centering closing system allows all jaws to move simultaneously, making it easy for a single operator to mount the puller and to perform the application.

Turning the puller handle locks the jaws onto the application, allowing the desired object to be pulled free when the spindle is turned.

LGM Series

Puller Capacity:
3 - 40 ton

Maximum Reach:
102 - 335 mm

Maximum Spread:
132 - 635 mm

IMPORTANT!

Always wear safety goggles and gloves while using pullers.

Point Protector

LGM-Series Pullers MUST be used with a point protector if the shaft end does not contain a drilled center hole. One point protector is included with every puller.

SELECTION CHART

Mechanical Puller Model Number	Maximum Reach A	Dimensions (mm)			Number of Jaws	Puller Capacity US ton (kN)	Maximum Torque Dmax (Nm)	Weight (kg)	Replacement Point Protector Part Number

▼ 2 and 3-Jaw Hydraulic Lock-Grip Pullers

The simple, safe and cost-effective way to remove shaft-mounted parts

- Quickly and easily mount on a wide range of applications
- Hydraulically applied pulling force increases pulling capacity, reducing operator fatigue
- Lock-on jaws offer a secure grip for safe and easy operation
- Synchronous jaw movement enables entire pulling job to be performed by a single operator
- Available in 2 and 3-jaw configurations with or without a detachable hollow cylinder.

Point Protector

LGH-Series Pullers **MUST** be used with a point protector if the shaft end does not contain a drilled center hole. One point protector is included with every puller.

1. Convenient adjustment handle simplifies positioning of jaws on application and increases speed of operation.
2. Locking mechanism helps prevent jaws from slipping off application during pulling process.
3. Detachable hollow cylinder offers increased pulling capacity compared to mechanical alternatives.
4. Greater spreading width on jaws enables use on thicker objects.
5. Synchronous jaw movement increases ease of use, allowing one operator to mount the tool and perform the pulling application.
6. Point protector helps prevent damage to spindle when pulling against a flat surface.

Hydraulic Lock-Grip Pullers

LGH-Series, Lock-Grip Pullers

LGH-Series pullers provide the same safety and ease of use as their mechanical counterparts, with the pulling force applied by a standard 700 bar hydraulic cylinder.

LGH-Series pullers can apply up to 64 tons of force and are perfect for removing larger shaft-mounted objects up to 660 mm diameter.

Turning the puller handle locks the jaws onto the application, allowing the desired object to be pulled free when the spindle is turned.

LGH Series

Puller Capacity:

10 - 64 ton

Maximum Reach:

215 - 408 mm

Maximum Spread:

300 - 660 mm

Maximum Operating Pressure:

700 bar

IMPORTANT!

Always wear safety goggles and gloves while using pullers.

Hydraulic Pullers

LGH-Series Hydraulic Pullers include puller and hydraulic cylinder.

Hydraulic Puller Sets

LGHS-Series Hydraulic Pullers Sets include hydraulic puller, pump, gauge and HC7206C hydraulic hose.

Choose pump options below.

▼ SELECTION CHART

Hydraulic Puller Model Nr ¹⁾	Dimensions (mm)				Number of Jaws	Puller Capacity	⚠	Replacement Point Protector Part Number	Hydraulic Puller Sets Model Number

¹⁾ Hydraulic puller models include cylinder. To receive puller without cylinder add "NC" after LGH (Example: **LGHNC210**).

* E = for 230V applications. For 115V applications change last suffix from E into B. Example **LGHS310EB**.

Master Puller Sets include a hydraulic puller, cylinder, a pump with hose and gauge for standard pulling applications, as well as a selection of accessories designed for work environments where clearance prevents a direct application of the puller jaws.

Lock-Grip Pullers:

All sets come with a hydraulic LGH-Series Puller. Both two jaw and three jaw versions are available.

Detachable Hollow Cylinder:

Provided with all hydraulic pullers as well as the Cross Bearing Puller.

Pump with Hose and Gauge:

Hydraulic Puller Sets and Master Puller Sets are supplied with a hose, gauge, and your choice of a hand, air, electric or battery-powered cordless pump.

Cross Puller:

Hydraulically powered via a detachable hydraulic cylinder and pump. The Cross Puller can be used individually as a 'push' puller, or in conjunction with the Bearing Separator or Bearing Cup Puller.

Bearing-Cup Puller:

Specifically designed to pull cup style bearings and other applications requiring an internal style puller.

Bearing Separator (used with Cross Bearing Puller):

Features narrow edges, which enable puller to be placed behind hard to reach bearings, gears, etc., where limited clearance prevents the direct application of puller arms.

100 ton Hydraulic Sync-Grip Puller

▼ SGH100

- Sync Grip mechanism synchronizes movement of all jaws, providing enhanced control of pulling process
- No need to cut, heat or torch components for removal, resulting in safer environment for operator, and preventing damage to equipment
- A hydraulically applied pulling force of up to 100 ton allows a traditionally strenuous task to be completed at the push of a button
- Provides 100 ton pulling force at a fraction of the price of alternative solutions
- One SGH10004 point protector is included with each SGH100.

Sync-Grip Puller – Simple, synchronous movement

The Sync Grip mechanism synchronizes movement of all jaws for simultaneous engagement, allowing one operator to mount the tool and perform the pulling application. Hydraulically applied pulling force increases pulling capacity and reduces operator fatigue, enabling quicker and easier set up.

Sync-Grip Puller Sets

For ordering convenience the SGH100 is available as complete set with HC7206C hose, GA45GC gauge adapter assembly and ZE3304S electric pump.

Model Nr.	Description
GPS100EB	Set with 120 V pump
GPS100EE	Set with 240 V pump

Point Protector

To prevent damage a point protector must be used if the shaft end does not have a drilled center hole.

- All sets include Enerpac pump, hose, cylinder and gauge
- Lock-on or threaded connectors
- Complete maintenance set for almost every maintenance application.

The Universal Hydraulic Tool Box

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of hydraulic powered tools. Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12,5 ton.

More Information

For detailed information on all included attachments, see the next pages.

Page: 176

Clamping a workpiece is just one of the many applications for the Enerpac maintenance sets.

▼ QUICK SELECTION CHART

Capacity using attachments* ton (kN)	Set Model Number						Number of Attachment Components	 (kg)
2,5 (22)	MS24	P142	HC7206	RC55	GP10S	GA4	33	26
2,5 (22)	MSFP5	P142	HC7206	RC55	GP10S	GA4	24	20
5,0 (50)	MSFP10	P392	HC7206	RC106	G2535L	GA3	23	48
5,0 (50)	MS210	P392	HC7206	RC106	GP10S	GA2	35	63
12,5 (116)	MS220	P392	HC7206	RC256	GP10S	GA2	13	95
5,0-12,5 (50-116)	MS21020	P392	HC7206	RC102, 106, 256	GP10S	GA2	53	158

* If no attachments are being used, capacity is double these values. Maximum operating pressure is then 700 bar.

Universal Maintenance Sets

CAUTION!

When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (350 bar).

WARNING!

Only use attachments provided with set. Non-Enerpac attachments and longer extension tubes will reduce column strength, potentially creating unsafe conditions.

MS Series

Capacity (using attachments):

2,5 - 12,5 ton

Maximum Operating Pressure:

350 bar

▼ APPLICATION EXAMPLES

CAUTION! When cylinders are used with maintenance set attachments or components, the maximum system pressure must be limited to half the rated pressure (350 bar).

Note: All dimensions in millimetres.

▼ Shown: SP35S

- 12,7 mm thick capacity through mild steel
- Round, oblong and square punches and dies are available to solve your punching applications
- Long life Enerpac single-acting, spring return design
- Durable steel case keeps tools and dies together and provides for easy carrying and storage
- CR400 coupler included.

Much Faster than Drilling

Tool Kit SPK10

Included with all 35 Ton punches, this tool kit is used to remove and install the punch into the head. Can be ordered as a replacement under model number **SPK10**.

Ordering Information

The 35 ton hydraulic Punch may be ordered by itself or as a set, including a pump. A punch or die may also be ordered separately or as a matched set. Please refer to the Quick Selection Chart information on top of the next page.

LW-Series, Hydraulic Vertical Lifting Wedges

ENERPAC

▼ Shown: LWC16, LW16 with SB2 and optional LWB1

- Integrated hand pump offers greater maneuverability (LWC16 only)
- Minimized access gap for greater accessibility on applications with limited insertion space
- Secure, stable lifting and lowering motion with no slippage
- Single-acting spring return cylinder allows for automatic, mechanical retraction
- Includes safety block SB2
- LW16 can be used in multiple set-up.

LW Series

Maximum Lifting Force:

16 ton (157 kN)

Minimum Clearance:

10 mm

Maximum Lift Height*:

51 - 69 mm

Maximum Operating Pressure:

700 bar

* Using Stepped Block LWB1

Power Box

Tool box with hand pump, gauge adaptor assembly, hose and LW16.

Page: 65

Control Manifolds

Control Manifold to control two or four LW16 lifting wedges simultaneously.

AM21 with 3 ports 3/8" NPTF
AM41 with 5 ports 3/8" NPTF.

Page: 132

▼ For lifting heavy equipment with minimum floor clearance the LW16 is the ideal tool.

Max. Lifting Force	Model Number	Minimum Clearance Gap	Max. Lift per Stage	Max. Lifting Height	Max. Lifting Height using Stepped Block LWB1	Oil Capacity	Pump Power Source	
ton (kN)		(mm)	(mm)	(mm)	(mm)	(cm ³)		(kg)
16 (157)	LW16 ¹⁾	10	21	51,5	69	78	External	7,0
	LWC16 ²⁾					–	Integrated	10,0

¹⁾ Includes SB2

²⁾ Includes SB2, LWB1, and carrying case.

▼ SOH10-6

- For lifting heavy equipment with minimum available access
- Remote hydraulic pump enhances safety
- Low height lifting toe
- Precision guided to reduce friction and isolate cylinder from side-loads
- Two extendable support feet provide extra stability
- Includes RC-Series cylinder with CR400 coupler.

SOH Series

Lifting Capacity:

8,5 - 20 ton

Stroke:

136 - 157 mm

Toe Clearance:

20 mm

Maximum Operating Pressure:

700 bar

RSM-Series, Low-Height Cylinders

Low height, single-acting spring-return cylinders are ideal for space restricted applications.

Page: 26

Load Skates

In combination with the Enerpac Machine Lifts we recommend Load Skates for moving heavy loads.

Page: 184

▼ Limited access under this machine makes the Enerpac hydraulic machine lift the perfect solution.

▼ Shown: Set ERS20

- Rugged and sturdy construction for long life
- Low profile construction for increased stability
- Low rolling-resistance allows for easy transportation
- Attachable load leveling plates and swivel turntables for turning corners.

Move Heavy Loads Easily and Safely

Sets (see table) include all components necessary to handle a variety of applications.

Two **ELB1** link-up bars, two **ERH1** handles (875 mm long) and one **EMB1** metal box are included.

Optional long handle **ERH2** (1180 mm) available for 60 and 80 ton only.

Lifting Wedges and Machine Lifts

To place the Load Skates, the load must first be lifted. This can be done easily and safely using the Enerpac Lifting Wedge or Machine Lifts.

Page: 182

▼ Heavy transport using Load Skates. The machine is first lifted, using SOH-Series Enerpac Machine Lifts.

▼ Chemical tank transportation: The first few centimetres the load was lifted with RCS-Series low height cylinders and then moved on to load skates for transportation.

Case Size:

19 - 453 litres

Protect your Equipment

Maintenance Sets

Enerpac Maintenance sets are a complete assortment of hydraulic powered tools.

Using these sets allows you to quickly configure a unique tool to meet your most difficult jobs.

Built around the Enerpac lightweight hand pump, hose and cylinder, these sets enable you to push, pull, lift, press, straighten, spread and clamp with forces up to 12,5 ton.

Page: 174

Hydraulic Pullers

These hydraulic pullers eliminate time-consuming and unsafe hammering, heating or prying.

Damage to parts is minimized through the use of controlled hydraulic power.

Quick, Safe and Wrinkle-free Bending

'One Shot' and 'Sweep'

One shot shoes give up to a 90° bend without resetting.

Sweep shoes are used where increasing radii are required for multiple parallel pipe installations.

- Makes smooth, wrinkle-free bends
- Sets include genuine Enerpac cylinder, hose, air, electric or hand pump
- Sets are also available without hydraulics
- Bending shoes and frame are lightweight, heat-treated aluminium
- All sets include sturdy steel storage case
- All sets include BZ12091 angle indicator for accurate bending
- BZ12377 Shoe Lock Pin included in every set
- Eject-O-Matic™ benders (STB202 models) have double-acting cylinder to eject pipe from the bending shoe.

▲ Typical one shot bending operation.

▼ RP70A, Hydraulic Rail Stressor

Hydraulic Rail Stressor

- Modular 70 ton stressor and holds the rail in neutral length during the welding process
- Easy to assemble in less than 2 minutes
- Certified lifting eyes mounted directly on the clamps for easy and safe lifting
- Designed with new aluminum lightweight cylinders including protection sleeves over the rods to extend durability

ZC3-Series, Battery Powered Stressing Pumps *(see page 191)*

- Zero emission hydraulic power pack
- Advanced brushless motor and Lithium-ion battery
- Steel manual operating valve with pressure hold function
- Safety key to safely leave the pump unattended during breaks
- Pressure release valve V182 included.

Lightweight & Modular Rail Stressing System

RP70A Rail Stressor

The Enerpac RP70A is a lightweight rail stressing kit for railway maintenance crews who assemble and install the rail puller directly on site.

The durable, easy-to-assemble components, stored and protected in a specially designed steel cage during transport, are up to 3 times lighter than similar tools.

The less physically demanding Enerpac RP70A is compatible with the cordless Enerpac ZC3-Series pump for a complete clean energy solution.

Certificate of Acceptance PA05-06958

Both RP70A Hydraulic Rail Stressor and ZC3 Stressing Pump are certified by Network Rail.

Durability

Double-acting aluminium cylinders are enclosed within steel sleeves protecting the cylinder rods from damage, particularly weld splatter and extends the life of the unit.

◀ Complete system with RP70A Hydraulic Rail Stressor and ZC3 cordless stressing pump.

Hydraulic Rail Stressor & Cordless Powerpack

RP70A Rail Stressor

The RP70A Hydraulic Rail Stressor is used to pull together heavy railroad tracks for stressing and thermite welding.

In the rail industry ergonomic managers specify that tools over 29 kg should be modular and be able to be manually assembled/transported on site.

The RP70A can be used with the battery powered pump. The stressor is interchangeable with other type of powerpacks. The RP70A adjusts the gap between rail ends for rail stressing, rail welding, repairing rail failures and servicing insulators.

◀ Modular 70 ton stressor and holds the rail in neutral length during the welding process.

Capacity ton (kN)		Stroke (mm)	Model Number	Dimensions (mm)				Weight (kg)

RP Series

Rated Pulling/Pushing Capacity:

70 / 45 ton

Stroke:

205 mm

Maximum Operating Pressure:

580 bar

Hydraulic Hoses

Use Enerpac hose model number **H9210-RS** 3,0 metres hydraulic hoses to ensure the integrity of your Rail Stressor system.

Battery Powered Stressing Pumps

- Cordless, zero emission pump
- 82V 4Ah Lithium-ion battery
- Roll cage and pressure gauge
- 3-stage: 0,52 l/min at 580 bar
- 4,0 litres useable oil capacity
- Pump weight 34,8 kg (excluding battery)
- Reduced Noise Level 80 dBA max
- Advanced brushless 1,0 kW motor.

Model Number	Battery Charger (Volts)	Maximum Pressure (bar)
ZC3404JE-RS	230	580
ZC3404JB-RS	115	580

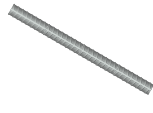

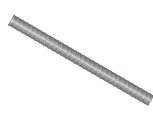

World-Class Cutters

When you need to make cuts through heavy-duty bar, chain, cable and similar materials, look no further than Enerpac's broad range of cutters.

An extensive line-up of hydraulic, electric and manual cutters provides a quick, safe and cost-effective solution for technicians from construction, mining, manufacturing and many other industries.

Enerpac's cutters are built to handle industrial-grade materials on a daily basis. Like all Enerpac tools, each cutter is designed and built to last in tough working conditions for a safer, simpler and more productive workflow.

Cutter Type		Maximum Tool Capacity *	Series		Power Source	Page

Your Fast, Safe and Simple Solution for Cutting Metal Bar

Internal Mechanics

EBH-Series: Cylinder is driven by an external Enerpac pump.

EBC and EBE-Series: Cylinder are driven by a radial pump powered by an electric motor.

Typical Bar Cutting Applications

- Commercial and residential construction
- Concrete and masonry
- Metal fabrication
- Industrial manufacturing

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through heavy-duty bar
- Highly durable, long-lasting blades outlast angle grinder or saw blades.

Safety

- Controlled cutting process enhances user safety compared with use of cut-off blades
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome).

▼ Enerpac's bar cutters are built to handle tough cutting applications.

EBH-Series, Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters

EBH-Series Hydraulic Bar Cutters are driven by a specialized external hydraulic pump for optimal power and a higher duty cycle compared with other cutter types.

These cutters are ideal for use in production or manufacturing facilities with demanding, high-volume cutting applications.

- ① Highly durable blades maintain effectiveness throughout rigorous use.
- ② Safety guard helps protect hands from injury.
- ③ Heavy-duty cutting head provides a longer operational life.
- ④ Lifting handle enables easier positioning and transport.
- ⑤ Double-acting cylinder with advance and retract buttons improves control and reduces jamming
- ⑥ External hydraulic pump helps keep the tool cool, improving operational time (pump and hose sold separately).

EBH Series

Maximum Material Hardness:

HRC 43

Maximum Material Diameter:

30 - 35 - 52 mm

Maximum Operating Pressure:

700 bar

Electric Pumps and Accessories

The EBH-Series Hydraulic Cutters are designed to work with specialized ZE4 and ZE6-Series pumps. Pump models vary by voltage type. Pump and hoses are sold separately. Both are required for the system to function. See page 208 for complete details on required pump and accessories

Page: **208**

Optional Gauge Kit GKHC

Optional gauge and accessories can be used to monitor pressure in the hydraulic system. Enerpac recommends **GKHC Gauge Kit** for use with Enerpac hydraulic cutters.

Maximum Material Diameter * (mm)	Model Number	Maximum Material Tensile Strength (daN/mm ²)	Maximum Material Hardness * (HRC)	Maximum Cutting Force (kN)	Maximum Hydraulic Operating Pressure (bar)	Dimensions (mm)			Replacement Blade Kit Model Number	
						A	B	C

52	EBH52	50	43	1078	700	765	264	311	136	EBH5201K

* Maximum material properties indicated refer to the material to be cut.

EBE-Series, Electric Bar Cutters

The versatile EBE-Series Electric Bar Cutters quickly cut through heavy duty bar up to 26 mm in diameter without the need for an external hydraulic pump.

Their compact size and low weight enable them to be easily transported and used wherever an external power source is available.

- ① Highly durable blades maintain effectiveness throughout rigorous use.
- ② Safety guard helps protect hands from injury.
- ③ Heavy-duty cutting head provides a longer operational life.
- ④ Lifting handle enables easy positioning and transport.
- ⑤ Piston-release mechanism allows blade to be reset, reducing jamming and providing a controlled cutting process.

EBE Series

Maximum Material Hardness:

HRc 43

Maximum Material Diameter:

22 - 26 mm

Voltage*:

120 and 230 Volt

* ETL certification applies to 120 Volt tools only.

¹⁾ Maximum material properties indicated refer to the material to be cut.

EBC-Series, Cordless Bar Cutters

Cordless Bar Cutters

The highly portable EBC-Series Cordless Bar Cutters quickly and easily slice through up to number 6 rebar, or similar metal bar up to 20 mm in diameter.

A powerful 18V Lithium-ion battery provides mobility and long lasting performance, making these tools the perfect go-to solution for the jobsite, including remote locations, or anywhere an external power source is not available.

- ① Highly durable blades maintain effectiveness throughout rigorous use.
- ② Safety guard helps protect hands from injury.
- ③ Highly durable cutting head can be rotated 360 degrees to aid in the positioning of the blades on the application.
- ④ Lifting handle enables easy positioning and transport.
- ⑤ Piston-release mechanism allows blade to be reset, providing a controlled cutting process and reducing jamming.
- ⑥ Powerful 18V battery provides high performance and complete mobility.

EBC Series

Maximum Material Hardness:

HRc 43

Maximum Material Diameter:

20 mm

Battery:

12 and 18 Volt

* ETL certification applies to 120 Volt tools only.

Batteries and Chargers

EBC-Series Cutters come standard with two DeWALT® 18V-5Ah lithium-ion batteries and one DeWALT® 12V or 18V charger. Additional batteries and chargers are sold separately.

EBC-Series Cutters work with DeWALT® 18V XR batteries. DeWALT® is a registered trademark of DeWALT Industrial Tool Co., which has not manufactured, licensed, approved, or endorsed this cutter product.

²⁾ To order an EBC-Series Cutter without batteries or a charger, remove the "B" or "E" from the Model Number, e.g. "EBC20".

▼ EDCH130, Decommissioning Cutter

Productivity

- Powerful jaws and an exceptionally large blade aperture enable use on a large variety of applications including metal tubes, communication cables, profiles and similar materials *
- Multiple pump options provide power, speed and mobility for all your applications.

Safety

- Minimal spark risk compared with torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome).

- ① Durable blades maintain efficiency throughout rigorous use
- ② Double-acting cylinder improves control and reduces jamming
- ③ Control knob immediately stops the tool when released, improving operator safety
- ④ External hydraulic pump helps keep tool cooler and working longer (pump and hose sold separately).

EDCH Series

Maximum Material Hardness:

HRc 41

Maximum Blade Aperture:

130 - 145 - 170 mm

Maximum Operating Pressure:

700 bar

Electric Pumps and Accessories

The EDCH-Series Hydraulic Cutters are designed to work with specialized ZC3, ZE4 and ZE6-Series electric pumps. Pump models vary by voltage type. Pump and hose are all sold separately, and all are required for the system to function. See page 209 for complete details on required pumps and accessories.

Page: **209**

* IMPORTANT

Do not use to cut wire rope. Use instead the EWCH-Series wire and rope cutter.

Page: **203**

Optional Gauge Kit GKHC

Optional gauge and accessories can be used to monitor pressure in the hydraulic system. Enerpac recommends **GKHC Gauge Kit** for use with Enerpac hydraulic cutters.

Maximum Blade Aperture * (mm)	Model Number	Maximum Material Tensile Strength (daN/mm ²)	Maximum Material Hardness * (HRc)	Maximum Operating Pressure (bar)	Dimensions (mm)				Replacement Blade Kit Model Number	
					A	B	C	D

Do not use to cut wire rope. Use instead the EWCH-Series wire and rope cutter.

Electric Flat Bar Cutters

EFBE-Series Electric Flat Bar Cutters

EFBE-Series Electric Flat Bar Cutters enhance workplace safety by replacing unsafe cutting methods with a precise, controlled cutting solution. Unlike standard bar cutters, the deep cutting head design accommodates metal bar up to 70 mm (2¾ inch) high and over 15 mm (0.59 inch) thick.

A piston release mechanism allows the blade to be stopped and reset at any time, providing the operator with a high degree of cutting precision and control. EFBE-Series Cutters are perfect for use in industrial manufacturing facilities as well as steel and metal fabrication shops.

- ① Highly durable blades cut through flat bar, maintaining effectiveness throughout rigorous use
- ② Heavy-duty cutting head provides a longer operational life
- ③ Robust handle enables easy positioning and transport
- ④ Piston-release mechanism allows blade to be retracted, providing a controlled cutting process and reducing jamming

Voltage: (Model Number ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 1-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

EFBE Series

Maximum Material Hardness:

HRc 33

Maximum Material Height x Width:

50 x 17 mm / 70 x 15 mm

Voltage*:

120 and 230 Volt

* ETL certification applies to 120 Volt tools only.

Replacement Blade Kits

To order replacement parts use one of the model numbers shown below.

For Cutter Model Number	Blade Kit Model Number

▼ ECCE32E Electric Chain Cutter

Your Simple Solution for Cutting High-Strength Industrial Chain

Internal Mechanics

ECCE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Typical Chain Cutting Applications

- Chain manufacturing
- Mining
- Rigging / material handling for transport
- Oil and gas
- Marine

Productivity

- Quickly cut through heavy-duty chain links with minimal effort
- Highly durable blades outlast angle grinder or saw blades.

Safety

- Controlled cutting process behind a protective shield enhances safety
- Precisely cut only selected link, helping prevent damage to adjacent links and weakening of chain
- Minimal spark risk compared to torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome).

◀ Cut through chain links with ease using Enerpac's chain cutters.

ECCE-Series, Electric Chain Cutters

ECCE-Series Electric Chain Cutters

ECCE-Series Electric Chain Cutters are ideal for applications where safety is paramount. Unlike other cutting methods, Enerpac's chain cutters precisely cut selected chain links behind an enclosed, transparent safety guard.

This not only protects the operator's hands, it also helps prevent damage to adjacent links, which often results from using alternative cutting methods like torches or cut-off tools.

- ① Highly durable blades maintain effectiveness throughout rigorous use.
- ② Transparent safety guard protects hands and allows continuous monitoring for better management of cutting process.
- ③ Heavy-duty cutting head provides a longer operational life.
- ④ Lifting handle and eyebolt enable easy positioning and transport.

ECCE Series

Maximum Material Hardness:

HRc 46

Maximum Material Diameter:

25 - 32 mm

Maximum Grade of Chain:

100

Voltage *:

120 and 230 V

* ETL certification applies to 120 Volt tools only.

Voltage: (Model Number ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 1-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

Grade ¹⁾ and Maximum Material Diameter ²⁾ (mm)			Power Specifications				Model Number	Maximum Material Hardness ¹⁾ (HRc)	Maximum Cutting Force (kN)	Dimensions (mm)			Cord Length (m)	Weight (kg)	Replacement Blade Kit Model Number
Grade 70	Grade 80	Grade 100	Volt	Hz	Amps	kW				A	B	C			
25	25	13	120	60	10	1,2	ECCE26B	46	312	600	154	235	1,8	25	ECCE2601K
25	25	13	230	50	5,3	1,1	ECCE26E	46	312	600	154	235	3,0	25	ECCE2601K
32	25	19	120	60	11	1,3	ECCE32B	46	471	700	192	321	1,8	48	ECCE3201K

¹⁾ Cutting larger chains or those of a grade higher than those recommended will result in increased wear, and may damage the tool.

²⁾ All links over 1/2" (12,7 mm) must be cut in two passes, with each pass cutting one side of the link.

▼ Shown from left to right: EWCH90 and EWCE55E

The Quick and Clean Way to Cut Cable and Wire Rope

Internal Mechanics

EWCH-Series: Cylinder is driven by an external Enerpac hydraulic pump.

EWCE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Productivity

- A broad range of hydraulic and electric tools quickly and easily cut through cable and wire rope.

Safety

- Controlled cutting process enhances operator safety
- Minimal spark risk compared with torching, grinding and sawing methods
- Cutters produce minimal vibration, helping prevent HAVS (Hand Arm Vibration Syndrome).

Typical Wire and Cable Cutting Applications

- Telecommunications
- Electrical installation and maintenance
- Power generation and transmission
- Shipbuilding

▼ Guillotine-style blades make quick work of electrical cables and rope.

EWCH-Series, Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters

EWCH-Series Hydraulic Wire and Cable Cutters are ideal for use in production facilities where demanding, high volume cutting applications are often encountered.

Each tool is driven by a specialized external hydraulic pump, which provides greater cutting force and allows for higher duty cycles compared with other cutter types.

- ① Guillotine-style blades maintain effectiveness throughout rigorous use.
- ② Cutting head can be opened and closed to help position material to be cut.
- ③ Eyebolt facilitates easy lifting.
- ④ Double-acting cylinder with advance and retract buttons improves control and reduces jamming.
- ⑤ External hydraulic pump helps keep tool cooler and working longer (pump and hose are sold separately).

EWCH Series

Maximum Material Hardness:

HRc 43

Maximum Material Diameter:

90 - 140 - 180 mm

Maximum Operating Pressure:

700 bar

Electric Pumps and Accessories

The EWCH-Series Hydraulic Cutters are designed to work with specialized ZE6-Series electric pumps. Pump models

vary by voltage type. Pump and hoses are sold separately. Both are required for the system to function. See page 208 for complete details on required pump and accessories

Page: **208**

Optional Gauge Kit GKHC

Optional gauge and accessories can be used to monitor pressure in the hydraulic system. Enerpac recommends **GKHC Gauge Kit** for use with Enerpac hydraulic cutters.

EWCE-Series Electric Wire and Cable Cutters

EWCE-Series Electric Wire and Cable Cutters combine the efficiency and safety of their hydraulic counterparts with the greater portability of electric tools.

Their lighter weight allows for easier carrying and positioning. Available in 120V and 230V versions.

- ① Durable, guillotine-style blades maintain effectiveness throughout rigorous use.
- ② Cutting head opens wide for easy positioning of wire or cable.
- ③ Robust handles enable easy positioning and transport.
- ④ Double-acting cylinder with directional control improves handling and reduces jamming.

◀ Cut through wire rope and cables with ease.

ECSE Series

Maximum Material Hardness:

HRc 41

Maximum Blade Aperture:

300 mm

Voltage*:

120 and 230 V

* ETL certification applies to 120 Volt tools only.

Internal Mechanics

ECSE-Series: Cylinder is driven by a radial pump powered by an electric motor.

Typical Chain Cutting Applications

- Industrial manufacturing
- Recycling
- Demolition

Productivity

- Blades easily cut through metal profiles, pipes, rods and other obstructions
- Wedges on tips of blades provide powerful spreading force

Safety

- Controlled cutting process creates minimal spark risk compared with torching, grinding and sawing methods

- ① Highly durable blades grip and cut through metal obstructions with ease
- ② Cutting head can be rotated 180 degrees in each direction for easier access to the application
- ③ Robust handle enables easy positioning and transport
- ④ Double-acting cylinder improves control and reduces jamming
- ⑤ Wedges provide powerful spreading force

Voltage: (Model Number ending with suffix)

Pumps & Accessories for EBH & EWCH-Cutters

EBH-Series Bar Cutters and EWCH-Series Wire and Cable Cutters are powered by an external pump with an electric valve.

A twin hydraulic hose and electric cable connect the tools to the pump, allowing the user to operate them directly from a control panel located on the cutters.

ZE4-Series Pumps

Specialized **ZE4-Series** pumps provide a balance of speed and versatility, and are available in 115 and 230 volts. Recommended for use with **EBH30** and **EBH35** cutters when portability, or the convenience of using standard voltage is required.

ZE6-Series Pumps

Specialized **ZE6-Series** 3-phase pumps offer a high-flow rate that provides fast performance for demanding applications. Recommended for **EBH52** and all **EWCH** cutting applications where speed is critical, or where higher flow rates are required by the application.

ZE Series

Reservoir Capacity:

4,6 - 9,8 litres

Motor Size:

1,1 - 5,6 kW

Maximum Operating Pressure:

700 bar

Optional Gauge Kit GKHC

Optional gauge and accessories can be used to monitor pressure in the hydraulic system. Enerpac recommends **GKHC Gauge Kit** for use with Enerpac hydraulic cutters.

Hoses

EBH-and EWCH-Series Cutters require a twin hose with an electric cable. The hose comes equipped with the appropriate couplers.

Required hoses sold separately.

Description	Model Number
6,1 m long, twin hose with couplers, sheath & electric cable	CH720EC

Pump Voltage 1-phase: (Model Number ending with suffix)

B = 120V, 60 Hz (with American-style NEMA 5-15 plug)

E = 230V, 50 Hz (with European-style SCHUKO plug)

I = 230V, 50 Hz (with NEMA 6-15 plug)

Pump Series	Pump Model Number *	Motor Electrical Specifications (Volt - Phase, 50-60 Hz)	Motor Size (kW)	Reservoir Capacity (litres)	Dimensions (mm)			Weight (kg)	Required Twin Hose Model Number (Sold separately)	Compatible Cutter Model Number (Sold Separately)

	ZE6410XJ-S	460-480 V - 3 ph								
	ZE6410XK-S	440 V - 3 ph								
	ZE6410XW-S	380-415V - 3 ph								

* Indicated pumps come equipped with appropriate configurations to work with indicated cutters.

¹⁾ ZE6 pumps are available with roll cages. To add a roll cage, add an "R" prior to the "S" in the model number: example **ZE6410XG-RS**.

Pumps & Accessories for EDCH-Cutters

Pumps & Accessories for EDCH-Cutters

The EDCH-Decommissioning Cutters are designed to work in a wide variety of environments, from factories to demolition projects.

Enerpac offers multiple pump options to provide power, speed and mobility for all your applications.

ZC ZE Series

Reservoir Capacity:

4,6 - 9,8 litres

Motor Size:

1,0 - 1,1 - 5,6 kW

Maximum Operating Pressure:

700 bar

ZC3-Series Cordless Pumps

Specialized **ZC3-Series** Cordless Pumps offer the portability of a cordless tool without the added weight of an integrated motor, combining freedom of movement with ease of use. Recommended for use with the **EDCH130** cutter.

ZE4-Series Pumps

Specialized **ZE4-Series** Pumps provide a balance of speed and versatility. Recommended for use with all **EDCH** cutters when the convenience of using standard voltage is required.

ZE6-Series Pumps

Specialized **ZE6-Series** pumps offer a high-flow rate that provides fast performance. Recommended for use with all **EDCH** cutters when 3-phase power is available, and speed is critical.

Optional Gauge Kit GKHC

Optional gauge and accessories can be used to monitor pressure in the hydraulic system. Enerpac recommends **GKHC Gauge Kit** for use with Enerpac hydraulic cutters.

Twin Hose

EDCH-Series Cutters require a twin hose for operation. The hose comes equipped with the appropriate couplers.

Description	Model Number

Enerpac's Bolting Solutions cater to the complete bolting work-flow, ensuring joint integrity in a variety of applications throughout the industry:

Joint Assembly

From simple pipe alignment to complex joint positioning of large structural assemblies, our comprehensive line of joint assembly products range from hydraulic and mechanical alignment tools to synchronized PLC-controlled multi-point positioning systems.

Controlled Tightening – Torque & Tensioning

Enerpac offers a variety of controlled tightening options to best meet the requirements of your application. From mechanical torque multipliers to hydraulic, pneumatic and electric square drive wrenches and from low profile torque wrenches to interconnectable bolt tensioning tools; we offer the products you need for accurate and simultaneous tightening of multiple bolts.

Joint Separation

Enerpac also provides hydraulic nut splitters and a variety of mechanical and hydraulic spreading tools for joint separation during inspection, maintenance and decommissioning operations.

High quality bolting solutions from the brand you can trust. See how Enerpac can make your bolting work-flow more accurate, safer and efficient.

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Program for bolted connections.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Setting New Standards in Safety, Simplicity and Performance

Safety and Performance

- Compact, high-strength uni-body construction provides a small operating radius without sacrificing endurance
- 35° rotation angle and rapid return stroke for fast operation
- Tough manifold design with added safety feature for enhanced operator safety.

Simplicity

- 360° click-on reaction arm with quick release lever provides easier handling, even with gloves on
- Includes robust handle or lifting eye which mounts on both sides of tool for extra maneuverability
- Push button square drive release for quickly reversing the square drive for tightening or loosening.

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability ¹⁾

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across full stroke
- Optional Angle-of-Turn Indicator provides measurement of rotation.

¹⁾ TSP300 is designed for X-Edition tools only, and is not compatible with previous edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

Two Handle Styles

Robust angled positioning handle comes standard with every S-Series (X-Edition) tool. Straight positioning handles are available as accessories.

Compatible S-Series (X-Edition) wrenches	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
S1500X, S3000X	SWH6A	SWH6S
S6000X, S11000X	SWH10A	SWH10S
S25000X	SWH10EA ²⁾	

²⁾ SWH10EA is an lifting eye.

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order ¹⁾

Factory fitted to S-Series (X-Edition) wrenches: Insert a "P" prior to the "X" in the tool model number, example: **S1500PX**.

Order as an accessory using the model number: **TSP300**, which can be fitted to existing S-Series (X-Edition) wrenches. Includes male and female couplers.

Page: 215

ATEX declared. Calibration certificate included.

All X-edition tools are CE - ATEX declared and are shipped complete with a calibration certificate.

X-Edition, Square Drive Hydraulic Torque Wrenches

Standard are: ① ② ⑥ ⑧
Other items are optional.

- ① Drive Unit
- ② Angeled Positioning Handle
- ③ Straight Positioning Handle
- ④ Pro Series Swivel
- ⑤ Reaction Tube Extension
- ⑥ Standard Reaction Arm
- ⑦ Allen-Key Drive
- ⑧ Square Drive
- ⑨ Short Reaction Arm
- ⑩ Extended Reaction Arm

Select the Right Torque
Choose your Enerpac Torque Wrench using the untightening rule of thumb:
Loosening torque equals about 250% of tightening torque.

S Series X-Edition

Nominal Torque Output:

35.455 Nm

Square Drive Range:

3/4 - 2 1/2 inch

Nose Radius:

25 - 64 mm

Maximum Operating Pressure:

690 bar

Use only Heavy Duty Impact Sockets
For power driven torquing equipment, according to ISO2725 and ISO1174; DIN 3129 and DIN 3121 or ASME-B107.2/1995.

Page: **216**

Back-Up Spanners
Hands free tool to be used to stop the back nut from turning during make up or break out.

Page: **217**

Safe™ Torque Lock
The Safe™ Torque Lock is suitable for all bolted applications from 190 Nm to 15.000 Nm using a heavy duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for S3000X, S6000X and S11000X.

Accessories for S-Series, X-Edition Wrenches

TSP RTEX SRSX Series

TSP-Series, Pro Series Swivel

- Robust interlocking design
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers

TSP-Series

For Torque Wrench Model Number	Model Number ¹⁾	Maximum Pressure (bar)	Weight (kg)
S1500X, S3000X, S6000X, S11000X, S25000X	TSP300	690	0,2

¹⁾ To order a S-Series (X-edition) torque wrench fitted with a TSP300 tilt and swivel manifold, insert a "P" prior to the "X" in the tool model number, example: **S1500PX**. TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

RTEX-Series, Reaction Tube Extensions

RTEX-Series

- Full torque rated
- Increases tool fit in restricted access areas

For Torque Wrench Model Number	Model Number	Dimensions (mm)				Weight (kg) *
		A	B	C	D	
S1500X	RTE15X	706	152	636	58	4,6

Back-Up Spanners for Torque Wrenches

▼ BUS03 Back-Up Spanner (safety cable not shown)

- Hands free solution – improves operator safety
- Eliminates the need for flogging spanners
- Speeds up the bolting process
- Includes safety cable with quick-connect carabiner's, stainless steel tethers and secure Allen-key fixings
- Won't lock on during operations
- Lightweight, spark-free and non-impact for improved safety and ease of use.
- Two hexagon sizes in one tool, so fewer tools to carry.

Back-Up Spanners

Hands free operation of a hydraulic torque wrench improves the safety of the operator significantly.

Enerpac Back-Up Spanners are a hands free tool that eliminates the need to use a flogging spanner as a backing tool.

The Back-Up Spanners have been specifically designed to prevent them from locking onto the nut during bolt torquing operations. They fit easily onto the back nut and prevent it from turning during make up or break out of bolted joints.

▼ Enerpac Back-Up Spanners to be used to stop back nut from turning during make up or break out.

▼ Shown: STTLS31055 Safe T™ Torque Lock

Hands-free torque wrench system

Safe T™ Torque Lock

The Safe T™ Torque Lock is suitable for all bolted applications from 190 Nm to 15.000 Nm using a heavy duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for:

S-Series	RSQ-Series
S3000X	RSQ3000
S6000X	RSQ5000
S11000X	RSQ11000

Safety – Safe T™ Torque Lock

- Transforming Enerpac S-Series & RSQ-Series wrenches into a dedicated hands-free tool
- Improves operator safety during bolting operations by minimizing exposure to pinch points and high pressure hydraulic connections
- Grips securely to the application in any orientation, including inverted positions
- Minimizes drop hazards of falling tools
- Reduces operator fatigue on overreaching or awkward positioning of the tool.

Simplicity

- With one twist of the locking collar the Safe T™ Torque Lock grips onto the application, firmly holding the full tool weight in place
- Assembles onto the torque wrench with one push of the square drive quick release button for tightening or loosening
- Locking feature reduces the number of tool lifts dramatically.

Versatility

- Suitable for both S-Series & RSL-Series square drive wrenches
- Simple twist & lock mechanism is user friendly, easy to operate
- No additional loose components like reaction washers are needed.

▲ Hands-free torque wrench system: STLLS-model with S-Series torque wrench. The square drive of the wrench can easily be exchanged by the Safe T™ Torque Lock model.

Back-Up Spanners, BUS-Series

To be used to stop back nut from turning during make up or break out. Two hexagon sizes in one tool.

Safe T™ Torque Lock – Hands-free torque wrench system

Common Torque Lock Applications:

- Oil & Gas flanges
- Tower Crane installation
- Machine installation/assembly (Mining),
- Wind Tower installation etc.

Industries

- Oil & Gas, Petrochemical
- Wind Power Generation
- Mining
- Marine
- Manufacturing
- Rail and more

STTL Series

Hexagon Range (A/F):

46 - 75 mm

Hexagon Range (A/F):

1 13/16 - 3 1/8 inch

STTLS for S-Series Spline Fitting

STTLR for RSQ-Series Spline Fitting

IMPORTANT:
Safe T™ Torque Lock not suitable for use on PTFE coated nuts.

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in

implementing and managing an Integrity Program for bolted connections.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

W-Series, Low Profile Hexagon Torque Wrenches **ENERPAC**

▼ Shown: W4206X hexagon cassette with W4000PX drive unit

 II 2 GD T4

Safety and Performance

- Superior strength to size ratio provides easy access to difficult to reach applications without sacrificing endurance
- 30° rotation angle and rapid return stroke provide fast operation
- Tough manifold design with added safety feature for enhanced operator safety.

Simplicity

- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Quick and easy disassembly for maintenance without special tools
- Drive units include robust handle which mounts on both sides of cassettes to allow for extra maneuverability.

Versatility

- Available with optional enhanced tilt and swivel TSP300 manifold for horizontal and vertical maneuverability, with greater durability ¹⁾
- X-Edition drive units, cassettes and most accessories are compatible with standard edition tools ¹⁾
- Drive unit compatible with UltraSlim W-SL cassettes.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across full stroke.

¹⁾ TSP300 is designed for X-Edition tools only, and is not compatible with previous edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

Two Handle Styles

Robust angled positioning handle comes standard with every W-Series (X-Edition) drive unit.

Compatible with W-Series (X-Edition) Cassettes	Model Nr. Angled positioning handles (standard)	Model Nr. Straight positioning handles (optional)
W2000X, W4000X	SWH6A	SWH6S
W8000X, W15000X	SWH10A	SWH10S
W22000X, W35000X	SWH10EA ²⁾	

²⁾ SWH10EA is an eyebolt handle.

TSP - Pro Series Swivel

The optional TSP300 tilt and swivel manifold with robust interlocking design provides 360° X-axis rotation and 160° Y-axis rotation.

How to Order ¹⁾

Factory fitted to W-Series (X-Edition) drive units: Insert a "P" prior to the "X" in the tool model number, example: **W2000PX**.

Order as an accessory using the model number: **TSP300**, which can be fitted to existing W-Series (X-Edition) drive units. Includes male and female couplers.

Page: **232**

ATEX declared. Calibration certificate included

All W-Series X-edition hexagon cassettes are CE - ATEX declared and are shipped complete with a calibration certificate.

 II 2 GD T4

Back-Up Spanners, BUS-Series

To be used to stop the back nut from turning during make up or break out. Two hexagon sizes in one tool.

▼ W4206SL ultraslim bi-hexagonal stepped width cassette with W4000X drive unit

Versatility

- Lean, stepped width design allows tool to be mounted over bolts where other tools won't fit
- Bi-Hexagonal cassette allows twice as many positioning points on nut or bolt
- Robust top mounted handle stays out of the way, providing safe fastening in hard to reach areas
- Uses same drive unit as standard W-series hexagon cassettes.

Performance

- Premium components provide best-in-class endurance compared to other limited access tools.

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Fast release drive unit enables rapid exchange of cassettes, no tools required
- Top mounted straight handle for improved tool handling and safety.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke
- Calibration certificate shipped with every cassette.

Your easy and long lasting solution to difficult access bolting applications

UltraSlim: Designed for Tight Spots

Stepped width design provides easy access in confined areas. UltraSlim cassettes fit where standard solutions won't.

Built to Outperform

High endurance components keep working when others fail.

Top Mounted Straight Handle

The top mounted straight handle is standard and provides safe and easy positioning and access to hard to reach fasteners.

Straight handle (standard)	SWH6S
Angled handle (optional)	SWH6A

ATEX declared. Calibration certificate included.

All UltraSlim Series cassettes are CE - ATEX declared and are shipped complete with a calibration certificate.

CE II 2 GD T4

Slim enough to fit and tough enough to last. This UltraSlim wrench is the perfect controlled bolting solution for this oil and gas flange. ▶

UltraSlim Bi-Hexagonal Cassettes

UltraSlim Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest grade materials, perfecting the geometry, and placing the positioning handle on top of the tool for safe fastening, Enerpac UltraSlim cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability*.

Durability of Key Components*

* Average test results, whereby three Enerpac 46 mm UltraSlim cassettes and three competitor 46 mm cassettes were tested at 5425 Nm for 50,000 cycles. The Enerpac side plates never broke for the full duration of the test.

W-SL Series UltraSlim

Nominal Torque Output:

5911 Nm

Bi-Hexagonal Range:

46 - 75 mm / 1¹³/₁₆ - 2¹⁵/₁₆"

Maximum Operating Pressure:

690 bar

Torque Pump Selection Matrix

System matched air and electric torque pumps that are ideal for use with hydraulic wrenches.

Page: 265

Torque Wrench Hoses

Use Enerpac THQ-700 Series hoses with W-Series torque wrenches to ensure the integrity of your hydraulic system.

2 meters long, 2 hoses	THQ702T
6 meters long, 2 hoses	THQ706T
12 meters long, 2 hoses	THQ712T

- ④ Straight Positioning Handle
- ⑤ Pro Series Swivel
- ⑥ Extended Reaction Arm
- ⑦ Reducer Insert
- ⑧ Reaction Paddle

Items ① to ③ are standard.
Items ④ to ⑧ are optional.

TSP WTE WRP Series

TSP-Series, Pro Series Swivel

- Robust interlocking design
- 360° X-axis and 160° Y-axis rotation
- Increases tool fit in restricted access areas
- Simplifies hose placement
- Includes male and female couplers.

For Torque Wrench Model Number	Model Number ¹⁾	Maximum Pressure (bar)	Weight (kg)
W2000X, W4000X, W8000X, W15000X, W22000X, W35000X	TSP300	690	0,2

¹⁾ To order a W-Series (X-edition) drive unit fitted with a TSP300 tilt and swivel manifold, insert a "P" prior to the "X" in the tool model number, example: **W2000PX**. TSP300 is designed for X-Edition tools only, and is not compatible with standard edition tools. For replacement components for existing tools, refer to repair sheet on www.enerpac.com

WTE-Series, Extended Reaction Arm

- Full torque rated
- Increases tool fit in restricted access areas.

For Torque Wrench Model Number	Model Number	Dimensions (mm)			Weight (kg) *
		A	B	C	
W2000X	WTE20	56	398	76	2,6
W4000X	WTE40	66	436	74	4,6
W8000X	WTE80	85	449	55	7,6
W15000X	WTE150	102	498	72	12,0
W22000X	WTE220	114	524	77	17,3
W35000X	WTE350	127	419	133	17,8

* Weights indicated are for the accessories only and do not include the wrench.

WRP-Series, Low Profile Reaction Paddles

- Lightweight interchangeable design
- Allows for offset reaction when in-line reaction is not available.

For Torque Wrench Model Nr.	Model Number	Dimensions (mm)					Weight (kg) *
		A	B	C	D	E	
W2000X	WRP20	84	16	35	45	148	0,4
W4000X	WRP40	109	21	47	59	190	0,8

W22000X	WRP220	207	37	91	134	317	7,2
W35000X	WRP350	225	42	91	182	367	10,6

* Weights indicated are for the accessories only and do not include the wrench.

Custom Torque Wrenches and Bolt Tensioners

Looking for customized components to help solve your torquing problems? Enerpac has the experience and capabilities to help find solutions to your problems.

Enerpac hydraulic torque wrenches are designed to accommodate most bolting applications. However, due to space constraints, location of reaction points or need for special sockets and adapters, there is often a need for customized components.

◀ Custom S6000X hydraulic torque wrench fitted with a custom reaction arm/socket.

◀ Enerpac Multi Stud Tensioning (MST) system capable of tensioning every single stud in a joint simultaneously.

◀ Custom hydraulic tensioners to suit 5 inch studs load output 4200 kN.

Overview Custom Torque Wrenches and Bolt Tensioners

▲ Custom S11000X torque wrench with a custom torque link and reaction roller.

Customizable features on torque wrenches:

- Reaction Arms
- Torque Links (split or layered for extremely space restricted applications)
- Reaction Roller Assemblies
- Sockets (direct drive, castellated, peg-drive, stacked)
- Drives (direct Allen, spline, square drive size)
- Hexagon Reducing and Square Drive Inserts.

Customizable features on bolt tensioners:

- Adaptor kits with puller sleeves to suit different thread and/or pitch sizes
- Nut rotating sockets to accommodate different nut A/F (across flats) sizes
- Bridges to suit round or non-standard nuts or clear obstructions
- Sockets (direct drive, castellated, peg-drive, stacked)
- Load cells with various capacities
- Screw-on tensioners to overcome space restrictions.

▼ RSL-Drive Units with interchangeable RLP-Hexagon Cassette and RSQ-Square Drive Cassette

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- 30-35° rotation angle provides added productivity while avoiding “tool lock on” which is common with some torque wrench designs.

Simplicity

- Simple robust alloy steel design with just three moving parts for reduced maintenance
- Robust handles are available for both sides and the tops of cassettes to allow for extra maneuverability
- Designed to give optimum strength to weight and torque to weight ratios
- Minimum nose radius for trouble-free tool fit.

Versatility

- Interchangeable cassette design
- Wide range of hexagon sizes available for all applications
- Reaction arm has a simple dial lock for rapid change
- For use in multiple industrial, energy, and oil and gas applications.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

Setting New Standards in Safety, Simplicity and Performance

RLP-Low Profile Hexagon Cassettes

For the metric and imperial sizes of hexagon cassettes see pages 236 - 243.

RSQ-Square Drive Cassettes

RSQ-Square Drive Cassettes are interchangeable with the RLP-Hexagon Cassettes. They all use the same RSL-drive unit.

Page: 244

Back-Up Spanners, BUS-Series

To be used to stop the back nut from turning during make up or break out. Two hexagon sizes in one tool.

Page: 217

Torque Pumps

Visit enerpac.com for system matched air and electric torque pumps that are ideal for use with hydraulic torque wrenches.

Page: 265

Torque Wrench Hoses

Use Enerpac THQ700-Series torque wrench hoses with RSL-Series torque wrenches to ensure the integrity of your hydraulic system.

2 meters long, 2 hoses	THQ702T
6 meters long, 2 hoses	THQ706T
12 meters long, 2 hoses	THQ712T

Drive Units for Hexagon & Square Drive Cassettes

One Drive, Two Tools

One RSL-Hydraulic Drive Unit fits RLP-Hexagon Cassette or RSQ-Square Drive Cassette.

RSL

RLP... / RLP...SL

RSQ

RSL Series

Maximum Torque at 690 bar:

1909 - 37.965 Nm

Hexagon Range:

7/8 - 6 1/8 inch

Hexagon Range:

27 - 155 mm

Maximum Operating Pressure:

690 bar

▼ TORQUE WRENCH OPTIONS AND ACCESSORIES

- ① RLP-Hexagon Cassette (pages 236-240)
RLP-SL-Slimline Hexagon Cassette (pages 242-243)
- ② RSQ-Square Drive Cassette (pages 244-245)
- ③ RSL-Drive Unit and Reaction Arm (page 235)

Optional Parts (page 241)

- ④ ERA-Extended Reaction Arm, for RSQ only
- ⑤ ERT-Extended Reaction Tube, for RLP only

Optional Parts (only available per request)

- ⑥ Hexagon Bit

IMPORTANT: RSL-drive units must be ordered separately to operate the RLP-Hexagon Cassettes.

Hexagon Cassettes for RSL-Series

Hexagon Range:
7/8 - 6 1/8 inch

Hexagon Range:
27 - 155 mm

Maximum Operating Pressure:
690 bar

RSL Series

Slimline Stepped-Width Hexagon Cassettes

For accessing narrow spaces RLP...SL Stepped-Width Hexagon Cassettes are available. Slimline cassettes use same drive unit as standard RLP-cassettes.

IMPORTANT: RSL-drive units must be ordered separately to operate the RLP-Hexagon Cassettes.

Hexagon Cassettes for RSL-Series

ENERPAC 

Hexagon Range:
7/8 - 6 1/8 inch

Hexagon Range:
27 - 155 mm

Maximum Operating Pressure:
690 bar

RSL Series

IMPORTANT: RSL-drive units must be ordered separately to operate the RLP-Hexagon Cassettes.

Accessories for RSL-Series Torque Wrenches

TWMP503, Torque Wrench Moly Paste

- Enerpac 503 Moly Paste reduces friction on threaded fasteners – bolts, nuts and studs
- The low and uniform friction coefficient of 0.06 (torque coefficient, K, of 0.10) creates reliable assembly conditions
- This lubricant stays in place through heat, load and vibration to insure trouble-free disassembly from -29 °C to 400 °C (-20 °F to 750 °F)
- Can of 1,8 kg (4 lb).

- Only to be used on RSL-drive units with RSQ-square drive wrenches
- Used in place of standard reaction arm
- Lightweight interchangeable design
- Full torque rated.

NOTE: Extended Reaction Arms for RSL8000 and RSL19000 are available on request.

- Only to be used on RSL-drive units with RLP-hexagon cassettes
- Used in place of standard reaction arm
- One piece steel design, durable and simple
- Increases tool fit in restricted access areas
- Full torque rated.

NOTE: Extended Reaction Tubes for RSL8000 are available on request.

▼ RSL-Drive Unit with interchangeable RLP...SL Slimline Hexagon Cassette

Simplicity

- Minimum nose radius for trouble-free tool fit which makes it uniquely equipped to access tight spaces
- Simple robust alloy steel design with three moving parts for reduced maintenance
- Robust handles are available for both sides and the tops of cassettes to allow for extra maneuverability
- Proven to perform even in the harshest environments
- Reaction arm has a simple dial lock for rapid change
- Designed to give optimum strength to weight and torque to weight ratios.

Versatility

- Interchangeable cassette design
- Drive unit / hexagon cassette combination for limited height in line solutions
- Wide range of hexagon sizes available for all applications.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

Ease of Use

- Few moving parts are easily accessible for quick field maintenance
- Innovative design that completely encloses all moving parts and minimizes pinch points.

Setting New Standards in Safety, Simplicity and Performance

Torque Pumps

Visit enerpac.com for system matched air and electric torque pumps that are ideal for use with hydraulic torque wrenches.

Slimline Stepped-Width Hexagon Cassettes for RSL-Series

Slimline Stepped-Width Hexagon Cassettes

Accessing narrow spaces normally requires significantly reducing the width of the torque wrench. For the tool operator, this has always meant vastly reduced tool durability, and/or reduced torque output.

By using the highest-grade materials and perfecting the geometry, the RSL Slimline cassettes are able to provide greater torque, get into tighter spaces, and vastly outperform the competition in product durability.

RSL Series

Hexagon Range:

1 1/4 - 3 3/16 inch

Hexagon Range:

32 - 80 mm

Maximum Operating Pressure:

690 bar

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Page: 408

Torque Wrench Hoses

Use Enerpac THQ700-Series torque wrench hoses with RSL-Series torque wrenches to ensure the integrity of your hydraulic system.

Page: 249

IMPORTANT: RSL-drive units must be ordered separately to operate the RLP-SL-Hexagon Cassettes.

* Minimum Torque Output at 69 bar: 10%

www.enerpac.com

▼ RSL drive unit with interchangeable RSQ square drive cassette

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- 30-35° rotation angle provides added productivity while avoiding “tool lock on” which is common with some torque wrench designs.

Simplicity

- Simple robust design with just three moving parts for reduced maintenance
- Robust handles are available for both sides and the tops of cassettes to allow for extra maneuverability
- Pull-type square drive release for quickly reversing the square drive for tightening or loosening.

Versatility

- Square Drive Sets available with Interchangeable Hexagon Cassettes
- Power head / square drive combination for flexible use with standard impact quality sockets
- Reaction arm has a simple dial lock for rapid change.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

Setting New Standards in Safety, Simplicity and Performance

Torque Wrench Options and Accessories

Optional accessories are available for maximum versatility. Please contact your Enerpac representative to help you select the optimum solution for your application.

Page: 241

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: 216

Back-Up Spanners, BUS-Series

To be used to stop the back nut from turning during make up or break out. Two hexagon sizes in one tool.

Page: 217

Torque Wrench Hoses

Use Enerpac THQ700-Series torque wrench hoses with RSL-Series torque wrenches to ensure the integrity of your hydraulic system.

2 meters long, 2 hoses	THQ702T
6 meters long, 2 hoses	THQ706T
12 meters long, 2 hoses	THQ712T

Torque Pumps

Visit enerpac.com for system matched air and electric torque pumps that are ideal for use with hydraulic torque wrenches.

Page: 265

Square Drive Hydraulic Torque Wrenches

RSL Series

Maximum Torque Output:
1408 - 28.002 Ft.lbs

Maximum Torque Output:
1909 - 37.965 Nm

Square Drive Range:
3/4 - 2 1/2 inch

Maximum Operating Pressure:
690 bar

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Safe T™ Torque Lock

The Safe T™ Torque Lock is suitable for all bolted applications from 190 Nm to 15.000 Nm using a heavy duty impact socket.

The patented mechanical locking system creates a hands-free torque wrench solution suitable for Enerpac only square drive tools.

Suitable for RSQ3000, RSQ5000 and RSQ11000.

¹⁾ When ordering an RSQ Square Drive Cassette, the RSL-Drive Unit must be ordered separately.

²⁾ An RSQ...ST Torque Wrench Set includes RSQ-Square Drive Cassette, RSL-Drive Unit with Hoses and Reaction Arm.

▼ Shown: DSX11000

Safety and Performance

- High-strength, light-weight aluminium, slimline design suited for complete operator safety
- Fully enclosed drive for maximum safety
- Built-in, work-at-height safety tether connection
- Retained quick release push-button
- Patented, easy-to-use, quick release, retained reaction arm
- Fine tooth ratchet prevents the tool 'locking on'
- High-cycle design with fewer moving parts making it a more efficient tool to operate, maintain or repair
- 35° rotation angle and rapid return stroke for fast operation.

Simplicity

- Includes a robust handle or handle with lifting eye bolt which mounts on either side of the tool for extra maneuverability and safer operation
- Push-button square drive and reaction arm for fast changes and adjustments
- Easily accessible work-at-height connection point.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

ATEX declared

- All DSX tools are CE - ATEX declared.

Setting Industry-First Safety Standards

Work-at-Height Connection

Built-in, work-at-height safety tether connection.

Fully Retained Reaction Arm

Patented, fully retained reaction arm with easy-to-use quick release, helps prevent injuries when working-at-height.

Secured Square Drive

Retained quick release push-button.

Ergonomic Tool Handle

Robust ergonomic positioning handle comes supplied as standard with every DSX tool. The SHW10EA is a handle with lifting eye for the DSX25000.

Compatible DSX-Series wrenches	Ergonomic Handle (Standard)
DSX1500, 3000, 5000	SWH6A
DSX11000	SWH10A
DSX25000	SWH10EA

Bolting Integrity Software

Enerpac Bolting Integrity Software Solutions play a key role in

implementing and managing an Integrity Program for bolted connections.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as a combined Application Data Sheet and Joint Completion Report.

Custom Joint information can also be entered. See page 412.

Square Drive Hydraulic Torque Wrenches

Standard are: ① ② ③ ④ ⑤

Item ⑥ is optional.

- ① Drive Unit
- ② Reaction Arm
- ③ Hose Swivel
- ④ Ergonomic Tool Handle
- ⑤ Square Drive
- ⑥ Allen Key-Drive (option)

Select the Right Torque
Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

▼ THQ706T

Twin Torque Wrench Hose

- Thermo-plastic safety dual hoses
- For use S, W, RSL, DSX and HMT-Series torque wrenches and 700 bar torque pumps
- With 1/4" Spin-on Torque Wrench Couplers
- For demanding applications, featuring a 4:1 safety factor
- Maximum working pressure of 700 bar
- Outside jacket is polyurethane, to provide maximum abrasion resistance
- Low volumetric expansion under pressure to enhance overall system efficiency
- Crimped-on vinyl strain relief for improved life and durability on all models.

Use the THQ-Series hoses with Enerpac torque wrenches and pumps to ensure the integrity of your hydraulic system. ▶

THQ Series

Hose Lengths:

2, 6 and 12 metres

Maximum Operating Pressure:

700 bar

HT, B-Series, 1500 bar Hoses and Fittings for Tensioning

Bolt tensioning equipment require different hoses, couplers and fittings than torque wrenches and pumps.

Page: 301

Premium Hydraulic Oil

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

▼ HMT-Drive Units with interchangeable HLP-Low Profile Cassette and HSQ-Square Drive Cassette

The HMT-Series is a range of fast, durable and efficient modular hydraulic torque wrenches, enabling you to tackle almost any bolting application. Interchange cassettes with ease, switching the HLP low profile hexagon cassette with the HSQ square drive whenever your application demands.

As an added benefit, tools and cassettes are interchangeable with many other well-known brands, allowing you the freedom to use the tools at your disposal whilst reducing the cost of upgrading your legacy torque wrench inventory to high quality Enerpac equipment.

The tool itself has been carefully designed and manufactured, utilising superior alloys and surface treatments to make it lightweight, up to 25% faster and more than twice as durable as other tools in the same class.

Safety and Performance

- Supplied with an ergonomic tool safety handle as standard
- The HMT Modular Torque/Tool is also supplied with a link pin retainer as standard.

Versatility

- Interchangeable with other manufacturers
- HMT is able to solve all of your bolting challenges quickly and safely, with one or more attachment options, making it suitable for any application.

Simplicity

- The HMT is part of a modular system which is made up of a single power head and one attachment; the HMT-Drive Unit and HLP-Hexagon Cassette or HSQ-Square Drive Cassette.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

Modular, Durable, Fast and Efficient Torque for Low Profile and Square Drive Applications

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Optional Parts for HLP-Hexagon Cassettes

- Full torque rated
- Includes pin to secure onto HLP-cassette
- ⑥ HRP: allows offset reaction when in-line reaction point is not available
- ⑦ HTE: Increases tool fit in restricted areas.

For HMT with HLP-Series Hexagon Cassettes	Reaction Paddle Model Nr. ⑥	Extended Reaction Arm Model Nr. ⑦
HMT1500 + HLP1	HRP15	HTE15
HMT3500 + HLP3	HRP35	HTE35
HMT7500 + HLP7	HRP75	HTE75
HMT13000 + HLP13	HRP130	HTE130

Hexagon Cassettes for HMT-Drive Units

Hexagon Range:
1 1/16 - 4 5/8 inch

Hexagon Range:
27 - 115 mm

Maximum Operating Pressure:
690 bar / 10.000 psi

**HLP
Series**

▼ **SELECTION CHART**

IMPORTANT: HMT-drive units must be ordered separately to operate the HLP-Hexagon Cassettes.

▼ HMT drive unit with HSQ square drive cassette

Modular, Durable, Fast and Efficient Torque for Low Profile and Square Drive Applications

Safety and Performance

- Innovative design that completely encloses all moving parts and minimizes pinch points
- Supplied reaction arm as standard
- Fully adjustable 360 degree in-line reaction arm
- Fine tooth ratchet prevents locking-on.

Simplicity

- Simple robust design with just three moving parts for reduced maintenance
- Push button, quick release, reversible square drive.

Versatility

- The reaction arm, positioned around the square drive instead of the back of the drive unit, provides you with the possibility to turn the drive unit away from an obstacle.

Accuracy

- Constant torque output provides accuracy of $\pm 3\%$ across the full stroke.

Ergonomic Tool Handle

Robust ergonomic positioning handle comes standard with every HMT Drive Unit.

Compatible HMT-Series drive units	Ergonomic Handle (Standard)
HMT1500, 3500, 7500	SWH6A
HMT13000	SWH10A

BUS-Series, Back-Up Spanners

To be used to stop the back nut from turning during make up or break out. Two hexagon sizes in one tool.

Page: 217

Torque Wrench Hoses

Use Enerpac THQ-Series hoses with HMT-Series torque wrenches to ensure the integrity of your hydraulic system.

2 m long, 2 hoses	THQ702T
6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

HSQ, Square Drive Hydraulic Torque Wrenches

Bolting Integrity Software

Visit enerpac.com to access our free on-line bolting software application. A comprehensive free online software solution for Bolted Joint Integrity.

Integral databases hold data for:

- BS1560, MSS SP44, API 6A and 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants

- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools.

Custom Joint information can also be entered

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as a combined Application data sheet and Joint completion report.

Page: 412

HSQ Series

Maximum Torque at 10.000 psi:

1541 - 7562 Ft.lbs

Maximum Torque at 690 bar:

2089 - 10.252 Nm

Square Drive Range:

3/4 - 1 1/2 inch

Maximum Operating Pressure:

690 bar / 10.000 psi

BSH-Series Sockets

Heavy-Duty Impact Sockets for power driven torquing equipment.

Page: 216

Select the Right Torque

Choose your Enerpac Torque Wrench using the untightening rule of thumb: Loosening torque equals about 250% of tightening torque.

Torque Pumps

Visit enerpac.com for system matched air and electric torque wrench pumps that are ideal for use with hydraulic torque wrenches.

Page: 265

SELECTION CHART

Maximum Torque Output		Square Drive Size (inch)	Square Drive Cassette * Model Number	Dimensions (inch)							Weight (lbs)	Dimensions (mm)							Weight (kg)
(Ft.lbs)	(Nm)			A	B	C	D	E	F	G		A	B	C	D	E	F	G

7562	10.252	1 1/2	HSQ7500	9.60	10.08	9.25	1.99	4.33	3.23	6.32	25.13	244	256	235	51	110	82	161	11,4

* **IMPORTANT:** HMT-drive units must be ordered separately to operate the HSQ-Square Drive Cassettes.

▼ Shown from left to right: E291, E393, E494

- High-efficiency planetary gear sets achieve high output torque from low input torque
- Operator protected by anti-backlash device
- Reversible, tighten or loosen bolts
- Reaction bar or reaction plate style
- Angle-of-turn protractor standard on E300-Series models
- Reaction plate models offer increased versatility with reaction point locations
- E300 and E400-Series have replaceable shear drives, providing overload protection of internal power train
- One replacement shear drive is included with each E300 and E400-Series models.

Accurate, Efficient Torque Multiplication

When accurate make-up or break-out of stubborn fasteners requires high torque

Typical Torque Multiplier Applications

- Locomotives
- Power plants
- Pulp and paper mills
- Refineries
- Chemical plants
- Mining and construction
- Off-road equipment
- Shipyards
- Cranes.

BUS-Series, Back-Up Spanners

To be used to stop the back nut from turning during make up or break out. Two hexagon sizes in one tool.

Page: 217

◀ Enerpac Reaction Bar Torque Multiplier E393 used to manually torque bolts up to 4300 Nm.

▼ SELECTION CHART

Torque Multiplier Type	Nominal Torque Output		Model Number
	(Nm)	(Ft.lbs)	
Reaction Bar Multiplier	1020	750	E290PLUS
	1358	1000	E291
	1627	1200	E391
	2983	2200	E392
	4340	3200	E393
Reaction Plate Multiplier	2983	2200	E492
	4339	3200	E493
	6779	5000	E494
	10.846	8000	E495

Manual Torque Multipliers

Manual Torque Multipliers

Enerpac manual torque multipliers provide efficient torque multiplication in wide clearance applications and when external power sources are not available.

Manual torque multipliers are used in most industrial, construction, and equipment maintenance applications. Hydraulic torque wrenches are better suited for tight tolerance, flange and repetitive bolting applications.

Use Reaction Bar Models:

- Where space is limited,
- Where multiple reaction points are available,
- when portability is desirable.

Use Reaction Plate Models:

- Above 4300 Nm output torque,
- On flanges and applications where neighbouring bolt or nut is available to react against
- When extreme reaction forces are generated.

E Series

Nominal Torque Output:

1020 - 10.846 Nm

Torque Ratio:

3:1 - 52:1

Selector Pawl

Models with anti-backlash protection have directional selector pawls. Set the pawl for clockwise or counter-clockwise rotation.

Angle-of-Turn Protractor

E391, E392 and E393 models include an angle-of-turn protractor (scale) to tighten fasteners using a "torque turn" method. Allows accurate measuring a specific number of degrees of rotation.

Shearable Square Drive

Provides overload protection on E300- and E400-series multiplier's power train by shearing when the rated capacity of the tool is exceeded. Internal shear pin prevents tool from falling off bolt.

CAUTION!

Never use impact air tools for power driving torque multipliers. Torque multiplier drive train damage will occur.

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

¹⁾ E200 and E400-series do not have an Angle-of-Turn Protractor (scale).

²⁾ User must verify manual torque wrench accuracy prior to use to ensure accurate final output torque.

▼ PTW1000

Productivity

- High speed continuous rotation for constant torque output
- Low friction planetary gearbox design minimizes wear and extends uptime.

Safety

- Ergonomic, low vibration design reduces fatigue and the risk of vibration related injuries for the operator
- Low noise air motor provides quiet, consistent performance for indoor and outdoor applications.

Convenience

- Provided with standard reaction arm; wide assortment of custom arms and accessories are available
- Available with or without Filter-Regulator-Lubricator (FRL)
- Unique calibration certificate provided with each tool.

◀ The PTW1000 makes quick work of this flange maintenance job.

Continuous Rotation Controlled Torque

Calibration Certificate

All PTW-Series tools are CE declared and are shipped complete with a calibration certificate.

FRL120C, Filter-Regulator-Lubricator with air hose

All PTW-Series tools are shipped complete with standard reaction arm, and Filter-Regulator-Lubricator (FRL120C).

MCS-Series, Mobile Calibration System

To check torque accuracy, run calibration tests and create calibration certificates prior to the use of continuous rotation torque tools in various applications while on a job site.

Page: 264

▼ PTW-Series Pneumatic Torque Wrenches are ideal for applications where speed and precision are critical, such as track maintenance.

Pneumatic Torque Wrenches

PTW-Series, Pneumatic Torque Wrenches

Enerpac PTW-Series Pneumatic Torque Wrenches are designed for applications that require speed and control.

The standard package includes a Torque Wrench with a calibration certificate, an FRL (Filter/Regulator/Lubricator), and a 3 m long, 1/2" inch (13 mm) diameter air hose, which connects the FRL to the wrench.

Once the air hoses are connected, the operator simply adjusts the air pressure on

the FRL to achieve the desired torque using the calibration certificate. After this, the tool is ready to go to work! *

The air source used with the PTW system must be regulated and/or limited to 8,3 bar, and must be capable of providing a volume of at least (85 m³/h) at 6,9 bar. A separate 1/2" inch hose (not included) must be used to connect the FRL to the air supply.

* See instruction manual for comprehensive instructions.

PTW Series

Nominal Torque Output:

8135 Nm

Square Drive Range:

3/4 - 1 - 1 1/2 inch

- ① PTW Torque Wrench
- ② Standard Reaction Arm
- ③ FRL120C Filter-Regulator-Lubricator with 3 meters air hose

Accessories

Enerpac offers a full line of accessories including a range of reaction arms and drives.

678	500	2712	2000	1	PTW2000C	8,0	286	83	79	133	8,8
1220	900	4067	3000	1	PTW3000C	3,1	343	83	95	133	10,4
1763	1300	8135	6000	1 1/2	PTW6000C	2,5	366	114	127	178	17,7

¹⁾ To order without FRL120C, remove "C" suffix from model number (example: **PTW3000**).

²⁾ Weight does not include reaction arm. Reaction arm weight for PTW1000, PTW2000, PTW3000 is 1,3 kg and for PTW6000 is 3,5 kg.

Accessories for PTW-Series Torque Wrenches **ENERPAC**

▼ Shown: Accessories for PTW-Series Torque Wrenches

- Accessories for further extending the application range of pneumatic torque wrenches
- Extended drives increases tool fit in restricted access areas.

PTW-Accessories

Enerpac offers the following accessories to support a wide variety of applications in industries such as mining, power generation and oil & gas. For additional custom accessories not pictured here, please contact Enerpac.

Applications

PTW-Series Pneumatic Wrenches are designed for applications that require speed and control.

Mining

- Track maintenance
- Undercarriage maintenance
- Wheel maintenance
- Shovel maintenance

Power Generation

- Turbine bolts
- Tower segments
- Turbine casings

Oil & Gas

- Pipe flanges
- Valves
- Manway covers
- Pressure vessels

▼ PTW-Wrenches are ideal for applications where speed and precision are critical, such as track or wheel maintenance.

4	Sliding Reaction Arm	SLRATWS	For widely spaced and uneven bolt centers	112	381	203	102
5	Double Straight Reaction Arm	DSATWS	Reduces time to reposition arm *	73	406	19	102
6	Straight Reaction Arm	SRATWS	Long plate for wide spaced reaction points	73	240	19	51
7	Blank Reaction Arm **	BLTWS	Weldable blank for custom applications **	72	151	25	51

For use with PTW6000-models

1	Extended Drive 6 inch (152 mm)	ED6TWL	Nose extension, primarily for truck wheel bolts	84	232	102	-
1	Extended Drive 12 inch (305 mm)	ED12TWL	Nose extension, primarily for truck wheel bolts	84	384	102	-
2	Standard Reaction Arm	RATWL	Standard arm included with PTW model	102	229	146	32
3	Extended Reaction Arm	ERATWL	Long plate for use with deep well sockets	102	254	184	64
4	Sliding Reaction Arm	SLRATWL	For widely spaced and uneven bolt centers	152	419	190	114
5	Double Straight Arm	DSATWL	Reduces time to reposition arm *	102	508	32	57
6	Straight Reaction Arm	SRATWL	Long plate for wide spaced reaction points	102	305	32	57
7	Blank Reaction Arm **	BLTWL	Weldable blank for custom applications **	102	152	32	57

* Time to reposition arm when repeatedly moving from tightening to loosening.

** WARNING: Blank reaction arms must be heat treated to HRc 38-42 prior to use.

▼ STTC2000 Safe T™ Torque Checker

Safety & Accuracy

- Durable mobile testing device for Enerpac hydraulic torque wrench systems
- Delivering ultimate on site accuracy, testing the entire wrench, pump and hose system to be used on the job
- Consistent and repeatable $\pm 1\%$ accurate range.

Durability

- Durable splash-proof keypad and display for those harsh working environments
- Impact-resistant composite carry case.

Simplicity

- Allows the user to validate & test the exact system (torque wrench, pump, hose, etc.) to give a digital read out in Ft.lbs or Nm
- Easy to operate: power up and start testing
- Transportable: all in one compact carry case, ideal for use on the road with its durable internal 3,6 V-2,2 Ah Lithium-ion battery.

Versatility

- Can test all Enerpac S, W, RSL, HMT and DSX-Series wrenches of both square drive and hexagon cassettes up to 16.100 Ft.lbs (21.800 Nm)
- Hexagon Reducers or Square Drive Sockets to be bought separately.

Hexagon Reducer (nr. 9) must be bought separately: see selection tables on next page. ►

Quick, simple and accurate mobile torque system safety testing device

Applications

All bolted joints from 144 Ft.lbs up to 16.100 Ft.lbs (195 - 21.800 Nm).

- All Enerpac torque wrenches up to the maximum capacity of the Torque Checker. Also for other brands that fit the envelope of the Torque Checker.
- Oil & Gas flanges,
- Tower Crane installation,
- Bigger machine installation/assembly,
- Wind Tower installation etc.

Industries:

- Oil & Gas, Petrochemical,
- Wind Power Generation,
- Marine,
- Manufacturing,
- Mining, Rail and more.

Safe T™ Torque Checker

Safe T™ Torque Checker

Mobile, compact safety device allows the end user to instantly validate the performance of the entire system to be used - not just the wrench only. Allows the user to test the system on-site and in situ.

The user can validate and test the exact torque system (wrench, pump, hose, etc) to give an accurate digital read out.

Safety

The user can verify if the torque system is safe to operate, functioning correctly and within the desired safety parameters.

Unique from Enerpac

No need to wait for annual calibration tests to be confident in the performance and safety of your equipment. The Safe T™ Torque Checker equipment can be validated in seconds, saving time and money.

Hexagon Reducers

The W-Series Hexagon Reducers from the tables below, can be used with all W, RLP and HLP-Series hexagon cassettes.

STTC Series

Max. Testing Output:

16.100 Ft.lbs (21.800 Nm)

Accuracy:

± 1%

Battery:

3,6 V Lithium-ion

¹⁾ With 3,6 V-2,2 Ah Lithium-ion battery.

²⁾ Square drive sockets, hexagon cassettes and hexagon reducers must be bought separately.

▼ MCS7500C, Mobile Calibration System

MCS Series

Measurable Output Torque Range:
200 - 10.000 Nm

Measurable Output Torque Range:
148 - 7378 Ft.lbs

Female Square Drive:
1½ inch

Accuracy

The calibration system is a calibrated instrument qualified in a UKAS certified laboratory. The accuracy of the MCS7500C is calibrated to meet or exceed: 1% of FSD from 2% to 8% of torque range and 1% of reading from 8% to 100% of torque range.

Versatility

- Accurately measures torque output for continuous rotation tools and square drive hydraulic (*) torque wrenches from 200 - 10.000 Nm (148 - 7375 Ft.lbs)
- Adaptable design enables use with a large variety of Enerpac and competitive wrenches
- Internal Li-ion battery pack, external power via 5V DC USB power supply.

Performance

- Certificate Manager feature enables quick and easy creation of calibration certificates
- Tool database feature allows specific wrench data and calibration results to be recorded and saved for future use
- Each MCS comes with a standard ISO17025 calibration certificate.

Ease of Use

- Compact design in carrying facilitates easy transport, allowing calibration to be carried out in the shop, on jobsites, or even in a vehicle
- Integrated digital interface enables torque values to be displayed, saved, printed or transferred to a computer.

Female Reducer Set

The Female Reducer Set consists of two reducers: 1½ x 1 inch and 1½ x ¾ inch. To be ordered separately as **MCS7500RS**.

Additional Reaction Block and Adaptor

A heavy-duty adjustable reaction block in combination with one of the three adaptors is required to facilitate the use with S, RSQ and DSX-Series Square Drive Wrenches as well as most competitive hydraulic wrenches to maximum 10.000 Nm (7375 Ft.lbs). Drawings of additional reaction block and adaptor are available upon request.

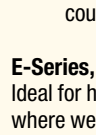

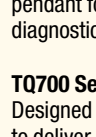

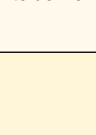

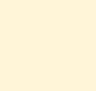

Minimum Measurable Torque Output		Nominal Measurable Torque Output		Female Square Drive	Model Number **	Description	(kg)
(Nm)	(Ft.lbs)	(Nm)	(Ft.lbs)				
200	148	10.000	7375	1½	MCS7500C	MCS with carrying case	40

* Additional Reaction Block and appropriate Adaptor is required with the use of S, RSQ and DSX-Series square drive hydraulic wrenches.

** Not suitable for use with impact tools or low profile torque wrenches.

Optimum Wrench-Torque Pump Combinations

For optimum speed and performance Enerpac recommends the following system set-up with wrench-pump-hose combinations. For other combinations, consult your Enerpac bolting expert or your authorized Enerpac distributor.

XC-Series, Portable Cordless Pumps
Ideal for maintenance bolting applications at sites that do not have access to power or where having extension cords or air hoses could cause trip hazards.

E-Series, E-Pulse Portable Torque Pumps
Ideal for high volume fastening applications where weight is critical. Feature an interactive pendant for operation, programming and diagnostics.

TQ700 Series Electric Torque Pumps
Designed for both portability and production, to deliver superior bolting speed.

ZU4T-Series, Electric Torque Pumps
Works well with long extension cords or generator driven electrical power supplies. Available in **Pro** and **Classic** formats.
ZU4T Pro Pumps have an LCD feature to display torque or pressure, selectable torque wrench, and self-diagnostics.
ZU4T Classic Pumps feature an analogue gauge and a basic electrical package to deliver durable, safe and efficient hydraulic power.

ZE-T Series Electric Torque Pumps
Features LCD to display torque or pressure values, and self-diagnostics. With induction motor, making the ZE-Series the coolest and quietest pumps in their class.

LAT-Series, Lightweight Torque Air Pumps
Combines compact design and high productivity for bolting applications in areas hard to access with larger air powered pumps.

ZA4T-Series Air Driven Torque Pumps
This air driven pump is best suited to power medium to large size torque wrenches.

THQ-Series, Torque Wrench Hoses
Use Enerpac THQ-Series twin hoses with all torque wrenches to ensure the integrity of your hydraulic system (see page 249).

▼ XC1502TE

- Ideal for maintenance bolting applications requiring portability and convenience
- Interactive pendant provides visual and vibration feedback of pump operation
- Superior run-time with 5Ah, 28V battery
- 6 metres detachable pendant control
- 100 mm glycerine-filled gauge for easy viewing
- Bladder reservoir allows pump to be used in any position
- High-strength fiberglass reinforced composite housing provides superior durability in demanding job site environments
- Integrated handle and carrying strap for portability.

Portable Battery Pump for Torque Applications

28-Volt Battery

The **XC28V5** 5 Amps battery with Lithium-Ion technology for maximum battery performance.

Battery Charger

1-hour quick charger.

115V battery charger

XC115VC

230V battery charger

XC230VC

Roll Cage

Roll cage accessory option for both XC-TW and XC pump. Please order model number **XCRCTK**.

Torque Wrenches

The following torque wrenches are ideal for use with the XC-Series Cordless Torque Wrench Pumps:

S	W	RSL	DSX	HMT
S1500X	W2000X	RSL1500	DSX1500	HMT1500
S3000X	W4000X	RSL3000	DSX3000	HMT3500
		RSL5000		HMT7500

Larger torque wrenches will work with the pump, battery run time and application speed will be impacted.

Page: 265

XC-Series, Cordless Torque Wrench Pumps

Battery-Powered Torque Wrench Pumps

The XC-Series Cordless Torque Wrench pump is ideal for maintenance applications in the PowerGen, Oil & Gas and MRO markets. This portable pump is perfect for remote locations, sites that do not have access to power or where trip hazards are a concern.

The interactive pendant allows the user to set and clear pressure and operate in manual or auto-cycle mode. The pump has an easily accessible user adjustable valve for precise pressure control.

Torque Wrench	Nut A/F (mm)	Stud (mm)	Pressure (bar)	Torque (Nm)	Fasteners torqued
S3000X	60	38	330	2035	32
W2000X	60	38	350	1356	52

XC Series

Reservoir Capacity:
2,0 litres

Flow at Rated Pressure:
0,25 l/min

Motor Size:
0,37 kW

Maximum Operating Pressure:
700 bar

Torque Wrench Hoses

Use Enerpac 700 bar THQ-Series torque wrench hoses with torque wrenches and pumps. See page 249.

2 m long, 2 hoses	THQ702T
6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

▼ EP3504TE, E-Pulse Torque Wrench Pump

Performance

- Two-stage pump with high by-pass pressure: 1,0 l/min at 200 bar, 0,52 l/min at 700 bar
- Smart controls enable motor to maintain constant power across the pressure range
- 24VDC power regulator minimizes effects of poor power supply
- Six-piston block design provides even flow for smooth operation.

Durability

- Durable aluminium housing
- Integrated heat exchanger minimizes heat buildup
- High-efficiency permanent magnet, direct drive motor enables continuous use and long service life
- Built-in thermal protection
- IP Rating: IP54 on the pump, IP67 on the pendant.

Convenience

- Integrated calibrated pressure gauge
- Interactive pendant with smart controls
- Pendant and cord management system
- Intelligent Auto-Cycle enables press and release actuation to cycle torque wrench until final torque is achieved
- User can set pressure and operate in manual or auto-cycle mode
- Convenient oil fill port, oil level indicator and automatic breather.

Productivity through innovation

Bolting Integrity Software

A comprehensive on-line software solutions for Bolted Joint Integrity. The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application Data Sheet and Joint Completion Report. Custom Joint information can also be entered.

Page: 412

Torque Wrenches

The following torque wrenches are ideal for use with the E-Pulse Torque Wrench Pumps:

S	W	RSL	DSX	HMT
S1500X	W2000X	RSL1500	DSX1500	HMT1500
S3000X	W4000X	RSL3000	DSX3000	HMT3500
		RSL5000	DSX5000	HMT7500

Larger torque wrenches will work with the pump, but application speed will be impacted.

Page: 265

Torque Wrench Hoses

Use Enerpac 700 bar THQ-Series torque wrench hoses with torque wrenches and pumps. See page 249.

2 m long, 2 hoses	THQ702T
6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

E-Pulse®, Electric Torque Wrench Pumps

E-Pulse Torque Wrench Pumps

The Enerpac E-Pulse Electric Torque Wrench Pump, through its innovative design, is ideal for high volume fastening applications where weight is a critical factor. Smart controls enable the motor to maintain constant power providing higher flow than traditional pumps.

The durable aluminum housing, integrated heat exchanger and highly efficient permanent magnet motor minimize heat buildup in the toughest environments. The interactive pendant provides the operator a number of usage options for optimal efficiency. The E-Pulse Torque Wrench Pump is the pinnacle of bolting equipment.

E Series

Reservoir Capacity:

3,0 litres

Flow at Rated Pressure:

0,52 l/min

Motor Size:

0,63 kW

Maximum Operating Pressure:

700 bar

Interactive Torque Wrench Pendant

- User can set pressure and operate in manual or auto-cycle mode
- Intelligent Auto-Cycle enables press and release actuation to cycle torque wrench until final torque is achieved.

* Pump model with multi-port manifold.

¹⁾ with oil

▼ TQ700E

- Optimized flow technology – three stage pump maximizes productivity of the pump and tool while minimizing heat build-up and down time
- Heat exchanger is standard included
- A quiet (<85 dBA), lightweight pump with a compact footprint – easy to move around and through the work site
- Durable roll cage with an ergonomically sized handle and shielded gauge – a pump that is easy to put into position and safe from on site operational hazards
- Maintenance made simple with a brushless motor designed for continuous usage
- Straightforward operation with a simple pressure set and convenient to use 6 m pendant control – immediate productivity for crews operating the pump
- IP55 Rating for Superior Dust and Water Protection
- Transparent gauge overlays in Nm and Ft.lbs for all Enerpac torque wrenches provide a quick torque reference.

The TQ700E and the W-Series wrenches are a productive combination in wind applications.

Lightweight Torque Wrench Pumps

Four Port Manifold

The TQ700 offers an optional four wrench manifold as an accessory factory installed. (Add suffix "M" at the end of the model number.

For example: **TQ700EM**).

Torque Wrench Hoses

Use Enerpac 700 bar THQ-Series torque wrench hoses with torque wrenches and pumps.

2 m long, 2 hoses	THQ702T
6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

Hydraulic Torque Wrenches

Enerpac offers a complete range of square drive and hexagon cassette torque wrenches.

Page: 211

Overlay Kit with Gauge

Available separately for use with TQ-Series: **GT4015Q** includes gauge and torque overlays for all Enerpac torque wrenches.

TQ700 Applications

The TQ700 Series pump is ideal for powering hydraulic wrenches for the Power Generation and Wind Markets.

Bolting speed is more complex than how much flow per minute the pump produces. The key is optimising the flow rate across the entire bolting cycle. With more oil flowing at the right time and at the right volume, you achieve the optimized flow for a hydraulic bolting system.

The result of this optimized flow is more bolts tightened faster and a more productive work team.

Internal laboratory testing based on standard torquing procedure on a pipe flange with 14, 1 1/2" bolts.

TQ Series

Reservoir Capacity:

4,0 litres

Flow at Rated Pressure:

0,5 l/min

Motor Size:

0,75 kW

Maximum Operating Pressure:

700 bar

Torque Pump Selection Matrix

Z Tough, Dependable Innovative CLASS

Classic Electrical

Basic electrical package includes mechanical contactor, ON/OFF toggle switch, pendant with electro-mechanical push buttons, 24V transformer timer and operator accessible circuit breaker.

- Features Z-Class high-efficiency pump design; higher oil flow and bypass pressure, cooler running and requires 18% less current draw than comparable pumps
- Powerful 1,25 kW universal electric motor provides high power-to-weight ratio and excellent low-voltage operating characteristics
- High-strength, molded composite shroud protects motor and electrical components, while providing an ergonomic, non-conductive handle for easy transport
- Low-voltage pendant provides additional safety for the operator.

Pro Series pump only

- LCD readout provides pressure display and a number of diagnostic and readout capabilities never before offered on a portable electric pump
- AutoCycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without auto cycle feature).

Pro-Series

Back-lit LCD and Pressure Transducer featuring Auto-Cycle Technology.

- Torque wrench model is selectable
- "Auto cycle" setting easily programmable.
- Digital read-out and "Autocycle" setting
- Pump usage information, hour and cycle counts
- Low-voltage warning and recording
- Self-test and diagnostic capabilities
- Information can be displayed in English, French, German, Italian, Spanish and Portuguese
- Pressure transducer is more accurate and durable than analog gauges
- Easy-viewing variable rate display
- Display pressure in bar, MPa or psi.

◀ Any brand of hydraulic torque wrench can be powered by the portable ZU4T-Series torque pump.

Z-Class – A Pump For Every Application

Patented Z-Class pump technology provides high bypass pressures for increased productivity – important in applications using long hose runs and high pressure-drop circuits, like heavy lifting or certain double-acting tools.

Enerpac ZU4T-Series pumps are built to power small to large torque wrenches. Choosing the right ZU4T-Series torque wrench pump for your application is easy.

Classic Electric Torque Wrench Pump

- The Classic has traditional electro-mechanical components (transformers, relays and switches) in place of solid-state electronics. The Classic delivers durable, safe and efficient hydraulic power.

Pro Series Electric Torque Wrench Pump

- Digital (LCD) display features a built-in hour meter, pressure display and shows self-diagnostic, cycle-count and low voltage warning information. These premium features are not available on any other pump – anywhere!
- Auto-Cycle feature provides continuous cycle operation of the torque wrench as long as the advance button is pressed (pump can be used with or without Auto-Cycle feature).

OIL FLOW VERSUS PRESSURE

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches.

Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

Heat Exchanger

- Removes heat from the bypass oil to provide cooler operation
- Stabilizes oil viscosity, increasing oil life and reduces wear of pump and other hydraulic components.

Accessory Kit * Model Nr.	Can be used on ZU4T-Series torque pumps

Improved Operator Efficiency and Ergonomics

- Easy to lift, transport and maneuver
- Hand carry where no crane, hoist or elevator is available
- One person transport up ladders and stairs
- Ideal for use on narrow or constrained scaffolding, catwalks, pipe racks and lifts.

High Productivity

- Proven 3 piston design provides leading fastening and breakout speed to stay on time and under budget
- ATEX certified to meet worksite compliance requirements.

Reduce Equipment Downtime

- Roll cage with reinforcement to support and protect FRL
- Rugged 1/2" NPTF air supply connection with integrated roll cage support
- Key components are easy to access and service.

Standard Features

- 4,5 m pendant cord for mobility around work site
- 100 mm calibrated gauge with certificate, scale in bar and psi
- Roll cage and Filter-Regulator-Lubricator (FRL).

Lightweight and Compact

Z Tough, Dependable Innovative CLASS

ZA4208TX-QRU105 Complete Set with Pump, Hose THQ706T and Roll Cage:

- Fine air pressure adjustment for very accurate torque control
- High bypass pressure (180 bar) for faster torque cycles
- Improved wrench performance at low pressure

Standard ZA4T-pump models:

- Two-speed operation and 100 bar by-pass pressure reduces cycle time for improved productivity
- Glycerin filled pressure gauge with transparent overlays in Nm and Ft.lbs for Enerpac torque wrenches provide a quick torque reference
- Standard Regulator-Filter-Lubricator with removable bowls and auto drain
- Heat exchanger warms exhaust air to prevent freezing and cools the oil
- Ergonomic pendant allows remote operation up to 6 m.

◀ Most hydraulic torque wrenches can be powered by the Enerpac ZA4T-Series torque pumps.

Gauge with Overlay Kit

Gauge Overlay Kits are available separately for use with ZA4T-Series pumps:

GT4015Q includes gauge and overlays for all Enerpac all S, W, RSL, DSX and HMT-Series torque wrenches.

Flow at Rated Pressure:

1,0 l/min

Air Consumption:

600 - 2840 l/min

Maximum Operating Pressure:

700 bar

OIL FLOW VERSUS PRESSURE

6,9 bar dynamic air pressure at 2840 l/min

Accessory Options

Available by placing the following additional suffix at the end of the model number:

- K** = Skid bar
- M** = 4-wrench manifold
- R** = Roll cage.

Page: 282

▼ ZA4208TX-QRU105 for improved wrench performance and torque control at low pressure.

COMMON PUMP MODELS

For Use With Torque Wrenches	Maximum Operating Pressure (bar)	Model Number	Reservoir Capacity (litres)	Weight (kg)
all S, W, RSL, DSX and HMT-Series	700	ZA4208TX-QRU105 *	6,8	45
	700	ZA4204TX-Q	4,6	42
	700	ZA4208TX-Q	6,8	47
	700	ZA4204TX-QR **	4,6	46
	700	ZA4208TX-QR **	6,8	51

* Standard with roll cage, with THQ706T hose and fine air pressure adjustment for very accurate torque control. Pump weight 45 kg, complete set including hose weight 58 kg.

** With Roll Cage.

Skid Bar

- Provides greater pump stability on soft or uneven surfaces
- Provides easy two-handed lift.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque pumps
SBZ-4	Reservoir 04 and 08

* Add suffix **K** for factory installation. Weight skid bar 2,2 kg.
Ordering Example: ZA4208TX-QK

4-Wrench Manifold

- For simultaneous operation of multiple torque wrenches
- Can be factory installed or ordered separately.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque pumps
ZTM-Q	for 700 bar torque wrenches

* Add suffix **M** for factory installation. This option cannot be installed onto the ZA4208TX-QRU105 pump, as the valve manifold is different. Weight manifold 4,5 kg.
Ordering Example: ZA4208TX-QM

Roll Cage

- Protects pump
- Provides greater pump stability.

Accessory Kit * Model Nr.	Can be used on ZA4T-Series torque pumps
ZRC-04	Reservoir 04 and 08

* Add suffix **R** for factory installation. Roll cage weight 3,4 kg.
Ordering Example: ZA4208TX-QR

Torque Wrench Couplers

For Enerpac torque wrench couplers see our "System Components" section in this catalogue.

Torque Wrench Hoses

Use Enerpac twin safety hoses to connect your torque wrench to the pump.

For 700 bar	Model-Nr.
2 m long, 2 hoses	THQ702T
6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

Ordering Matrix and Specifications

▼ This is how a ZA4T-Series pump model number is built up:

Z	A	4	2	08	T	X	-	Q	M	R
1 Product Type	2 Motor Type	3 Flow Group	4 Valve Type	5 Reservoir Size	6 Valve Operation	7 Voltage		8 Must be Q	8 Options	8 Options

1 Product Type

Z = Pump series

2 Motor Type

A = Air motor

3 Flow Group

4 = 1,0 l/min @ 700 bar

4 Valve Type

2 = Torque Wrench Valve

5 Reservoir Size

04 = 4,6 litres

08 = 6,8 litres

6 Valve Operation

T = Air operated valve with pendant

7 Voltage

X = Not applicable

8 Options

Q = 700 bar couplers for use with Enerpac or other torque wrenches

K = Skid bar

M = 4-wrench manifold

R = Roll cage

ZA4T Series

Reservoir Capacity:

4,6 - 6,8 litres

Flow at Rated Pressure:

1,0 l/min

Air Consumption:

600 - 2840 l/min

Maximum Operating Pressure:

700 bar

How to order your ZA4T-Series torque pump

Model No. ZA4208TX-QMR

700 bar pump for use with Enerpac S-, W-, RSL, DSX and HMT-Series and other 700 bar torque wrenches, 6,8 litres reservoir, 4-wrench manifold, and roll cage.

Torque Pump Selection Matrix

For optimum speed and performance see the torque wrench and pump matrix.

New ZA4T with Stainless Steel Roll Cage and Certified Lifting Eye

- **Stainless-Steel Roll Cage** resists corrosion
- **Certified Lifting Eye** for transporting pump between levels
- **Two-speed operation** and high by-pass pressure reduces cycle time for improved productivity
- **Integrated heat exchanger** warms exhaust air to prevent freezing and cools the oil
- **Fine hydraulic pressure adjustment** for accurate torque control
- **Improved wrench speed** at low hydraulic pressure due to the expanded 1st stage bypass setting
- **Pendant** allows operation up to 6 metres (20 ft)
- **Filter-Regulator-Lubricator** with removable bowls and auto drain is standard
- **Calibrated, glycerin filled gauge** with display in bar and psi
- **ATEX-tested and certified.**

Torque Pump Selection Matrix

For optimum speed and performance see the torque wrench pump selection matrix.

6 m long, 2 hoses	THQ706T
12 m long, 2 hoses	THQ712T

▼ Certified lifting eye.

PowaPak™ Air Torque Pump

PowaPak™ Air Torque Pump

The ZA4208TX-QROP was developed for the high demands of the oil and gas, chemical processing, rental and other industrial markets.

The stainless-steel roll cage resists corrosion and surface damage reducing the maintenance required to prepare the pump for the next job.

The certified lifting eye enables the pump to be transported between levels with a lifting hook avoiding time consuming strapping.

ATEX-Certified

The ZA4T air-driven torque pump is tested and certified according to the ATEX Directive 2014/34/EU.

The explosion protection is for Equipment Group II, Equipment Category 2 (Hazardous Area Zone 1), in Gas and /or Dust atmospheres.

Each pump contains the following markings:

▼ HM10 Hydramax® Topside Tensioner

- Fifteen load cells from ¾" to 4" / M20 to M100
- Twin ports for quick connection of multiple tools
- High bolt load capacity at max. 1500 bar (21.750 psi)
- Long stroke capability of 15 mm (9/16 inch) with over stroke elimination
- HM01 to HM05: mechanical over-stroke prevention, no spring assist; HM06 to HM15: relief valve for over-stroke prevention, spring assist
- Quick release bridge
- Stroke indicator
- Captive socket – eliminates falling object risk
- Interchangeable adaptor kits available
- Anti-slip grip for more secure handling
- HM-Series HydraMax® Tensioners comply to following: Machine Directive 2006/42/EC, ASME B30.1, EN-ISO 4413:2010 and EN-ISO 12100:2010.

◀ Enerpac HM-Series HydraMax® tensioners have been designed to generate high bolt loads associated with compact flanges, while providing versatility for maximum bolt coverage,

High Bolt Load Capacities, Superior Performance

HydraMax® Topside Tensioners

The HM-Series tensioners have been designed to fit all standard flanges, including ANSI, API and Compact flanges based on Norsok L005 and generates 30% more load capacity than traditional tensioners.

Tensioning Pumps, Hoses and Couplers

High pressure pumps, hoses and fittings matched for use with the Enerpac Bolt Tensioners.

Page: 211

Ultra-high Pressure

This tool operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: 301

How to Order HydraMax® Tensioners

To provide maximum flexibility Load Cells are ordered separately from Adaptor and Bridge Kits.

Example, to order a complete tensioner for a M24 x 3 threaded bolt order:

- 1 x Load Cell with tommy bar: **HM03-LC**
- 1 x Adaptor and Bridge Kit: **HM03BPM-NRS02430**

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report. Custom Joint information can also be entered.

Page: 412

HydraMax® Topside Tensioners

Thread and Pitch Sizes

Contact Enerpac for different thread or pitch sizes.

Alternative size adaptor kits can be supplied upon request.

Minimum Stud Protrusion

* Load Cell with Tommy Bar.

** Contact Enerpac for different thread or pitch sizes. Alternative size adaptor kits can be supplied upon request.

▼ Shown: GT-Series Topside Bolt Tensioners

- Seven load cells from M16 to M105 or from 5/8" to 4"
- Twin ports for quick connection of multiple tools
- Only one size of bridge per size of load cell
- Detachable and rotational bridge simplifies tool positioning
- Full bridge window – increased access to socket
- Captive socket – eliminates falling object risk
- Piston stroke indicator
- Black surface treatment protects against corrosion
- Anti-slip grip for more secure handling
- Universal and multi-use tool
- GT-Series Tensioners comply to Machine Directive 2006/42/CE, ASME B30.1, EN-ISO 4413:2010 and EN-ISO 12100:2010.

Accurate & Reliable Extreme Performance Bolt Tensioners

Tensioning Pumps, Hoses and Couplers

High pressure pumps, hoses and fittings matched for use with the Enerpac Bolt Tensioners.

Page: 301

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report. Custom Joint information can also be entered.

Page: 412

How to Order

To provide maximum flexibility Load Cell and Bridges are ordered separately from Adaptor Kits.

Example, to order a complete tensioner for a M36 x 4 threaded bolt order:

1 x Load Cell and Bridge: **GT2-LCB**

1 x Adaptor Kit: **GT2PM-NRS03640**

Load Cell * and Bridge Model Number	Thread Size	Adaptor Kit Model Number	Cylinder Effective Area (mm ²)	Maximum Load Capacity (kN)	Dimensions (mm)							Load Cell and Bridge Weight (kg)	Adaptor Kit Weight (kg)

▼ Aquajack® Tensioner EAJ2LC with Quick Fastening Nut

- Compact design
- Long piston stroke
- Misalignment compensation
- Quick, simple hose connection
- Visible piston stroke indication
- 'No spill' overstroke elimination
- Quick fastening or solid reaction nut.

▼ Guaranteed to save time and increase efficiency, Aquajack® tensioners improve diver safety, productivity and reduce diver fatigue.

The most cost effective solution to subsea bolt or stud tightening

Quick Fastening Nut Design

Easily positioned in poor visibility conditions, Aquajack® subsea tensioners feature a compact design and long piston stroke.

The unique Split Nut® design of these tools allows rapid application to long bolts and damaged threads, and rapid tool removal.

No Oil Spillage or Over-Stroking

Innovative tool design ensures maximum tool strokes can be used without over stroking the piston or oil spillage. Guaranteed to save time and increase efficiency, Aquajack® subsea tensioners improve diver safety, productivity and reduce diver fatigue.

Hose Reels and Stand

Stainless steel stand with 1500 bar hoses from 30 upto 270 metres lengths. All hose reels are built up with multiple 30 metre length hoses.

Aquajack® Subsea Tensioners

EAJ Series

Bolt Range:

M20 - M90 | 3/4 - 3 1/2 inch

Maximum Load Capacity:

151,3 - 2320,9 kN

Maximum Operating Pressure:

1500 bar

High Precision, Low Maintenance

Tensioning Pumps

Electric, pneumatic and manual high-pressure tensioning pumps are available for use with Enerpac hydraulic tensioners.

Hoses and Fittings

High-pressure hoses and fittings for use with Enerpac tensioning systems are available.

Page: 301

- PGT-Series Bolt Tensioners are designed for critical fastening applications in wind, steam and gas turbines
- A broad range of single stage and double deck tensioners provide high performance in tight spaces associated with Power Generation applications
- PGT-Series Bolt Tensioners are loaded with performance enhancing features such as Auto-Retract Pistons, Cycle Counters and a premium coating to offer the ultimate in efficiency, durability and ease of use.

Description	PGTS Single Stage	PGTD Double Deck
Auto-Retract Piston	✓	✓
Zinc Coating	✓	✓
Geared Nut-Run-down	✓	✓
Over-stroke Indicator	✓	✓
Over-stroke Preventer	✓	✓

Swivel Manifold	+	+
Cycle Counter	-	+

✓ = Standard on tensioner

⊕ = Possible option

- = Option not available

1. **Auto-retract piston:** Simplifies use and improves speed of operation.
2. **Long-life puller:** For maximum durability.
3. **Long-life seals:** For maximum durability and extended service life intervals.
4. **Corrosion protection:** Zinc coating provides best-in-class corrosion resistance.
5. **Interchangeable bridge:** For optimal application fit.
6. **Over-stroke preventer:** Mechanically prevents over-stroke, extending cylinder life.
7. **Over-stroke indicator:** Extends cylinder life by helping to prevent over-stroking of cylinder.
8. **Optional counter:** Helps indicate when maintenance is due to maximize uptime.
9. **Quick-disconnect coupler:** For safe, simple hydraulic connection.
10. **Optional 360° swivel:** available for additional hose positioning flexibility.
11. **Spring-loaded nut engagement:** Keeps socket positioned on nut for faster and easier seating process.
12. **Gearbox:** for nut run down. Easy and quick nut run down back to the flange

▼ FTR-Series, Foundation Bolt Tensioners Round

- **FTR-Series Foundation Bolt Tensioners provide fast, accurate and easy tightening of external or internal-ring wind tower foundations**
- **Standard models are available for 75, 150 ksi and metric style Williams, Dyson and Macalloy® bar types**
- **Long-stroke options accelerate process with single-pull tensioning.**

High Precision, Low Maintenance

FTR-Series Foundation Bolt Tensioners

FTR-Series Foundation Bolt Tensioners are designed specifically for tensioning wind tower foundation bolts. These tensioners provide the speed and precision required by this critical application. Potential thread fit problems are eliminated through the use of existing rebar hex nuts as a reaction point.

The FTR-Series includes long-stroke models, which provide greater speed and ease of use by enabling applications to be completed in a single pull.

1. **Corrosion protection:** Zinc coating provides best-in-class corrosion resistance.
2. **Over-stroke indicator:** Extends life by helping to prevent over-stroking of cylinder.
3. **Long-life seals:** For maximum durability and extended service life intervals.
4. **Auto-retract piston:** Simplifies use and improves speed of operation.
5. **Quick-disconnect coupler:** For safe, simple hydraulic connection. Optional 360° swivel available for additional hose positioning flexibility.
6. **Interchangeable bridge:** For optimal application fit.

▼ *FTR-Series Foundation Bolt Tensioner. Manual wrench (not included) required to apply up to 30 Nm of torque during installation of models that feature run down gears.*

Foundation Bolt Tensioners

▼ This is how a FTR-Series Foundation Bolt Tensioner model number is built up:

1 Product Type

FTR = Foundation Tensioner, Round

2 Bar Grade

75 = 75 ksi
150 = 150 ksi
 (or metric designation)

3 Bar Size Designation

Example
14 = No. 14 bar size

4 Maximum Stroke

Example:
20 = 20 mm max. stroke

5 Fitting Type

SW = Includes swivel manifold with single male fitting

6 Run Down Gear

G = Includes Nut Run Down Gear
 * available in select models

FTR Series

Maximum Load Capacity:

2736 kN

Maximum Operating Pressure ¹⁾:

1500 bar

¹⁾ Max. pressure varies, see specifications table for details.

Tensioning Pumps

Electric, pneumatic and manual high-pressure tensioning pumps are available for use with Enerpac hydraulic tensioners.

Hoses and Fittings

High-pressure hoses and fittings for use with Enerpac tensioning systems are available.

▼ FTE-Series, Foundation Bolt Tensioner Elliptical

- **FTE-Series Foundation Bolt Tensioners provide fast and accurate performance in difficult, narrow access foundation tensioning applications**
- **Standard models are available for 75, 150 ksi and metric style Williams, Dyson and Macalloy® bar types**
- **Ideal universal solution that fits both standard and narrow access applications.**

High Precision, Low Maintenance

FTE-Series, Foundation Bolt Tensioners

Similar to Standard Foundation Tensioners, Elliptical tensioners were designed specifically for foundation fastening applications on wind towers, and utilize the existing hex nut as a reaction point in order to eliminate thread fit misalignment.

Unlike standard FTR-Series Tensioners, the FTE-Series Tensioners feature an elliptical geometry, which enables fit in narrow access foundation applications, without reducing load capabilities.

Operators may access the nut with a Tommy bar rather than employing the use of an offset rundown gear.

Elliptical tensioners are ideal for close clearance applications, or as a universal tool that will work in nearly any foundation application, whether standard or narrow access.

1. **Maximum stroke Indicator:** Extends life by helping to prevent over-stroking of cylinder.
2. **Long-life seals:** For maximum durability and extended service life intervals.
3. **Auto-retract piston:** Simplifies use and improves speed of operation.
4. **Elliptical form:** Provides access to close clearance applications.
5. **Corrosion protection:** Zinc coating provides best-in-class corrosion resistance.
6. **Quick-disconnect coupler:** (*not shown*) For safe, simple hydraulic connection. Optional 360° swivel available for additional hose positioning flexibility.

▼ *FTE-Series, Foundation Bolt Tensioner, designed to fit both standard and narrow access foundation applications.*

▼ HPT1500

HPT Series

Reservoir Capacity:

2,5 litres

Flow at Rated Pressure:

0,61 cm³/stroke

Maximum Operating Pressure:

1500 bar

Applications

The hand pump is ideally suited for use with hydraulic bolt tensioning tools and hydraulic nuts.

Page: 286

- Lightweight and portable high-pressure hand pump
- Two-speed operation displaces a larger volume of oil per stroke, reducing cycle times for many testing applications
- Includes a pressure gauge and coupler for direct connection to Enerpac Bolt Tensioners
- Integrated relief valve set at 1500 bar.

Ultra-high pressure

This pump operates at ultra-high pressure, use only the specified fittings and hoses designed for these pressures.

Page: 301

▼ ZUTP1500SE-H

- Solenoid-operated valve with 6 m pendant for remote control of valve and one-man operation
- Easily accessible manual override valve to release pressure if power is lost
- Safety relief valve limits output pressure
- Two-stage pump design provides high flow at low pressure for fast system fills and controlled flow at high pressure for accurate operation
- 1,25 kW heavy-duty universal motor provides the best performance-to-weight ratio
- Replaceable 10 micron reservoir breather and inline high pressure filter helps maintain oil cleanliness for optimum performance
- Panel-mounted 153 mm pressure gauge, with polycarbonate cover, is set into the protective metal shroud for improved visibility.

ZUTP Series

Reservoir Capacity:

4,0 litres

Flow at Rated Pressure:

0,33 l/min

Motor Size:

1,25 kW

Maximum Operating Pressure:

1500 bar

ZUTP-Tensioning Pumps

ZUTP-pumps achieve high pressure without the need for an intensifier.

This allows for low maintenance, resulting in less cost for the end-user.

ZUTP-S with Solenoid Valve

The ZUTP1500S with pendant-operated solenoid valve is ideal for multiple bolt tensioning applications as it allows for single-person operation. The operator can pressurize and depressurize the tensioner directly from the pendant.

OIL FLOW VERSUS PRESSURE

Tensioning every single stud in a joint simultaneously

▲ *Multi Stud Tensioning Set-Up.*

MULTI STUD TENSIONERS

Enerpac Multi Stud Tensioning (MST) systems are capable of tensioning every single stud in a joint simultaneously. By applying a predictable and accurate pre-load to all studs, problems associated with conventional bolt tightening techniques are avoided. Typical Enerpac Multi Stud Tensioning applications include:

Manway, Hand Hole & Inspection Covers

MST systems are the fastest and most accurate means of loosening and tightening studs on Primary & Secondary Manway Covers, Hand-Hole and Inspection Ports in nuclear facilities. Using special ram areas and strong lightweight materials, the MST's reduce bolting time by as much as 75%.

Coolant Pump

A custom slimline tensioning system for a Nuclear Reactor Coolant Pump, using six equally spaced tensioners and tightening studs in four passes, has reduced bolting times by 25% and significantly increased tensioning accuracy.

Wind Turbine Blade Assembly

Using an Enerpac MST has allowed wind turbine blade assembly times to be reduced by approx. 65% while bolt load accuracy and consistency have improved, resulting in better joint life and reduced maintenance requirements. The MST, comprising four tool segments, is capable of simultaneously tensioning up to 88 bolts connecting a 125 ft long blade to a bearing slew ring.

MST - Multi Stud Tensioners

This tool can be custom-designed, and built, for virtually any nuclear facility. We specialise in addressing difficult projects that demand accurate loads within tight space envelopes, while also seeking ease of operation and performance.

- Designed in segments enabling the operator to easily and quickly connect each segment to the joint and link together to provide simultaneous loading.
- Very accurate and fast closure system for large tensioning applications on pumps, valves, and steam-generators, for example.
- For ease of handling on-site, Enerpac MST systems can be supplied with an integral lifting frame and trolley.

▲ *Multi Stud Tensioner.*

▲ *Multi Stud Tensioning application.*

A simple and effective method of tensioning large bolts in difficult to access areas

▲ Tensioning with hydraulic nuts.

HYDRAULIC NUTS

Enerpac hydraulic nuts are used in many process-critical bolting applications where the ease of installation and manpower time savings are substantial and on-going. Moreover, they eliminate many of the uncertainties of torque arising from friction, point loading and load scatter.

Enerpac Hydraulic Nuts are a simple and effective method of tensioning large bolts in difficult to access areas with insufficient space for standard tensioners. Typically used when installing and maintaining bolting systems, hydraulic nuts can replace both conventional hexagon nuts and standard round nuts providing a high and predictable degree of tensioning accuracy.

Threaded directly onto the stud, Enerpac hydraulic nuts apply a direct axial elongation by means of hydraulic force generated via the nut's integral hydraulic cylinder. The nut is held in place either by means of a top or bottom load retaining collar externally located on the nut or by the insertion of mechanical shims. Enerpac hydraulic nuts can be retrofitted to existing plant providing an accurate solution to mechanical jointing problems.

Benefits of Enerpac Hydraulic Nuts

- Highly Accurate & Repeatable Bolt Loads
- Ideal where space limitations prevent use of standard detachable tensioners
- Direct Axial Loading - No nut rotation required
- Multiple Nuts can be connected and tightened / loosened simultaneously
- Eliminates issues with friction
- Substantial time savings due to the quick set-up and hydraulic nuts remaining in-situ
- No stud or flange damage (Galling, Seizure)
- No need to change joint hardware – system works with existing studs
- Ideal when the tension in bolts needs to be checked regularly such as vibration loosening.

Enerpac hydraulic nut applications have included:

The Hydraulic Nut is a permanent fixture, replacing the conventional nut and retaining the high bolt load and extension in small space envelopes where there may not be sufficient space to use tensioners.

- Flange Clamps: Pipeline, Structural
- Turbines: Gas, Wind, Steam
- Pressure & Reactor Vessels
- Diesel Engines
- Nuclear Applications: Steam Generators
- Hydraulic and Mechanical Presses
- Heat Exchangers
- Pipeline Flanges, Valves and Control Systems
- Valves & Pumps
- Cranes – Slew Ring Bolts, Tower Cranes
- Shaft Couplings
- Mining: Grinders, Cutters, Earth Moving Equipment.

▲ Hydraulic nuts on a diesel engine.

▼ From left to right: **ATM4, ATM9, ATM2** (ATM9 shown without pump and hose)

- Enerpac ATM-Series tools rectify twist and rotational misalignment quickly, safely and without the need for an external power source
- Appropriate for use on most ANSI, API, BS and DIN flanges
- Reduces set-up time: no need for chains, pulleys or rigs
- Safety strap helps provide secure operation
- Can be installed and used in any position
- Stays stable in position under full load
- Portable, lightweight design enables easy transport and use, even in remote locations
- Each ATM-model contains a tool and kit box.

▼ The compact ATM2 is actuated by simply hand turning the crank.

The faster, simpler and safer way to align flanges

Adjustable Reach

The highly adjustable reach of the wing and drop leg on ATM4 and ATM9 allow precise alignment.

Gauge and Adaptor

The ATM9 includes P142 hand pump and HC7206C 1,8 m long hose. Enerpac recommend the use of the pressure gauge **GP10S** and gauge adaptor **GA4** for easy mounting of the gauge onto your system or use **GA45GC** Gauge Adaptor Assembly.

Page: 127

TFA-Series Wind Turbine Tower Flange Alignment Tools

The TFA Wind Turbine Tower Flange Alignment Tools have been developed to aid the alignment of large flanges on the inside of wind turbine towers during their assembly or installation.

Page: 332

▼ The ATM9 is shown here with optional pressure gauge and gauge adaptor.

Applications

Enerpac ATM-Series Tools help correct flange misalignment, and allow bolts to be placed into joints. This alignment takes place during pipework construction, or maintenance.

These tools provide pipe installers and maintenance personnel with some of the simplest, safest and most productive solutions available for flange alignment in the market today.

- ① Extendable wing provides usage on wide variety of flanges.
- ② Portable, light weight design enables easy transport and use.
- ③ Hand-adjustable base for easy positioning by a single operator.
- ④ Safety strap helps provide secure operation from a horizontal or vertical position.

* ATM9 includes an Enerpac hand pump and hydraulic hose (gauge and adaptor sold separately). ATM9 weight includes tool only.

ATM Series

Minimum Bolt Size:

16 - 35,5 mm

Flange Wall Thickness:

14 - 228 mm

Maximum Lifting Force:

1 - 9 ton (10 - 90 kN)

Cylinder-Pump Sets

Hydraulic cylinders, jacks and lifting wedges can also be used to assist in pipe line positioning and aligning.

Page: 62

Pipe Flange Face Tool

The portable, hand powered tool FF120 makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Page: 316

▼ The ATM-Series – the faster, simpler and safer way to align flanges.

▼ FSC14, FSM8 and FSH14 with safety blocks SB1

- **Unique interlocking wedge design** no first step bending and risk of slipping out of joint
- **Requires very small access gap** of only 6 mm
- **Few moving parts** mean durability and low maintenance
- **Safety block SB1** included with FSC14, FSH14 and FSM8
- **Ratchet spanner SW22** included with FSM8 mechanical spreader
- **Singleacting cylinder** included with FSH14 hydraulic spreader.

▼ Two FSH14 spreaders used simultaneously with Enerpac handpump, hoses and AM21 control manifold.

Practical, portable and lightweight

FSC14 with integrated hand pump

Powered by a builtin hydraulic hand pump, the FSC14 is a readytouse tool – no making or breaking hydraulic connections. This compact tool delivers 14 US tons of force and requires a clearance gap as small as 6 mm.

Stepped Blocks FSB1

Use stepped blocks to increase wedge opening up to 80 mm. Fits both FSC, FSH and FSM models.

AM-Series Control Manifolds

For simultaneously and even spreading of flange joints, 180° apart with FSH14.

Page: 132

Flange Maintenance Tools

Secure-Grip and Zero-Gap flange spreading tools for application on flanges with a zero or small gap.

Page: 319

Flange Spreading Wedges

Flange Spreading Wedges

The flange spreading tools have been developed to aid and simplify the maintenance of flange joints. No longer will those tasked with separating flanges have to rely on using ropes and pulleys, podgers, tiffors, come-alongs or hammers – there is a safe, quick and effective alternative, the Enerpac range of spreaders.

These spreaders use mechanical and hydraulic principles for separating flanges and can spread small, medium or large flange joints. Tool selection is made on the basis of the access gap between the flange faces, the flange size and the required scope of work.

FSC, FSH, FSM, Series

Tip Clearance / Maximum Spread ¹⁾:

6 mm / 80 mm

Maximum Spread Force:

8 - 14 US tons

Maximum Operating Pressure:

700 bar (FSH14)

Safety Lanyard FSC1

Recommended safety accessory to compliment bolting applications. Includes steel cable with carabiners.

Tool-Pump Sets

The hydraulic flange spreader is available as set (pump, tool, gauge, gauge adaptor, couplers and hose) for your ordering convenience.

GA45GC Gauge Adaptor Assembly

Protect yourself from system overloading by simply ordering one part number for a pre-assembled gauge, adaptor block and coupler.

Page: 142

Single-Acting Hydraulic Nut Splitters

Frozen or Corroded Nuts

Often nuts are difficult to remove, while loosening using tightening tools is possible, it generally requires larger equipment and is time consuming. The use of cutting torches or hammers and chisels can cause damage to the joint components, requires significantly longer setup and operational time, and can present a potential safety risk.

Hydraulic Nut Splitters

Nut splitting with the Enerpac Hydraulic Nut Splitters is the safest method. It takes less time and avoids costly damage to joint components. The head design fitted with heavy-duty chisels permits the splitting of nuts on a wide variety of applications. With the two blades models nuts are split from two side in one action.

▼ Shown: NSH31 with NSPH3, NSH41 with NSPH4

- Designed to fit standard BS/ANSI flanges
- Blade positioning scale to eliminate bolt damage
- Adjustable cutting depth
- Ergonomically designed and positioned handle
- Interchangeable power heads with cutting blade
- Single-acting spring return power head (NSPH)
- Double-acting power head (NSPH-D) for subsea operation
- Nut splitters include spare chisel, spare set screw and wrench used to secure the chisel
- CR400 female half coupler standard on NSPH
- CR400 + CH604 couplers standard on NSPH-D.

ATEX certified

- All NSH-tools are CE - ATEX certified.

Versatile, reliable and trouble free operation

Blade Positioning Scale

The power head can be adjusted to preset the blade cutting distance in order to prevent damage to the bolt thread as the nut is cut.

The blade positioning scale can be used with the following bolt and nut forms:

- Unified bolt threads (UN) with heavy series hexagon nuts;
- Metric bolt threads (M) with standard series hexagon nuts.

Steel Hand Pumps

The **P80** and **P84** two speed hand pumps are ideal to operate nut splitters. The P84 can be used to power the double-acting tools.

M45 - M90

Hexagon Nut Range:

70 - 130 mm

Maximum Operating Pressure:

700 bar

Complete Nut Splitter = Power Head (NSPH) + Cutting Head (NSH)

NSPH + NSH

NSPH-D + NSH

Joint Separation Tools

Flange Spreading Wedges (FSC, FSH, FSM-Serie) provide quick and easy joint separation using hydraulic or mechanical force.

Ordering Notes: Maximum allowable hardness to split is ASTM A194 Gr 2H. Not to be used on square nuts or stainless steel.

▼ FF120

- Makes refacing easy – hand operated machine tool can be set up anywhere without the need for air, electric or hydraulic power
- Lightweight and portable (15 kg in storage box)
- Adjustable cutting head for reface of flat flange surfaces of pipes with flange outside diameter facing range 25,4 - 304,8 mm [1 - 12 inch]
- Interchangeable collets for ID mounting range 25,4 - 152,4 mm [1-6 inch] allow the user to work on many different flanges with minimal time between set-ups
- Interchangeable lead screws suitable for refacing damaged raised-face (RF) or flat-face (FF) joint flanges
- Tool body with expanding collets centers itself providing real concentric operation.

▼ The Enerpac FF120 used to face a pipe flange.

Safe, efficient and accurate refacing of flat pipe flange surfaces

Complete in Wheeled Carrying Case

The FF120 comes as portable set (15 kg). Can be transported, easy set-up and operated by a single

technician. Set includes:

FFL-kit with locators, O-Rings and extensions;
FSS-kit with feed screw and nut ½”-20 UN for surface roughness Ra 1,6 - 2,4 μ.

FSF-kit with feed screw and nut ½”-11 UNF for surface roughness Ra 3,2 - 6,3 μ.

Joint Separation Tools

FSC, FSH, FSM-Series parallel wedge spreaders provide quick and easy joint separation using hydraulic or mechanical force.

Page: 308

Flange Alignment Tools

The ATM-Series provide safe and high-precision flange alignment tools that fit most commonly used ANSI, API, BS and DIN flanges.

Page: 306

Controlled Tightening and Loosening

Use Enerpac Bolting Tools to seal the joint to the precise torque or tension required: torque

multipliers, torque wrenches and hydraulic bolt tensioners.

Page: 211

QuickFace – Mechanical Pipe Flange Face Tool

Mechanical Flange Face Tool

Portable, hand powered tool makes even the hardest to reach pipe flanges resurfaceable in a safe and convenient way.

Makes refacing easy

A simple and cost effective solution – the FF120 turns a two man operation with heavy equipment, compressors and portable generators into a one man job.

The FF120 has interchangeable lead screws that make it suitable for resurfacing damaged flat-faced or raised-face joint flanges to the high safety standards required. FF120 is not suitable for lens-ring joint flanges or ring type joint (RTJ) flanges.

After selecting the correct lead screw for the operation, the tool body is inserted in the pipe end and centres itself with adjustable locators to provide real concentric operation.

The tool arm is then rotated by hand using a worm-gear mechanism to provide a perfect spiral “gramophone” finish. The tool can be adjusted with a calibrated slide to define cut depth and the correct finish.

Surface finish & accuracy

A serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 3,2-12,5 µ (125-500 micro inches). The FF-120 has same precision and quality of finish as a lathe.

Cost effective solution

Small and portable enough to be a permanent addition to your equipment range, Enerpac’s FF120 is the perfect solution to all of your small diameter facing problems.

For more Flange Facing Machines, see page 375.

FF Series

Pipe Flange Cutting Diameter Range:

Ø 25 - 305 mm / 1 - 12"

Internal Pipe Mounting Range:

Ø 25 - 152 mm / 1 - 6"

Cutting Resultant Roughness:

Ra 3,2 - 12,5 µ

- 1 Hand-operated cold work tool – no need for external power and hot work permits.
- 2 Calibrated cross slide for accurate cutting control.
- 3 Adjustable cutting head for reface of flat flange surfaces of pipes with flange OD facing range Ø 25,4-304,8 mm [1-12 inch].
- 4 Interchangeable lead screws enable selection of surface finish between Ra 3,2-12,5 µ.
- 5 Utilizes standard 3/8 inch or 10 mm tool steel.
- 6 Range of interchangeable collets allow the tool to accommodate Ø 25,4 - 152,4 mm (1 - 6 inch) pipe ID.
- 7 Tool body with expanding collets centers in the bore ensuring concentric and accurate set-up.

▼ The Enerpac FF120 QuickFace has same precision and quality of finish as a lathe.

The Equalizer™ range of patented flange spreading tools have been developed to aid and simplify the maintenance of flange joints. No longer will those tasked with separating flanges have to rely on using ropes and pulleys, podgers, tirsors, come-alongs or hammers – there is a safe, quick and effective alternative, the

Equalizer™ range of spreaders. These spreaders use mechanical and hydraulic principles for separating flanges and can spread small, medium or large flange joints. Tool selection is made on the basis of the access gap between the flange faces, the flange size and the required scope of work.

SWi Flange Spreading Wedges:

An innovative flange spreading wedge for use on small, medium or large flange joints with a minimum access gap of 4 mm. The SWi range includes ATEX approved options.

The SWi range has set the new standard for spreading flange joints powerfully, efficiently, effectively and safely. The tools offer the following features and benefits:

- Wider spreading - using the Standard Stepped Block accessories means the SWi range offers up to 30% more flange spreading distance than a traditional SW tool.
- Unrivalled power - the tools now offer up to 240 kN of spreading force when used in pairs, which provides additional confidence when spreading.
- Narrower jaws - the SWi5T tools are only 50 mm wide to help them fit more easily between flange bolts.
- Fully rotational handle – the handle swivels 360-degrees around the wedge head, so that the SWi tools can be used comfortably in all orientations.
- Easier maintenance – end-users will appreciate the ease with which the tools can be maintained. The supplied hex-key and a two step-process is all that's required to disassemble and reassemble the tools.
- No pinch points – the SWi range of tools has been engineered to overcome finger pinch-points.

MG Flange Spreading Tool:

A mechanical tool for small diameter, low pressure flanges with a minimum access gap of 2 mm.

For use on smaller, lower pressure flange joints, this portable and flexible tool can be assembled in two alternative configurations that gives it twice the application range from one tool. The tool is locked onto the flange joint by the spreading bar preventing the risk of it falling from the flange joint.

SG Flange Spreading Tools:

A unique flange spreader, ideal for situations where there is no access gap, or where there is a spacer, a wafer or butterfly valve positioned between the flanges.

Equalizer's unique Secure-Grip tools spread by locking into the flange bolt holes and pulling the mating flanges away from each other, the Secure Grip flange spreaders are locked on to the flanges when under load making them arguably the world's safest flange spreading tools.

VC Valve Change-Out Tools:

Using the same technology as the SG flange spreaders the VC range has been developed for valve removal applications.

The Equalizer™ VC Range of Valve Change-Out tools has been developed to assist in the removal of valves, spades/spacers or gaskets from large flange joints. The span of the tool is longer than a standard Secure-Grip Flange Spreader and is adjustable to enable the tool to operate in a range of applications.

SWi Series

FLANGE SPREADING WEDGES

Spreading Force:

77,0 - 240,0 kN

Spreading Distance:

4,0 - 103,5 mm

Maximum Operating Pressure:

700 bar *

* Only relevant for hydraulic tools

- Practical, portable and lightweight
- Revolving handle to aid horizontal or vertical spreading
- Removable handle for improved access
- No finger pinch-point
- Increased step-depth on upper steps
- Safety lanyard – 1,0 m length
- Forged key components for strength and reliability
- Rapid disassembly and assembly
- Narrow jaw teeth – improved tool wear.

Caution

A minimum of two Flange Spreading Tools must be used when opening flange joints. This will enable the operator to maintain an equal spreading distance across the flange faces.

These tools have been designed for use in potentially explosive atmospheres which is:

- Group II (Non-mining equipment)
- Equipment **category 2** where explosive atmosphere is likely to occur in normal operation
- Can be applied in **zones 1 and 2** of gaseous explosive atmospheres and in **zones 21 and 22** of dust explosive atmosphere
- **Gas G** or **Dust D** with type of protection **Ex h** for non-electrical equipment
- Suitable for use with **Group IIB** of a gases and vapours (Ethylene group) and **Group IIIC** of dust (conductive dust)
- For hydraulic tools **T5** means that minimum ignition temperature of gas or vapor **>100°C**; **T100°C** means that minimum ignition temperature of a dust cloud $\geq 150^\circ\text{C}$ and minimum ignition temperature of a 5mm dust layer $\geq 175^\circ\text{C}$
- For mechanical tools **T6** means that minimum ignition temperature of gas or vapor **>85°C**; **T85°C** means that minimum ignition temperature of a dust cloud $\geq 127,5^\circ\text{C}$ and minimum ignition temperature of a 5mm dust layer $\geq 160^\circ\text{C}$.

These tools have been designed and manufactured in accordance with the following transposed harmonized European standards:

- **EN ISO 80079-36:2016** Explosive atmospheres - Part 36: Non-electrical equipment for explosive atmospheres - Basic method and requirements;
- **EN ISO 80079-37:2016** Explosive atmospheres - Part 37: Non-electrical equipment for explosive atmospheres - Non-electrical type of protection constructional safety "c", control of ignition sources "b", liquid immersion "k":

▼ SG11TM

- For use on all flange types with bolt-hole sizes ranging from 17,5 mm to 62,0 mm
- Unique expanding collet technology
- Little or no access gap required
- Secure bolt-hole locking mechanism.

OPERATING BENEFITS

- Time-saving, simple operation
- Measurable, controlled flange spreading force
- Virtually universal, the Secure-Grip Flange Spreader range covers ANSI, DIN, SPO, ASME, API and BS flanges.

Range of Application

For a detailed range of application please request the Secure-Grip Mechanical or Hydraulic Operator Instruction Sheet.

Caution

A minimum of two Flange Spreading Tools must be used when opening flange joints. This will enable the operator to maintain an equal spreading distance across the flange faces.

▼ SG18TE & SG25TE

- Applicable for larger-sized flanges
- Actuated by an external hand pump
- Suitable for bolt holes from 59,5 mm to 108 mm.

SG18TE

SG25TE

Range of Application

For a detailed range of application please request the Secure-Grip In-Line Hydraulic Operator Instruction Sheet.

Caution

A minimum of two Flange Spreading Tools must be used when opening flange joints. This will enable the operator to maintain an equal spreading distance across the flange faces.

Flange Dimensions

Model Number Tool Kit	Type	Maximum Spreading Force Per Tool (kN)	Spreading Distance Maximum (mm)	Flange Dimensions (mm)		Tool Weight (kg)	Kit Weight (kg)	Case Dimensions (mm)	Tool Number

Secure-Grip Valve Change-Out Tools

Caution

A minimum of two Flange Spreading Tools must be used when opening flange joints. This will enable the operator to maintain an equal spreading distance across the flange faces.

- Assists in the removal of wafer/butterfly valves, spades/spacers or gaskets from large flange joints
- Tool span is longer than a standard Secure-Grip Flange Spreader
- Adjustable to enable the tool to operate in a range of situations.

The Actuator and Extension Subassembly can be assembled into 4 different configurations to suit a variety of applications. For a detailed range of application please request the VC10 Operator Instruction Sheet.

PATENTED SECURE-GRIP SYSTEM:

- Unique expanding collet technology
- Secure bolt-hole locking mechanism
- Unique technology makes the Secure-Grip arguably the safest flange spreader available in the world today
- Virtually universal, the Secure-Grip Flange Spreader range will cover ANSI, DIN, Norsok L005, ASME, API and BS Flanges
- Time-saving, simple operation.

PUMP KITS

For STD Tool Kits

1 x 700 bar HP550S Single Port Hydraulic Hand Pump
1 x Hydraulic Gauge with Manifold
1 x 700 bar Hydraulic Hose, 2,0 m
1 x Secure Grip Safety Block
1 x Square Drive Flexible Handle
1 x Vernier Calliper
1 x Aluminium Carry Case with Protective Foam Inserts

For MAX Tool Kits

1 x 700 bar HP1000D Twin Port Hydraulic Hand Pump
2 x Hydraulic Gauges with Manifolds
2 x 700 bar Hydraulic Hoses, 2,0 m
2 x Secure Grip Safety Blocks
1 x Square Drive Flexible Handle
1 x Vernier Calliper
1 x Aluminium Carry Case with Protective Foam Inserts

Collet Sizing

It is important that the correct size of collet is used. An undersized collet could allow the collet holder to pull through its bore. An oversized collet has the potential to become jammed in the bolt-hole.

Range of Application

For a detailed range of application please request the Hydraulic Secure-Grip Valve Change-Out Tool Operator Instruction Sheet.

VC10/25TE COLLETS (AVAILABLE SEPARATELY)

▼ MG7TM

- Reversible leg design giving greater range of applications
- Unique double-angled wedge produces a greater spreading force without reducing spreading distance
- Robust lightweight tool
- Spreading force of 68,0 kN.

OPERATING BENEFITS

- Locks on to flange joint
- Safe, quick and easy operation
- Saves time and cost.

MG Series

FLANGE SPREADING TOOL

Spreading Force:

68,0 kN

Spreading Distance:

2,0 - 27,0 mm

Range of Application

For a detailed range of application please request the MG7TM Operator Instruction Sheet.

Caution

A minimum of two Flange Spreading Tools must be used when opening flange joints. This will enable the operator to maintain an equal spreading distance across the flange faces.

MG7TMSTD Standard Kit

- 1 x MG7TM Tool
- 2 x Spreading Bar
- 1 x Moulded Plastic Carry Case

Flange Dimensions

Model Number Tool Kit	Type	Maximum Spreading Force Per Tool (kN)	Spreading Distance Maximum (mm)	Flange Dimensions Minimum Access Gap A (mm)	Wedge Width (mm)	Tool Weight (kg)	Kit Weight (kg)	Case Dimensions (mm)	Tool Number

Flange Pulling Tools

▼ FC10TE

- Applicable to all flanges with a bolt-hole diameter of 1 inch or greater, including ANSI, DIN, Norsok L005, ASME and BS flanges
- Slide and lock collet system
- Low profile tool
- Can be used on all vertical and horizontal flanges including ANSI, API, BS, DIN & Norsok L005
- Robust yet light weight
- Subsea compatible
- Reciprocating hydraulic action.

OPERATING BENEFITS

- Reduction in operator fatigue
- Reduction in pinch point
- Quick and easy to use.

Flange Dimensions

FC Series

FLANGE CLOSING TOOLS

Closing Force:
100 kN

Closing Distance:
570 - 0 mm

Maximum Operating Pressure:
700 bar

Caution

A minimum of two flange closing tools must be used when flange pulling. This will enable the operator to maintain an even gap between flange faces and prevent flange / gasket damage.

FC10TESTD STD Kit

- 1 x FC10TE Tool
- 1 x 700 bar Hydraulic Hose, 2 m long
- 1 x 700 bar HP550S Single Port Sealed Hand Pump with Gauge
- 1 x Aluminium Carry Case with Protective Foam Inserts

▼ TFA15TI

TFA Series

**WIND TURBINE TOWER
FLANGE ALIGNMENT TOOLS**

Hook Force:

40 - 270 kN

Aligning Distance:

42 - 65 mm

TFA4TM Mechanical Tool Kit

- 1 x TFA4TM Tool
- 1 x Torque Wrench
- 1 x Moulded Plastic Carry Case

TFA12TE / TFA15TE External Hydraulic Tool Kit

- 1 x TFA12TE or TFA15TE Tool
- 1 x Safety Lanyard
- 1 x Aluminium Carry Case with Protective Foam Inserts

TFA12TI / TFA15TI Internal Hydraulic Tool Kit

- 1 x TFA12TI or TFA15TI Tool
- 1 x Aluminium Carry Case with Protective Foam Inserts

The TFA Wind Turbine Tower Flange Alignment Tools have been developed to aid the alignment of large flanges on the inside of wind turbine towers during their assembly or installation.

- Assists in aligning / de-ovalizing large internal pipe flanges
- Helps resolve bolt-hole misalignment within tower sections of wind turbine towers
- Can be used both on and offshore.

- The Single-Port and Twin-Port Hand Pumps are also available with ATEX rating, which are certified for use in hazardous areas II 2G Ex h IIB T5 Gb, II 2D Ex h IIIC T100°C Db.

HP Series

**HYDRAULIC SEALED
HAND PUMPS**

Maximum Pressure Rating:

**1st Stage: 13,8 bar
2nd Stage: 700 bar**

Pump Type:

2-Speed

Pump Ratings

The Hydraulic Single Port, Twin Port and Double-Acting Hand-Pump (and hoses) are tailored for use with hydraulic equipment. Each pump's output is regulated to 700 bar and is delivered from threaded 3/8" NPT output ports. The pumps and hoses can be used with any 700 bar rated hydraulic equipment within their oil capacity specification. The HP range of hydraulic hand-pumps have been designed with a seal oil reservoir, which allows the pumps to be used in any orientation without the risk of oil spills or air contamination

Enerpac Heavy Lifting Technology provides customers with tailored solutions, combining hydraulics, steel fabrication and electronic control technology. Global Leader providing best in class solutions for safe and precise positioning of heavy loads.

With more than 50 years supporting industrial markets, Enerpac has gained the unique and in-depth expertise that is respected by industrial professionals around the world. Across every continent, Enerpac's network of application engineers, authorized distributors and technical service centers can reach any location, and deliver innovative solutions, technical assistance and quality products.

Enerpac's complete line of standard and customized products and a unique systems approach offers the benefits of safety and efficiency to applications where high forces are required.

Whether constructing a signature bridge across a deep valley, lifting a national landmark for seismic retrofit or simultaneously testing hundreds of foundation pilings to support a new building, Enerpac will supply the hydraulic solutions to get the job done safely and efficiently.

▼ SFP414SW and SFP403SW (Gauges and retract valves not shown)

- 2, 4, 6 or 8 split-flow outlets
- Individual or simultaneously operation of valves, with advance/hold/retract function
- Joystick (manual) controlled or pendant (solenoid) controlled valves
- Flow per outlet ranging from 0,27 to 2,10 l/min at 700 bar
- For double- and single-acting cylinders
- Adjustable pressure relief valve per circuit
- Reservoir: 20, 40 or 150 litres
- All models include pressure gauges.

▼ Step-by-step stage lifting an old windmill using double-acting RR506 cylinders powered by a split-flow pump.

Multiple Outlets with Equal Flow for Lifting and Lowering

Typical Split-Flow Pump Applications

For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using independently operated pumps. Where synchronization of maximum 4% is acceptable, Split-Flow Pumps are a safe and economical solution.

The SFP-Series pumps feature both single and synchronized multiple outlet control either through joystick or pendant operation.

Application examples:

- Bridge deck lifting for bearing maintenance
- Stage lifting in construction and shipbuilding
- Skidding to move structures and buildings
- Levelling of constructions such as wind turbines.

Remote Control Pendant

Split-Flow pumps with solenoid valves include a remote pendant with selector switches for each individual outlet, allowing single or multiple cylinder operation.

High Pressure Hoses

Enerpac offers a complete line of high quality hydraulic hoses. To ensure the integrity of your system, specify only genuine Enerpac hydraulic hoses.

Split-Flow Hydraulic Pumps

SFP Series

Reservoir Capacity:

20 - 40 - 150 litres

Motor Voltage

Motor voltage is specified by the last letter in the model number.

Other motor voltages are available from Enerpac. Change "W" in the model as follows for other options:

J = 460-480V, 3 ph, 50-60 Hz

G = 208-240V, 3 ph, 50-60 Hz

▼ SFP-Series Split-Flow Pump Kit Components

Connecting Split-Flow Pumps for more lift points and greater accuracy

- Control multiple Split-Flow Pumps with one control unit
- Pumps can be closer to the lifting points, requiring shorter hoses and increasing accuracy
- Synchronize all lift points to within 1,0 mm (0.04 inch)
- Network control boxes expand the number of lifting points by combining up to four split-flow pumps together, simplifying lifting operations by using a single operator station
- Plug and play synchronous lift upgrade kits limit initial investment and provide everyday flexibility to tailor the controls to the applications needs.

Split-Flow Pumps Kits

SFP-Series kits are customized from standard components to meet the needs of your unique applications. On the next page is the guide to help you choose the right components to upgrade or expand your equipment based on your application needs.

Contact your regional Enerpac representative / territory manager for support with your specific project.

Split-Flow Pump Network Kits

Split-Flow Pump Network Kits connect multiple Split-Flow Pumps under one control system.

Split-Flow Pump Synchro Kits

Split-Flow Pump Synchro Kits connect and electronically synchronize each lift point of a single Split-Flow Pump or multiple Split-Flow Pumps under one control system.

Junction Box

SFPKSS4 and **SFPKSS8** junction boxes consolidate the signals from pressure and stroke sensors, allowing the master control box to synchronize the lifting operation.

SFPKMN, Master Control Box

All SFP-Series Synchro Kits include a master control box to allow the operator to easily monitor and control a multi-point

synchronized lift and adjust individual lift points as needed.

All master control boxes feature an industrial grade touch screen and a user-friendly interface.

EVO-SC, Stroke Sensor Cables

Can be connected together for additional length. Ordered separately, requires one for each stroke sensor.

Model Number	Length (m)	Model Number	Length (m)
EVO-SC-6	6	EVO-SC-25	25

EVO-WSS, Wire Stroke Sensors

Provides stroke feedback to controls. Includes magnets for mounting. Ordered separately, requires one sensor for each

lifting point. Available in measuring range from 375 to 1000 mm.

Model Number	Range (mm)	Model Number	Range (mm)
EVO-WSS-375	375	EVO-WSS-1000	1000
EVO-WSS-500	500	-	-

Communication Cables

EVO-COMM-Series communication cables transfer information about the synchronized lift operation

from the master control panel to each of the connected split-flow pumps.

Model Number	Length (m)	Model Number	Length (m)
EVO-COMM-25	25	EVO-COMM-75	75
EVO-COMM-50	50	EVO-COMM-100	100

Split-Flow Pump Network Kits

Upgrading Split-Flow Pumps

To network multiple SFP-pumps together with standard function see drawing and table ①.

To upgrade a single SFP-pump to synchronous lift capability, see drawing and table ②.

To upgrade and network multiple SFP-pumps together with synchronous lift capabilities, see drawing and table ③.

SFP Series

Multiple Pumps in Network System:

1 - 4 pumps

Maximum Lifting Points:

32x cylinders

① Networked SFP-Pumps in Standard Operation

① Networked SFP-Pumps in Standard Operation

Nr.	Qty	Model Nr. & Description

▼ EVO 841460W

- Modular lifting pumps to control 4, 8 or 12 lifting points
- Can be connected to single- or double-acting cylinders with the same or different lifting capacities
- PLC-controlled system with integrated 700 bar hydraulic power unit and 250 litres reservoir
- Network capability to link up to 4 EVO-units (HPUs) to a separate network controller via wireless control
- Intuitive user interface providing easy set up, control and navigation
- Data storage and recording capabilities
- Variable frequency drive motor (VFDM) and PLC for precise synchronization and oil flow control.

The multi-functional synchronous lifting systems

EVO-System Work Modes

The application possibilities are infinite with the standard EVO-System, powering interlinked hydraulic cylinders – single or double-acting, push or pull, stage lift, hollow plunger or lock nut cylinders. The EVO-System has 9 work modes. The operator can navigate to any of these menus:

1. Manual
2. Pre-Load
3. Automatic
4. Retract Fast
5. Depressurize
6. Tilting
7. Stage Lift
8. Weighing *
9. Center of Gravity determination *

* Available in the EVO-W-models.

Typical Synchronous Lifting Applications

- Bridge lifting and repositioning
- Bridge launching
- Bridge maintenance
- Incremental launching and box jacking
- Lifting and lowering of heavy equipment
- Lifting, lowering, levelling and weighing of heavy structures and buildings
- Structural and pile testing
- Lifting and weighing of oil platforms
- Foundation levelling of onshore and offshore wind turbines
- De-propping/load transfer from temporary steel work
- Foundation shoring.

◀ The superlifting and launch of a 43.000-ton floating oil production system in Malaysia for the Gumusut-Kakap offshore field has set high benchmarks for safety through its use of sophisticated EVO-Series synchronous hydraulics to lift, balance, weigh and smoothly launch massive resource structures.

Benefits of the EVO-Series System

Precise control of multiple lift points

- Comprehensive understanding and management of a lifting operation from a central control system improves safety and operational productivity.
- Programmable synchronized lifting.
- Automatic stop at pre-set cylinder stroke or load limit.

Safe and efficient movement of loads

- System secured with warning and stop features to realize optimal safety.

High accuracy

- Variable frequency drive (VDFM) and PLC for precise synchronization and control of oil flow, stroke and speed.
- Depending the cylinder capacities used, an accuracy of 1,0 mm between lifting points is achieved.

Ease of operation

- User friendly interface: visual screens, icons, symbols and color coding.
- A single operator controls the entire operation.

Monitoring and Data Recording

- Displays data of the operation.
- Data recording at user-defined intervals.
- Data storage and read-out for reporting.

Network capability

- Ethernet IP protocol for communication between hydraulic power units, allow easy "plug and play".

EVO-W Weighing System

Weighing applications with 1% accuracy

- Includes calibrated sensors and auto-calibration of external load cells.
- Center of gravity determination functionality.
- Parameters for "waiting time for stabilization" and "number of cycles".

Global standardized system

- Enerpac global coverage ensures local support.

EVO Series

Number of Lifting Points:

4 - 8 -12 (up to 48)

Reservoir Capacity:

250 litres

Flow at Rated Pressure:

0,75 - 4,80 l/min

Motor Size:

3,50 - 7,50 kW

Maximum Operating Pressure:

700 bar

Stroke Sensors and Cables

Optional accessories required for each lifting point and stroke sensor.

Page: **338**

CLNC12 Network Controller

Required to link up to 4 standard EVO-pumps together to achieve a maximum of 48 lifting points. Contact Enerpac for more information.

EVO-Series (Standard)

12	4,7 - 15,6	1,44 - 4,80	EVO1240380 W ³⁾	250	7,5	VFDM	1025

¹⁾ Oil flow will be approximately 6/5 of these values at 60 Hz.

²⁾ For 460-480 VAC, 3 phase, 50-60 Hz change 380 in model number into 460. Example **EVO421460**.

³⁾ Model numbers with suffix **W** are pumps for weighing systems. ⁴⁾ VFDM = Variable Frequency Drive 15-50 Hz.

▼ Precision levelling caisson pier box: 3 EVO-Systems connected with 32 jacks lowered the 1100 ton bascule pier box.

▼ SCJ50, Enerpac Self-Locking Cube Jack

- System is automatically mechanically locked after the lifting or lowering stroke
- Self-aligning steel cribbing blocks save time, improve side load, and eliminate the need for wooden cribbing materials
- Jobs are completed more efficiently due to simplified operation sequence with 50% less cycles than climbing jacks
- End block with adjustable swivel saddle allows fine adjustment during set-up: 50 mm screw extension
- Can be operated with Enerpac's 700 bar hydraulic power units
- Lloyds witness tested to 125% of maximum working load.

Incremental lifting system with automated mechanical locking

Why use Self-Locking Cube Jacks?

The Self-Locking Cube Jack is a safer, more efficient alternative to the jack-and-pack method with wooden cribbing. The Self-Locking Cube Jack is derived from the proven Enerpac Jack-up System.

The Cube Jack has a small footprint and is useable in confined spaces, providing heavy lift contractors with a stable lift up to 3 metres. The cribbing blocks are lightweight and can be handled manually.

Markets & Applications

Applications with a minimum starting height of 494 or 558 mm and requirement to lift up to

2067 or 3006 mm.

- Power Generation - transformer jacking
- Mining - equipment maintenance
- Heavy Transport - vehicle unloading
- Oil & Gas - module jacking
- Construction - bridge jacking
- Industrial Movers - lifting, lowering and levelling of heavy equipment.

◀ Completed in just over one hour, the 160 ton 50 x 7 meters steel racking system was lifted synchronously to a height of 2,2 meters using 16 Enerpac SCJ50 Cube Jacks powered by a single SFP-Series Split-Flow Pump. Lifting large racking systems can be hazardous, complex and difficult involving forklift trucks and chain blocks. Photo by courtesy of PHL Hydraulics Ireland Ltd.

▼ Forklift tabs on Cube Jacks for easy transportation and positioning with a pallet truck. See dimensions D and I to select the right pallet truck size.

Self-Locking Cube Jack

Easy-to-use, compact and portable jacking system that utilizes base lifting frames and self-aligning, lightweight steel cribbing blocks, instead of wooden cribbing materials.

Operation is simple:

1. Connect the Cube Jacks to the Enerpac Split-Flow Pump and select lifting mode on each base lifting frame.
2. Insert a cribbing block and actuate the Cube Jack until the cribbing block engages the lock mechanism.
3. Retract the jack and repeat the process until the desired lifting height is reached. For the lowering operation select lowering mode on each base lifting frame and reverse the process.

The Cube Jack End Block is equipped with an adjustable saddle for initial alignment with the load.

All controls except for the main directional valve, which is on the hydraulic power unit, are included on the Cube Jack.

Manual cribbing block insertion

Cribbing blocks are easily managed by hand and the Cube Jack includes integrated fork pockets and lifting rings for effortless positioning.

Synchronous Lifting & Lowering

Enerpac recommends using the SFP-Series Split-Flow Pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using separately operated pumps.

If synchronous lifting & lowering is required, the SFP-Series Pumps can be configured to accommodate stroke sensors and provide accurate computer controlled lifting function.

SCJ Series

Capacity Per Cube Jack:

500 - 1000 kN

Maximum Lifting Height:

2067 - 3006 mm

Maximum Operating Pressure:

700 bar

▼ SCJ100, Enerpac Self-Locking Cube Jack

Incremental lifting system with automated mechanical locking

Included with the Cube Jack are:

- Cube Jack Basic Unit
- End Block with adjustable swivel saddle
- Multiple cribbing blocks: **11x on SCJ50**
18x on SCJ100
- Transportation Frame
- Cribbing blocks can be manually inserted into the Cube Jack by one person.

Transport Frame

Provided with purchase of each Cube Jack. Provides storage and transport for base unit, end block, and all included cribbing blocks.

Lightweight Cribbing Blocks

Provided with purchase of each Cube Jack. Cribbing blocks can be manually inserted into the Cube Jack by one person. Spare cribbing blocks can be ordered separately.

Description	Model Nr.
1x Cribbing Block, 50 ton	SCJ5B
1x Cribbing Block, 100 ton	SCJ10B

Split-Flow Pumps

Enerpac recommend to use the **SFP-Series Pumps** with multiple outlets with equal oil flow.

For lifting and lowering applications on multiple points, Split-Flow Pumps are a far better alternative than using separately operated pumps.

◀ Heat exchanger maintenance job on the piping and condensers at a refinery using a combination of Enerpac Heavy Lifting Technology: SCJ-Series Cube Jacks, the ETT-Series Hydraulic Turntable and LH-Series Low-Height Skidding Systems.

▼ BLS1006

- Climbing jacks include integral tilt saddles with maximum tilt angles up to 5 degree
- Large base plate with anti-rotation rod for stability and safety
- Built-in safety valve prevents accidental over-pressurization
- Ideal in combination with the stage lift work mode of the EVO-Series synchronous lifting system
- Baked enamel finish for increased corrosion resistance
- CR400 couplers included on all models.

▼ Synchronous Stage Lifting: 48 double-acting jacks (25 and 50 ton) are networked in to a 16 points synchronous system to lift this 50 metres long, 1000 ton building up to a height of 2,5 metres to construct a new floor level.

A Simple Solution to Incremental Lifting

Lifting Height

Climbing Jacks overcome the usual limitation of lifting height imposed by the cylinder's plunger stroke length. Large objects, such as oil tanks, can be lifted, held and lowered for maintenance without sending for a crane.

Split-Flow Pumps

SFP-Series Pumps with multiple outlets with equal oil flow. For lifting and lowering applications on multiple points Split-Flow Pumps are a far better alternative than using separately operated pumps.

Page: 336

Synchronous Lifting System

The standard EVO-Series System is ideal for stage lifting, powering interlinked hydraulic cylinders. The EVO-system has 9 work modes including the stage lift work mode.

Page: 340

Jack-Up Systems

For incremental lifting with higher lifting capacities and up to 20 m lifting height, see our JS-Series Jack-Up Systems.

Page: 348

BLS Series

Capacity per Lifting Point:

50 - 200 ton

Stroke per Stage:

150 - 161 mm

Maximum Operating Pressure:

700 bar

▲ Stage Lifting Sequence

Step 1: The climbing jack is placed on a solid support under the load (retracted plunger).

Step 2: Plunger extends, lifting the load and giving clearance to insert two outer blocks under the spreading plate.

Step 3: Plunger retracts, giving clearance to position the central blocks which will support the plunger plate for the next extension.

Step 4: Plunger extends, lifting the load, giving clearance to insert two new blocks, placed crosswise under the spreading plate.

* Cribbing blocks are not supplied by Enerpac.

▼ JS250 and JS500 Enerpac Jack-Up System (one lifting tower shown)

- Self-contained hydraulics in each jack-up unit for uncluttered work area
- Synchronously lift loads with multiple jack-up units. The most common system set-up includes 4 jack-up units
- Adjustable top barrel is standard on all models
- Lifting barrels are stacked together to mechanically hold the load
- Up to 4% side load capacity depending on lifting height
- Computer controls for operating the jack-up system with automatic and manual lifting settings.

Incremental Lifting System – Synchronously Lift and Mechanically Hold

Typical Applications

- Bridge maintenance
- Lifting and lowering of heavy equipment
- Lifting, lowering and levelling of heavy structures and buildings
- De-propping/load transfer from temporary steel work.

Computer Controls

- Enerpac Jack-up Systems provide precision control suitable for many demanding lifting/lowering applications. The comprehensive self-contained design features simple to use software.
- Automatic synchronization of multiple networked lift points.
 - Overload and stroke alarms
 - Emergency stop switch at jack-up units and controls.

▼ Enerpac has been awarded a contract by Burkhalter to extend the height of Enerpac's 2000 ton (500 ton per tower) jack-up system from 20m to 36m for future projects.

▼ Enerpac Jack-Up System lifts 1500 ton span on Fore River Bridge.

▼ Undecking an 1500 ton Electric Rope Shovel in a Copper Mine with a JS500 Jack-Up System for bearing inspection and maintenance.

Enerpac Jack-Up Systems

Enerpac Jack-Up Systems

The jack up-system is a custom developed multi-point lifting system. A typical system setup includes four jack-up units positioned under each corner of a load.

Example: A four unit setup with JS250 has a lifting capacity of 1000 ton (250 ton per unit). The lifting frame of a jack-up unit contains four hydraulic lifting cylinders, one in each corner, which lift the load using the stacked steel barrels.

A load is lifted in increments as barrels are slid into the system, lifted, and stacked; forming 'lifting towers'. A jack-up system is operated and controlled by a computer control unit.

Each unit's lifting and lowering operations occur simultaneously; the computer control unit's synchronous technology maintains the balance of the load.

Jack-up System Smart Box

The **Smart Box SBSJ-SCCV4** is Enerpac's proprietary control platform. It allows an operator to control up to 8 jack-up towers simultaneously with one **SBLT1** standard laptop.

- Single operator control from a central location provides safe and reliable operation
- Synchronous lift /lower and load control between the lifting positions
- Automatic lifting and lowering cycles
- Displays individual and accumulative stroke/load
- Simple graphical user interface.

Adjustable Top Barrel

Adjustable top barrel is standard on all models.

Includes double-acting lock nut cylinder with swivel saddle.

Cylinder can be extended to contact the load. Provides ability to adjust starting height of each leg, ensuring safe and stable lifting. Must be operated with separate 700 bar pump with 4/3 directional valve.

▼ Shown: HSL50006 Strand Jack

- Precision control of synchronous lifting and lowering
- Can be controlled by a single operator from a central location for increased safety
- Automated locking - unlocking operation
- Two strand sizes: 15,7 mm and 18 mm (0.62 and 0.71 inch)
- Telescopic strand guide pipes prevent bird caging
- Internal components are coated with Lunac, an anti-corrosion coating, making it suitable for marine environments
- Lifting anchor included with all strand jacks
- Lloyd's witness tested to 125% of maximum working load.

▼ HSL85007 Strand Jack System used on Enerpac custom Self Erecting Tower.

High Capacity Precision Control

Heavy Lifting Strand Jacks

Enerpac strand jacks are the strand jacks of choice for customers seeking precise synchronous control with heavy-lifting capacity in an economical, compact, and reliable foot print.

Enerpac strand jacks are powered by electrical or diesel driven hydraulic power packs and controlled by Enerpac's proprietary SCC-Smart Cylinder Control System to ensure full control of lifting and lowering operations.

Enerpac continually improves reliability, durability, and safety of their strand jacks, making them an industry standard for heavy lifting.

▼ Enerpac's SCC-Smart Cylinder Control System simplifies synchronous operation with intuitive controls and a user-friendly graphical interface.

Heavy Lifting Strand Jacks

Strand Jacks

A strand jack can be considered a linear winch. In a strand jack, a bundle of steel strands are guided through a main "lifting" jack.

Above and below the cylinder are anchor systems with wedges that grip the strand bundle simultaneously. Lifting and lowering a load is achieved by hydraulically controlling the main jack and both mini jacks alternately.

In the case of system pressure loss, the wedges are mechanically closed automatically, holding the suspended load in place.

Today strand jacks are widely recognized as the most sophisticated heavy lifting solution. They are used all over the world to erect bridges, load out offshore structures, and lift/lower heavy loads where the use of conventional cranes is neither economical nor practical.

HSL Series

Capacity:
15 - 1250 ton

Stroke:
250 - 600 mm

Maximum Operating Pressure:
350 bar

▼ Strand Jack Accessories

Contact Enerpac for assistance at enerpac.com/contact-us

SLPP-Series Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with their industry leading heavy lifting strand jacks.

SG-Series Strand Guides

Provides a guide for the strand as a strand jack lifts the load.

SR-Series Strand Recoilers

Passively pays in or pays out strands while jacking and lowering.

SD1 Strand Dispenser

Essential to safely unbundle a new strand coil.

Lifting Anchor

Each Strand Jack includes a lifting anchor for attaching strand to the load.

▼ SyncHoist System with SHC5540S Cylinders and SHP-Series Pump

- High precision load manoeuvring, vertically and horizontally – using one crane
- Reduces the risk of damage from oscillations of wire rope due to crane jogging and sudden starts/stops
- Vastly improving worker safety, operating speed and control
- Weather conditions play less critical role
- PLC-controlled hydraulics turn lifting into high accuracy hoisting and load positioning system
- Double-acting push/pull cylinders with load holding valves for added safety in case of hose rupture or coupler damage
- Cost reduction compared to conventional load positioning methods.

Options for system management & control:

- Manual control with load and position monitoring for up to four cylinders as standard
- Automatic control available with addition of SFPSSC control panel provides automatic movements as well as stroke and load warning functions.

Accurate Hoisting and Load Positioning Enhancing a Crane's Capability

Synchronous Hoisting

Enerpac SyncHoist is a unique crane product for below-the-hook positioning of heavy loads that require precision placement. The SyncHoist system may reduce the number of cranes needed and reduce the costs of multiple picks.

Functions

- High precision horizontal and vertical load positioning
- Load and position monitoring standard on all units to ensure safe and accurate operation.

Applications

- Positioning of rotor, stator and propeller blades of wind turbines
- Positioning of roof sections, concrete elements, steel structures
- Positioning of turbines, transformers, fuel rods
- Precise machinery loading, mill rod changes, bearing changes
- Precise positioning of pipe lines, blow out valves
- Positioning and aligning of ship segments prior to assembly.

▼ Bridge segments are hoisted from the ground, being positioned with a 4-point SyncHoist system with fully monitored cylinders.

▼ Rigging engineers used the SyncHoist system to precisely monitor and adjust each lifting point independently, or together in a synchronized manner to position the 1140 ton nuclear plant module.

▼ Enerpac SyncHoist system in use during roof truss picks: precise lift and positioning of stadium retractable roof trusses. 33 trusses weighing between 450 - 750 ton.

SyncHoist - High Precision Load Positioning

What is SyncHoist?

Enerpac SyncHoist is a hydraulically operated auxiliary attachment for high precision load positioning for cranes.

The automatic version with PLC-controlled hydraulic pump monitors and guides the powerful double-acting push-pull cylinders integrated into the lifting points above the load. The SyncHoist system can be used for positioning, tilting and aligning of loads.

- Patented system
- European lifting directive and safety requirements as well as ASME BTH-1 standard for below the hook lifting devices.

SyncHoist improves safety, operating speed and control of load movement

Geometric positioning of heavy loads in a horizontal and vertical plane are frequently done using more than one crane.

Synchronising movements between cranes are difficult and risky. The lifting inaccuracy can result in damage to the load and support structures and puts workers at risks. The SyncHoist system can be used for controlled hydraulic horizontal and vertical material handling.

SHC-Series Cylinders

Standard stroke lengths and capacities shown serve most common applications. Contact Enerpac for custom stroke lengths and additional capacities to suit your specific application.

SHP-Series Manual Control

- Push button pendant control of up to four cylinders
- Load and position readout from sensors on SHC-series cylinders
- Visual check oil level, filter indicator.

Automatic Control Available

- Connect control panel **SFPSSC** to SHP-Series pumps to enable automatic control
- PLC-control and touch screen
- Pre-programmable motions and data recording
- System warnings for:
 - maximum cylinder load control setting
 - stroke and position control
 - thermal motor protection.

SHC, SHP Series

Capacity Per Lifting Point:

Lift Heavy Machinery Safely

Portable design with precision control

Header Beams

Sold in pairs and includes lifting points and fork pockets for easy positioning on gantry towers.

Description	Model Number
6 metres length	HBH6
8 metres length	HBH8

Skid Tracks

Skid tracks used for leveling and load distribution to reduce ground bearing pressure. Available in two standard lengths.

Description	Model Number
3 metres length	GST100-3
6 metres length	GST100-6

Lifting Anchors

Designed to transfer the load to the top of the header beam. Can accommodate a 250-ton shackle or attach directly to the lifted load.

Higher Capacities SL and SBL-Series Hydraulic Gantries

When the ML-Series Mini Gantry isn't quite enough capacity or height for your application,

Enerpac offers a full range of safe-to-operate full featured telescopic hydraulic gantries, up to 10.484 kN capacity and lifting heights up to 12 metres. Contact Enerpac for more details.

Mini-Lift Hydraulic Gantry

ML-Series, Mini-Lift Gantry

The cost-effective, compact ML40 Mini-Lift Hydraulic Gantry System, with wireless controls offers several key features:

Safety:

Stroke synchronization ensures a level lift regardless of load distribution. PLC-controlled lifting using feedback from a stroke encoder maintains even height on all legs and will stop the lift if necessary to prevent issues.

Capacity:

400 kN lifting capacity at full extended lift height. Even with its compact size, the ML40 can lift full capacity to full height of 5,5 metres (18 ft), making it the most versatile portable gantry in the market.

Compact:

Fits through standard doorway and is easily moved and set up. The ML40 gantry can be moved through the tightest spaces imaginable in all industrial settings. Easy to push, pull and maneuver, the ML40 can get into spaces that no other gantry can.

ML Series

Capacity (with 4 legs):

400 kN

Maximum Lifting Height:

5,5 metres

Wireless Pendant

- Stroke measurement and closed loop synchronization ensure level lifting and lowering
- Integrated 1.8 inch color display provides load and stroke information for all four lift points.

Mini-Lift Gantry Transport Frame

Galvanized steel transport frames to allow shipment of mini gantry legs via standard truck lines.

Two legs mount on each frame

which includes storage for controls and accessories.

Description	Model Number
Set of two frames	ML40TF

SL, SBL-Series, Telescopic Hydraulic Gantries **ENERPAC**

▼ SBL1100 with optional skid tracks, header beams, powered side shifts and lifting anchors

- Self-contained hydraulics and electronics
- Intelli-Lift wireless control system
- Self-propelled wheels or tank rollers
- Foldable boom on SBL600, SBL900 and SBL1100 to enable easy transport and set-up
- Full range of supplementary equipment: header beams, lifting anchors, side shifts and skid tracks
- All gantries comply to ASME B30.1, CE, UKCA and other safety standards
- Lloyds witness tested to 125% of maximum working load.

▼ Enerpac SBL-Series hydraulic gantries are used in a variety of applications to install turbines, transformers and other power generation equipment all over the world.

Precision Lift and Position of Heavy Loads

The Ultimate in Safety and Control

Intelli-Lift Wireless Control

The Intelli-Lift wireless control system is included with all Enerpac hydraulic gantries.

The Intelli-Lift controller offers superior safety and control and includes the following features:

- Encrypted bi-directional communication that eliminates interference from other devices
- Remote operation using multi channel wireless (2.4 GHz) or wired (RS-485) control
- High and low speed settings
- Automatic synchronization of lifting with an accuracy of 24 mm (0.95 inch)
- Automatic synchronization of travelling with an accuracy of 15 mm (0.60 inch)
- Overload and stroke alarms
- Remote side shift control
- Emergency stop switch.

ML40, Mini-Lift Hydraulic Gantry

400 kN lifting capacity at full extended lift height. Even with its compact size, the ML40 can lift full capacity to full height of 5,5 metres (18 ft), making it the most versatile portable gantry in the market.

Telescopic Hydraulic Gantries

Hydraulic Gantries

Telescopic Hydraulic Gantries are a safe, efficient way to lift and position heavy loads in applications where traditional cranes will not fit and permanent overhead structures for job cranes are not an option.

Hydraulic Gantries are placed on skid tracks to provide a means for moving and placing heavy loads, many times with only one pick.

Enerpac Hydraulic Gantry Systems:

- **ML-Series Mini-Lift**

Fits through standard doorway and is easily moved and set up. The ML40 gantry can be moved through the tightest spaces imaginable in all industrial settings.

- **SL-Series Super Lift**

The cost-effective SL-Series Super Lift offer control and stability for everyday lifting applications below 4000 kN up to 9 metres.

- **SBL-Series Super Boom Lift**

The heavy-duty SBL-Series Super Boom Lift boom style gantries offer increased lifting capacity of over 4000 kN to heights of 12 metres.

All Enerpac gantries are delivered with specific properties and control systems to ensure optimum stability and safety.

SL, SBL Series

Capacity with 4 towers:

1000 - 10.484 kN

Lift Height:

3,5 - 12 meters

▼ Optional Gantry Accessories

▼ LH-Series, Low-Height Skidding System

- **Low starting height saves time and increases versatility**
- **Portable design allows for easy transport and setup**
- **System can push or pull load without relocating skidding cylinder**
- **Skid track sections bolt together to allow each setup to be customized as needed**
- **Replaceable PTFE skid pads lower the total cost of ownership.**

▼ *LH400, Low-Height Skidding System provides the service team with the ability to maneuver and transport a press frame.*

Low-Height Skidding System for Heavy Loads

The Ideal Low-Height Jack & Slide Solution

Skidding Systems

The Skidding System is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed skid track.

A series of special PTFE-coated Teflon® pads are placed on the skid tracks to reduce friction. The push-pull cylinders are then connected by hydraulic hoses to our Split-Flow Pump. The Split-Flow Pump can be mounted on an optional pump cart for easy transport.

An optional storage and transport frame easily holds the equipment in between use.

▼ *LH400 Skidding used to remove an old press from a facility to make room for new equipment.*

Low-Height Skidding System

Low-Height Skidding Jack Starter Kit - LH400SK

A complete starter kit is available to fit the needs of any jack and slide application. This system comes with two skidding units that will support up to 3560 kN in total.

This kit will get the job done, but there are optional accessories available in addition (see page 360-361).

Each skidding unit will have 1 push-pull unit, 2 skid beams and 5 skid tracks.

LH400SK Starter Kit includes:	Model Numbers	Qty
Push-Pull Unit (1780 kN)	LHPP25	2x
Skid Beam A (1 meter)	LHSB1A	2x
Skid Beam B (1 meter)	LHSB1B	2x
Skid Track (1 meter)	LHST1	10x
Storage/Transport Frame	LHSF	1x

The Split-Flow Pump (to be ordered separately) has 2 outlets and can be easily towed on the pump cart. After the job is complete, components can be stowed on the included storage frame.

With all components stored dimensions are: 1080 x 935 x 1003 mm, and total weight 1350 kg.

▼ Shown: HSK1250 Skidding System

HSK-Series, Skidding System

- PTFE skid pads with dimpled surface for low friction and long lifetime
- Easy to replace skid pads, no tools necessary
- Bi-directional operation using push-pull cylinders avoid the need to reposition cylinders for switching direction
- Large load support surface on the skid beams for distributing load
- Bottom of skid shoes equipped with stainless steel sliding plates.

LH-Series, Low-Height Skidding System

- 2-in-1 track design for added support
- Intuitive pump controls (SFP-Series Split-Flow Pump)
- Easily reversible to change skidding direction
- Portable design for quick setup.

▼ A custom hydraulic Low-Height Skidding System will provide the maintenance team with the ability to maneuver and transport transformers with physical access limitations.

The Ideal Jack and Slide Solution

Skidding Systems

The skidding system is comprised of a series of skid beams moved by hydraulic push-pull cylinders, travelling over a pre-constructed track.

A series of special PTFE coated pads are placed on the skid tracks. The PTFE surface is matched with a sliding plate under the Enerpac skid beams, designed to achieve minimum friction coefficients. The skid beams are connected by hoses to a hydraulic electric or diesel driven power pack.

In addition to our standard skidding systems, we have the capability to create customized skidding systems to meet your specific requirements.

Controls

Enerpac offers several options for controlling our skidding systems. Wireless Controls allows the operator the freedom to view the skidding operation from multiple locations while providing complete control of all system functions.

Manual controls offer a cost-effective solution by utilizing manual hydraulic valves mounted directly on the skidding system power unit.

▼ HSKJ2500 Skid Shoe Jack.

Skidding Systems

Enerpac Skidding Systems are available in several versions:

- **B-Series (Skid Beam)** utilizes a tall skid beam with built-in push-pull cylinders. Skidding direction can be easily switched by flipping a lever on the attached gripper box.
- **J-Series (Skid Jack)** provides the same functionality as the B-Series with the added benefit of having a built-in cylinder for lifting or leveling the load.

- **LH-Series (Low-Height)** includes low-height skid beams that can fit in tight spaces while still offering high capacity. We also offer a track support for added rigidity when the surface is not fully supported.

* Low-Height Skidding System, see pages 358 - 361 for detailed and technical information.

Skid Tracks

Include specially constructed and easily replaceable PTFE coated pads. Skid track is sold separately.

Hydraulic Power Packs

Enerpac offers a comprehensive range of hydraulic power packs that are optimized for use with Skidding Systems.

ETT-Series Turntables, Safe and controlled rotation

The ETT-Series Turntables is your solution for rotating heavy loads during, before or after a lifting and skidding operation.

▼ ETR50H, Enerpac Trolley System (shown with Trolley Track Plates)

- **High transport speed:**
25 - 50 m/hour loaded,
100 m/hour unloaded
- **Suited for repetitive movements**
- **Runs on simple flat steel plate**
- **Ease of maintenance:**
– long maintenance intervals
– no consumables
- **Clean usage – electric driven**
- **Built-in synchronization – no need for forced external mechanical connection to synchronize movements**
- **Easy transport - compact design**
- **Hydraulic lifting cylinder option available**
- **Kits to accommodate other lifting options also available.**

▼ The trolley system speeds up offshore wind transition piece load out: the transition pieces are positioned in the clamping frames and moved along the track.

▼ ETR-Series electric trolley undergoing factory acceptance testing prior to shipment.

Safe & Synchronized Travel

Product Overview

The ETR-Series Trolley System is comprised of electrically-driven trolleys which can carry heavy loads along a fixed track system.

The entire system is controlled by a hand held wireless control system.

A typical system is comprised of 4 Trolleys, 2 Tracks and one Controller. Trolley Tracks and Wireless Control must be ordered separately.

Control Panel and Cables

Operate up to 8 trolleys (same capacity each) using control panel with included wireless controller:

- Automatic synchronization of traveling with an accuracy of 10 mm (0.39 inch)
- Dual-band radio with automatic frequency search
- Wireless remote operation
- High and low speed settings
- Emergency stop switch
- Control cables operate trolley and provide feedback to controller.

Control Panel

Model Number (380-415 VAC, 32A)	Dimensions (mm)			 (kg)
	L	W	H	
ETR-CPW8	1290	600	1100	250

Control Cables

Model Number	Description
ETR-CBL-15	15 metres control cable
ETR-CBL-25	25 metres control cable

ETR-Trolley System

The Enerpac Trolley System provides an alternative method with increased benefits over traditional skidding methods.

Load movements are more stable due to the continuous movement and ability to precisely control travel speed including acceleration and deceleration.

Key features:

Low speed (loaded):	25 m/hr
High speed (loaded):	50 m/hr
Travel speed unloaded:	100 m/hr
Accuracy:	10 mm
Sideload:	1,5% rated load
Sound Level:	< 80 dBA

- ① Electric Trolley ETR-Series
- ② Track Plate ETR-TP-015 or ETR-TP-030
- ③ Control Cable ETR-CBL-15 or ETR-CBL-25
- ④ Control Panel ETR-CPW8 (including wireless remote)
- ⑤ Split-Flow Electric Pump - SFP-Series Not shown. Optional for units with hydraulic cylinders

ETR50

ETR100

ETR Series

Capacity Per Trolley:

500 - 1000 kN

Travel Speed (loaded):

25 - 50 m/hr

Motor Power:

0,38 - 0,75 kW

Trolley Track Plates

Track plates provide level guidance and support for the trolley. Two plates placed side-by-side are used for operation of

ETR100-Series Trolleys. Maximum inclination of tracks is 0,2 degree.

Model Number	Description
ETR-TP-015	1,5 m Trolley track plate
ETR-TP-030	3,0 m Trolley track plate

Additional Mounting Options

Mounting kits are available to accommodate other lifting and rigging solutions.

Model Number	Description
ETR50-SMK	Enerpac SCJ50 on ETR50
ETR100-SMK	Enerpac SCJ100 on ETR100
ETR50-BMK	Swivel beam mount on ETR50
ETR100-BMK	Swivel beam mount on ETR100

Capacity per Trolley Unit ton (kN)	Model Number (one unit)	Motor Power (kW)	Dimensions (mm)											(kg)
			A	Hydraulic Stroke ¹⁾	Track Width ²⁾	E	F	G	J	K	L	M	N	
50 (500)	ETR50	0,38	245	–	200	456	1225	375	125	202	420	165	10	310
	ETR50H		257	50					71				22	
100 (1000)	ETR100	0,75	346	–	400	821	1415	510	170	415	600	210	15	850
	ETR100H		349	100					71				19	

¹⁾ ETR50H includes HCG502 Cylinder with CATS50 Swivel Saddle. ETR100H includes HCG1004 Cylinder with CATS101 Swivel Saddle.

²⁾ ETR100 series uses two track plates side-by-side.

▼ ETT400 Turntable

- Safe and controlled rotation of heavy loads
- Easily change rotation direction
- Dual capacity: 200 ton with one cylinder, 400 ton with two cylinders
- Compact size for use in applications with limited space
- Compatible with standard Enerpac pumps
- Hardwood surface.

▼ SELECTION CHART

Maximum Load Capacity (kN)	Model Number	Cylinder Capacity * (kN)	Cylinder Oil Capacity * (cm ³)		No. of Cylinders *	Rotation per Stroke (degrees)	Platform Diameter (mm)	(kg)
			advance	retract				
2000	ETT200	222	792	344	1	12,5	1790	1700
4000	ETT400	222	792	344	2	12,5	1790	1725

* Per cylinder. Cylinder modelnumber: **BRD259-ETT**

ETT Series

Maximum Capacity:
200 - 400 ton

Cylinder Capacity:
25 ton (222 kN)

Maximum Operating Pressure:
700 bar

Safe and controlled rotation

The ETT-Series is your solution for rotating heavy loads during, before or after a lifting and skidding operation.

SFP-Series, Split-Flow Pump

Split-Flow pumps distribute an equal amount of hydraulic oil to a maximum of 8 outlets. Smart valve technology allows both controlled lifting and lowering of heavy loads.

Page: **336**

LH-Series, Low-Height Skidding

The ETT-Series are ideal in combination with our skidding systems, particular the LH-Series. Skidding and rotating in confined spaces is simplified.

Page: **358**

Telescopic Hydraulic Gantries

The ETT-Series in combination with our hydraulic gantry SL-Series makes load handling in the most demanding situations easy.

Page: **356**

SPMT, Self-Propelled Modular Transporter

▼ SPMT600-360 with MTPP360 hydraulic power unit (HPU)

- Modular design for multiple configurations.
- Minimized height and slim design are ideal for in-plant operation
- Intelli-Drive wireless control system is intuitive and easy to use
- One power pack can operate 2-3 trailers maximum depending on model
- Two trailers and power pack can be shipped inside a 20 ft. container
- Hydraulic power unit is tier-4 diesel engine for reduced emissions.

SPMT Series

Capacity:

60 ton (600 kN)

Transport Speed (unloaded - loaded):

3 - 1,5 km/h

Motor Size:

54 kW

Self-Propelled Modular Transporter

The Enerpac Self-Propelled Modular Transporter (SPMT) features a minimized height and slim design, which makes it very easy to operate in confined spaces. Each wheel unit has a steering function as well as a lifting cylinder at its disposal. Two axles are driven, the centre axle is non-driven. Wheel propulsion is established by wheel drives.

The SPMT is operated by the Intelli-Drive Remote Controller. This remote controller can be used both hard wired and wireless (based on radio frequency).

The SPMT is a modular system and can be built up to a maximum configuration of six transporters in a row and two in the width. This is the maximum setup of units that can work together on just one Intelli-Drive Remote Controller.

The SPMT is a modular system comprised of trailers with 3 axle lines each and diesel hydraulic power units (HPU). Depending on the model number, the trailers and HPUs can be configured to a maximum of 4 trailers in 2 rows (4x2) or 6 trailers in 2 rows (6x2).

* HPU = 54 kW Power Pack Diesel is sold separately.

OFFSHORE GANTRY CRANE

The Enerpac Over Head Travel Crane (OHTC) comprises two pairs of lifting beams, with an overall width of 30m, and a lifting capacity of 4800 ton for lifting, moving and lowering the concrete blocks for the offshore highway.

STRAND JACK GANTRY

The strand jack gantry is a steel structure to facilitate erection and skidding back, forth and sideways of heavy loads. The Enerpac strand jack gantry can be used with either skidding systems or hydraulic gantries on top.

TRAVEL GANTRY

The travel gantry combines the safety and efficiency of a hydraulic gantry with the ease of use of SPMT (self-propelled modular transporter) technology. With a lifting capacity of 67 ton, the travel gantry sets a new standard in equipment and container handling.

BRIDGE LAUNCHING SYSTEMS

Spindle Bar System: group of in-line hollow plunger cylinders. The hollow plungers allow the steel bars to be inserted through the cylinders, which are used for pushing, pulling and braking. **Enerpac Enerlauncher** is an automatic and synchronous incremental hydraulic tandem launching system with a 800 ton lifting section and an 300 ton push/pull section.

JACK-UP SYSTEMS

The jack-up system is a custom developed multipoint lifting system – synchronically lift and mechanically hold. A typical system setup includes four jack-up units positioned under each corner of a load.

ROTOR REMOVAL AND INSTALLATION SYSTEM

The generator rotor removal and installation system is a custom developed product for removing and installing the rotor (field) in a power plant's generator. The system is designed to comply with the varying dimensions and challenging accessibility of a plant's generator.

CUSTOM HYDRAULIC PRESSES

Our hydraulic presses can be configured to fulfill a broad range of applications. Each press is designed and manufactured according to customer specifications and in cooperation with our engineering team.

SELF-ERECTING TOWER

The Enerpac Self Erecting Tower (ESET) is a self-erecting tower lift system that enables you to build a free standing gantry from ground level. The ESET can be supplied in various capacities and lifting heights and is built with standard modular components, enabling a flexible solution to future project demands.

LAS VEGAS WHEEL

Our expertise has been acknowledged by the world's leading industrial professionals and has contributed to the successful movement of a number of the most recognizable structures on earth. At the time of construction the Las Vegas High Roller was the largest observation wheel in the world. A custom hydraulic drive system was developed to propel the wheel for daily use and was also used to construct the wheel in sections.

FROM SIMPLE TO COMPLEX – LIFTING SOLUTIONS FOR YOUR APPLICATION

For those who do the heavy lifting today, the stakes are high and the challenges complex. We know our customers put their reputations and physical well-being on the line to get the job done right. We take that very seriously.

Backed by a global legacy of ultra-reliable quality and superior precision, Enerpac Heavy Lifting Technology is pushing the industry forward with a wide range of advanced solutions that first and foremost ensure our customers operate safely and productively every day. It isn't about being compliant, or "as good" as the next guy; we outpace the competition by delivering technically superior solutions that are easy to design, safe to use and built to outlast.

CONSULTATIVE APPROACH TO HEAVY LIFTING

From the very first discussion to gain an understanding of your application to solution design, training and ongoing field support of your operators, you will find a structured process and a team of application experts who will advise you towards a successful solution.

SOLUTION CONSULTATION

- Requirements Specifications
- Selecting the Right Solution for Your Application

Since the late 1950's, Enerpac has been steadfast in their commitment to work closely with customers to understand their lift needs and work-site environment. Not all lifts are the same. There are several factors that must be taken into consideration before recommending the best solution.

APPLICATION CONSIDERATIONS

LOAD CAPACITY

How much weight needs to be lifted, moved and/or positioned?

LIFT HEIGHT

How high does the load need to be lifted? Are there restrictions above or below the load?

TYPE OF LIFT

Will you lift from above or below?

SPACE

How much space is available to complete the task?

TIME

How the job needs to be completed within a set timeframe due to operational or environmental factors.

TRANSPORTATION

Does the load need to be transported as well as being lifted? How far and how often?

TOTAL COST OF OWNERSHIP

What productivity, labor or training costs need to be factored into the solution to make it the best long-term investment.

Because Enerpac engineers have designed solutions for a variety of applications over the years, they are well-equipped to minimize risks and to recommend a simpler solution that others may overlook. Built on a world-class reputation for developing products that meet the most common lifting applications,

once your specifications are in the hands of the Enerpac experts, you are sure to receive a comprehensive recommendation that will save time and money while ensuring safety above all else.

Enerpac has the most complete offering of standard heavy lifting and positioning tools in the market. These products are designed to highest standards of performance and offer great flexibility to meet the demands of even the most challenging applications. Our manufacturing facility adheres to world-class production planning and inventory management to ensure your product arrives at your facility on time as specified.

DESIGN & MANUFACTURING

- Design & Engineering
- Manufacturing Excellence

Design & Engineering

Enerpac engineers are experienced in the latest software, rapid prototyping, failure analysis methods and engineering standards. This allows us to continuously improve and expand our product offering to meet ever changing needs of the market.

- CE, Machinery Directive 2006/42/E
- ASME: B30.1

Assembly & Quality Assurance

All Enerpac products are assembled by highly trained individuals, working safely and efficiently from start to finish. The Hengelo, NL facility that manufactures the Enerpac heavy-lifting equipment holds several quality certifications.

- ISO 9001: 2015
- ISO 3834-2: 2005
- ISO 14001: 2015
- ISO 45001: 2018

Fabrication & Machining

A dedicated steel fabrication and certified welding facility manufactures product components and support structures for the most demanding heavy-lifting applications. Complete in-house production is delivered using the latest CNC and conventional turning machines plus a full range of milling and boring equipment.

TESTING & TRAINING

- Quality Assurance
- Operation & Safety Training

The Enerpac facility, that makes and builds your heavy-lifting equipment, holds several quality system certifications giving you extra confidence in the safety and reliability of your heavy-lifting equipment. Whether your first lift or move is scheduled upon taking delivery of your new equipment or months later, you will have access to the dedicated Heavy-Lifting team to support your training or troubleshooting needs.

Factory Acceptance Testing (FAT)

Customers are invited to witness FAT, often combined with operator training. Under witness of Lloyd's Register, all equipment is functionally tested to maximum capacity, and in many cases up to 125% of rated load. Additional testing to meet standards compliance, government regulations or specific customer requirements are performed and documented at the same time.

Documentation

Upon delivery of your new heavy-lifting equipment, an operator's manual outlines the configuration of your system, detailed operating instructions with safety guidelines, and maintenance recommendations.

Training

Customers who attend factory acceptance training at Enerpac's facility can also receive a day of training on their heavy lifting equipment. Additional training or on-site custom training can also be arranged.

Once you take possession of your new heavy-lifting equipment, you have on-demand access to our field support team. And support continues with ongoing maintenance or system upgrades throughout the life of your assets.

ON-DEMAND SUPPORT

- On-the-job Application Engineer Support
- Routine Maintenance & Repair Services

On-the-Job Field Support

Should you ever require extra support while using your Enerpac Heavy-Lifting system on the job, our dedicated application engineers will work closely to guide your operators on appropriate use of our equipment. And to ensure job safety, they will travel to your job site as needed to ensure your project is completed timely and without incident.

Product Warranty

All Enerpac Heavy-Lifting equipment is built to stringent specifications and built to last. Should you ever encounter a defect in materials or workmanship under normal use, it will be remedied through our standard one-year warranty program.

Maintenance & Repair

Downtime is minimized with fast delivery of repair parts and consumables stocked at several locations worldwide. For those that want the added confidence of specialized technicians, the Enerpac Maintenance & Repair team are ready to perform your maintenance or repair services for you.

Since joining the Enerpac portfolio, the design innovation of Mirage machines has continued to deliver new products that help get the job done faster, safer, and smarter. Explore the full Mirage product line from flange facing machines, milling machines, hot tapping, drilling and tapping machines to clamshell pipe cutters, decommissioning and band saws. All backed by Enerpac training, application support and service.

Design & Innovation

On-site Machine Tools are the result of over 25 years of expertise and innovation. The pioneering spirit continues under Enerpac ownership through our commitment to new product development. Watch out for more new tools being launched in the near future!

Continuous Improvement

Our specialist manufacturing operation is ISO9001 certified. This means we drive a culture of continuous improvement. Our team members are encouraged to find ways to improve today, tomorrow, and long into the future.

Specialist Support, Experience & Expertise

Each machining project presents difficult and unique challenges. Making the right choice for your next and any future projects can be complex. That is why our team is eager to support you through every step on your journey. Whether it is choosing the right specification, commissioning your machine, or maintenance - we're with you all the way.

Internal Mount Flange Facing Machines

FF120

- Mechanical tool manually operated
- Simple to operate
- Lightweight - only 15 lbs (6,8kg)
- Multiple leadscrew options allow for manually driven continuous fixed feeds for ASME standard surface finishes
- Calibrated slide to define cut depth and correct finish.

MM305I and MM610I

- Swivel toolpost for groove details, reduces the need for separate accessories
- Supplied with a range of 2 quick set base sizes for improved onto site operation
- Collet base allows for efficient machine mounting and centering.

MM860I and MM1000I

- 360 swivel toolpost for groove details, reduces the need for separate accessories (power feed on MM1000I)
- Supplied with a range of 3 quick set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting.

MM1500I

- Power feed 360 swivel toolpost for groove details, reduces the need for separate accessories
- Supplied with a range of 3 quick set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting.

MM2000I

- Power feed 360 swivel toolpost for groove details, reduces the need for separate accessories
- Supplied with a range of 2 quick set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting.

MM3000I and MM4500I

- Power feed 360 swivel toolpost for groove details, reduces the need for separate accessories
- Supplied with a range of 3 quick set base sizes for improved onto site operation
- Adjustable height clamping jaws for efficient machine setting
- Milling accessories available with the Hydraulic drive version.

Flange Facing Machines

Flange Facers are known for precision construction, the results they deliver, and how easy they are to set-up on-site. These high-performing machines produce continuous groove facing feeds to ASME standards for the oil & gas, power generation and petrochemical industries.

MM-I Series feature

- Hardened slideways for long term accuracy
- High torque low noise drive
- Heat exchanger machining accessories available on most models.

Applications

- Heat exchanger flanges
- Hub profiles
- Lens ring joints & Raised face flanges
- Recessed gaskets and spigots
- Ring type joint grooves (RTJ)
- SPO compact flanges
- Swivel ring & TECHLOK flanges
- Welding preparations.

▼ MM860I machine to ensure flange joint integrity.

Flange Facing Machines

External Mount Flange Facing Machines

MM200E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long term accuracy
- Swivel toolpost for groove details, reduces the need for separate accessories
- Continuous fixed feed for ASME standard surface finish
- Quick set integrated clamping jaws.

MM300E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long term accuracy
- Swivel toolpost for groove details, reduces the need for separate accessories
- Multiple continuous fixed feeds for ASME standard surface finishes
- Quick set intergrated clamping jaws.

MM600E

- Preloaded cross roller bearing drive, ensuring robust, accurate, repeatable machining
- Hardened slideways for long term accuracy
- Power feed 360 swivel toolpost for groove details, reduces the need for separate accessories
- Multiple continuous fixed feeds for ASME standard surface finishes
- Quick set intergrated clamping jaws.

MM760E, MM1000E, MM1250E, MM1500E, MM1775E, MM2000E

- Continuous variable auto-feed for ASME standard finishes
- Choice of pneumatic and hydraulic drive motors
- Quick-set radial clamping adjustment
- Quick-set axial adjustment jaws
- Heavy duty bearing construction for high metal removal rates and accuracy
- Heat exchanger kits for back facing and slot machining in one operation.

External Mount Facing Diameter:

0 - 80" / 0 - 2032 mm

Cutting Resultant Roughness:

Ra 125-492 μin / 3,2-12,5 μ

Surface finish & accuracy

All flange facing machines provide a serrated finish with 30-55 grooves per inch and a resultant roughness of between Ra 3,2-12,5μ (125-492 micro inches). Geared multiple continuous groove facing feeds for a gramophone finish (ASME Standard).

▼ MM600E external mount flange facing machine to ensure flange joint integrity.

Narrow Body & Mid-Size Clamshell Cutters

DLR-NB12, NARROW BODY CLAMSHELL CUTTER

- NB or "Narrow Body" portable clamshells are ideal when space is at a premium
- Standard NB-series cover a range from 2 to 36" outside diameter (51 to 914 mm)
- Narrow body design: ideal when space is at a premium or obstructions present
- Pneumatic, hydraulic, and electric drive options
- Several different drive options are available to best position the motor for a specific machining application
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and sever tools available.

DLR-MS30, MID-SIZE CLAMSHELL CUTTER

- Mid-size machines weigh less than the HD heavy-duty series, but provide greater rigidity than the NB-narrow body series
- Standard MS-series cover a range from 4 1/8 to 48 1/4" outside diameter (105 to 1226 mm)
- Increased manoeuvrability and greater clearance than the HD series
- Several different drive options are available to best position the motor for a specific machining application
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and sever tools available.

DL Ricci Clamshell Cutters

Clamshell cutters in the Enerpac range remain true to the pioneering designs that made DL Ricci the 'go-to' brand for machinists worldwide. Outstanding performance and a comprehensive choice has seen them used widely for applications in new construction, decommissioning, component replacement, fabrication, and maintenance.

Robust and efficient pipe cutting and bevelling

Designed for any industry that needs pipe or tube cutting, or any pipe end preparation weld repair. This may be in oil and gas sector, power generation, ship building/dock yards, or processing plants during maintenance and shut downs.

Applications

- Pipe cutting
- Weld preparation
- Cutting materials, including super duplex, carbon steel, stainless steel, hastelloy and incolloy
- For pipe diameters up to 86 inch (2184 mm)
- Ideal for projects beyond the usual clamshell configuration – using a wide range of purpose designed accessories.

Included as Standard with Each Machine

- Clamshell body
- Locators & extensions covering the full range
- Slides
- Motor & Mounting
- Air Caddy
- Tool Kit
- Manual
- Shipping crate.

Clamshell Pipe Cutting & Beveling Machines

HD Heavy-Duty Clamshell Cutters

DLR-HD54, HEAVY-DUTY CLAMSHELL CUTTER

- Robust body design - ideal for large diameter heavy wall pipe applications
- 16 HD-models cover a range of 20 - 86" outside diameter (508 - 2184 mm)
- Pneumatic and hydraulic drive options
- Fully adjustable heavy duty bearing design provides greater serviceability
- Stepped and keyed gear clamps equipped with a through bolt provide a positive fit at each assembly joint
- Accepts a wide range of accessories to increase performance and expand capabilities
- Full range of bevel and sever tools available.

Recommended Accessories for Clamshell Cutters

Other clamshell accessories available. Details available on request.

Counter-bore Swivel Head Modules

- 10 inch size available
- Match boring applications
- Up to 60 degree adjustability in the head
- Internal diameter bevelling.

Description	Part Number
2 inch travel	F0108A1224AA-SK
6 inch travel	F0108A1224AB-SK

Low Profile Tool Slide

- Brings cut line closer to the back of machine
- Allows cutting & bevelling on short pipe sections
- Use for facing, RTJ grooves and compound angle weld preparations.

Description	Part Number
Low profile slide	F0130A0016XX

Out-of-round Tool Block Slide

- Dual compensating Spring Assembly
- Rides on OD of pipe and tracks the contour
- For up to 1 inch out-of-round.

Description	Part Number
Out of round slide	F0130A0022XX
Tripper for NB models	F0145A0019XX
Tripper for MS models	F0145A0020XX
Tripper for HD models	F0145A0028XX

▼ OM6000 Orbital Milling Machine

Machine large flanges accurately and efficiently

- Precision flatness tolerances across large diameters
- Hydraulic high-torque anti-backlash drive
- Precision preloaded linear rotary drive
- Adjustable fast-set hydraulic chuck
- Rigid and adjustable mounting base.

OM Series

Cutting Diameter Range:

98 - 315 inches

Cutting Diameter Range:

2500 - 8000 mm

General Orbital Milling Machines

Orbital milling machines are designed to deliver fast material removal and achieve high accuracy across large flange diameters.

Applications

- Machining crane bearing faces
- Repairing drag lines
- Machining large flanges
- Machining ship thruster flanges.

▼ Milling a ship thruster flange.

▼ Machining crane bearing face.

Wind Power Orbital Milling Machines

▼ WP3500 Wind Power Orbital Milling Machine

WP Series

Cutting Diameter Range:
70 - 181 inches

Cutting Diameter Range:
1800 - 4600 mm

Wind Power Orbital Milling Machines

The wind power orbital milling range is designed especially for companies manufacturing wind turbine rotor blades and towers.

Applications

- Wind turbine blade root end milling
- Wind tower flange machining.

Machine large flanges accurately and efficiently

- Fully packaged system; includes trolley, power unit and base
- Accurate and repeatable process time
- Minimum distortion fast mount hydraulic base
- Adjustable arm for different diameters
- Patented hydraulic mounting system for blade and tower production
- Direct drive spindle
- High torque anti-backlash drive.

2-Axis Milling Machines

LMR1000, 2-AXIS MILLING MACHINE

- Ideal for lightweight applications
- Hand feed to main axis; auto feed optional
- Features ER40 Collet with ISO30 spindle option
- Choice of Pneumatic and Hydraulic drive.

MR1000, 2-AXIS MILLING MACHINE

- Induction hardened 'V' rails ensure accuracy and durability
- Ball-screw feed
- Hand & auto feed to main axis
- Direct drive ISO 40 spindle
- Choice of Pneumatic and Hydraulic drive
- Variety of mounting options including; bolting, switch magnets, pipe chain clamps and gantry.

LMR, MR, MRY Series

X-Axis Maximum Stroke:

40 - 120" / 1,0 - 3,0 m

Y-Axis Maximum Stroke (MRY-Series only):

12 inches / 305 mm

3-Axis Milling Machines

MRY1500, 3-AXIS MILLING MACHINE

- Induction hardened 'V' rails ensure accuracy and durability
- Ball-screw feed
- Hand & auto feed to main axis
- Direct drive ISO 40 spindle
- Choice of Pneumatic and Hydraulic drive
- Variety of mounting options including; bolting, switch magnets, chain clamps and gantry.

Linear Milling Machines

Gantry Milling Machine

GMRF1000, GANTRY RAIL KIT

- Modular jointing system for lengths up to 10 m
- Linear rail and precision carriages
- Quick set up with jacking system
- Auto and manual feed
- Optional quick-set magnets for mounting.

GMRF Series

X-Axis Maximum Stroke:

40 - 394" / 1,0 - 10,0 m

Y-Axis Maximum Stroke:

40 - 118" / 1,0 - 3,0 m

Linear Milling Machines – Take workshop precision to your next on-site milling project

These precise and robust milling machines are available in 2 and 3 axis configurations. Each includes the latest workshop tool technology in a portable format. For a fast and efficient set-up, you can choose our optional switch magnets.

Applications

- Motor and pump mounting pads
- Aerospace machining
- Crane pedestals
- Heat exchanger repair
- Shaft keyways
- Steel mill housings
- Turbine split line machining.

▼ **HTM100**

HTM, MANUAL HOT TAPPING

- Operates to 1480 psi (102 bar)
- Versatile hot taps, bypass lines and completion plugs
- Manual rotation & feed
- Optional pneumatic feed
- 2" NPT connection
- Lightweight construction.

▼ **LPHT312**

▼ **MHT312**

LPHT312, LOW PRESSURE HOT TAPPING

- Operates up to 285 psi (20 bar)
- Pneumatic or hydraulic drive
- Depth stop to ensure correct hot tap distance.

MHT, HOT TAPPING MACHINES

- Pressure rating up to 1480 psi (102 bar)
- Helical geared drive situated close to the cutter
- Hydraulic and pneumatic drive options
- Industry standard connection flanges
- Compatible with industry standard tooling
- Fast traverse feed motors available
- Cutter holders included
- Interchangeable seal cartridge.

HTM, LPHT MHT Series

Tapping Diameters:

1/2 - 60" / 12,7 - 1524 mm

Maximum Stroke:

18 - 150" / 457 - 3810 mm

Maximum Operating Pressure:

285-1480 psi / 20-102 bar

Hot Tapping – Built to deliver power where it matters most

Hot tapping is a high-pressure intervention and our range of hot tapping machines can help towards a safe and effective solution. Industry-leading innovations used include a helical gear drive located as close to the cutting head as possible for maximum efficiency, rotary pressure seals, and four fixed feeds.

Applications

- Construction tie-ins
- Gas distribution
- Petrochemical pipelines
- Subsea pipelines
- Temporary installation
- Transmission pipelines
- Valve installation and repair
- Water mains pipelines
- Wellhead maintenance.

3 - 48" / 76 - 1219 mm

Maximum Stroke:

43 - 150" / 1092 - 3810 mm

Maximum Operating Pressure:

1480-5000 psi / 102-350 bar

▼ LSA1420-H

LSA-Series Line Stop Actuators

Line Stop Actuators (LSA) are used in conjunction with the required line stop head and housings to carry out line stops in surface or subsea environments.

The range is designed for easy use on pipelines in various materials and differing wall thickness. Their use provides temporary pipeline isolation, temporary or permanent bypass and no costly interruption of service.

CHT, HOT TAPPING MACHINES

- Working pressure capacity up to 5000 psi (350 bar)
- Drive as close to the cut enhances cut efficiency
- Auto feed - infinitely variable for differing cut conditions
- Constant pressure seal monitoring ports
- Internally pressure balanced for higher pressure applications
- Industry standard connection flanges
- Compatible with standard industry tooling.

LSA, LINE STOP ACTUATORS

- Series of four hydraulic line stop actuators covering a plugging head size range of 4 to 48 inches (102 - 1219 mm)
- Maximum working pressure of 1480 psi (102 bar) at 181 °F (83 °C)
- Failsafe mechanical lock prevents control rod movement
- Anti-rotation feature to ensure aligned plugging head deployment
- Hydraulic control situated at the working end of the cylinder for ease of use
- Visible control bar depth control.

Cutting the toughest materials in the most challenging environments

- Strong aluminum frame
- Overload clutch for bow damage prevention
- Hydraulic Auto Clamp and auto-feed
- Diver and ROV compatible
- Available with optional flotation modules for deep water use
- User replaceable clamp contact pads, wheels, and wheel liners
- Crimped or continuous loop wires available.

MDWS Series

Cutting Diameters:

6 - 60" / 152 - 1524 mm

Decommissioning Saws

A range of portable saws for a diverse range of tubular severance projects.

The band saw range delivers a cost-effective solution to cold cutting requirements in either surface or subsea situations. Diamond wire saws are ideal for cutting through dissimilar materials quickly.

Applications

- Offshore platform decommissioning
- Conductors, caissons, piles
- Multiple grouted strings
- Subsea ROV-applications
- Subsea structures
- Pipes, casings and risers.

Items included with each machine;

- Diamond wire rope
- Toolkit
- Storage / shipping crate
- CE Certificate
- Packing list and manual.

▼ BS1636-H

Cutting the toughest materials in the most challenging environments

- Fast, efficient and cost effective cold cutting
- Cuts grouted multiple casings
- Fast mounting system
- Vertical or parallel operation
- Fast clamping and set up
- Low height design for minimum clearances
- Extensive blade selection for all materials.

BS Series

Cutting Diameters:

9 - 36" / 228 - 914 mm

On-site Band Saws

Hydraulically powered portable band saws designed for tubular severance. Designed primarily for topside use, but also suitable for subsea applications.

Applications

- Offshore platform decommissioning
- Conductors, caissons, piles
- Multiple grouted strings
- Subsea ROV-applications
- Subsea structures
- Pipes, casings and risers.

Items included with each machine:

- Band Saw blade (2-3TP carbide tipped)
- Toolkit
- Storage / shipping crate
- CE Certificate
- Packing list and manual.

Drilling & Tapping

Make light work of the toughest drilling and tapping applications

Drilling and tapping projects on-site require powerful and stable machines that deliver precise results first time.

Our machines are designed to do exactly this - giving you reassurance that the job will be done efficiently and to the right specification. They offer high torque and easy operation through their heavy-duty spindles with ISO standard tapers.

Optional switch magnet mounts and chain clamps are also available for a quick and easy setup.

For large scale offshore decommissioning projects, casing pin drills provide an effective solution for creating lift holes into casings - especially in the most challenging of working environments.

Applications

- Drilling through armour plate
- Bulkhead hole cutting
- Flange stud drilling
- Flange stud re-threading
- Motor pump stud removal
- Short stroke line boring
- Turbine case stud removal
- Turbine pin drilling
- Casing pin drilling.

▼ GeniSYS™ IV CNC Mill

Removal of cracked or broken studs, refurbishment of damaged threads

- CNC software allows the geniSYS to be programmed to perform multiple tasks within its working envelope
- Can create bore and thread hole diameters ranging from 22,2 mm – 279,4 mm (0.875 – 11 inches)
- Hole depths up to 384 mm (15.12 inches)
- High tolerance profile rails produce consistent results
- All three axes utilize precision ground ball screws, providing precise movement of the milling head
- Accurate and repeatable machining
- A cold cutting operation
- Ejects chips during operation
- Single machine capable of drilling, threading and general milling applications.

▼ Thread cutting

GeniSYS IV On-site CNC Mill

The GeniSYS™ IV is a highly portable 3-axis CNC milling machine.

The motion control command center provides the ultimate in performance monitoring and technician safety.

Designed for the accurate removal of cracked or broken studs up to 11 inch diameter and the precise refurbishment of damaged threads. This is achieved without the need for manually controlled drilling or metal disintegration techniques.

Can be used for automated general profile milling applications.

Typical examples

- Manway covers
- Reactor studs
- Bolt extraction and threading applications
- Recirculation pumps
- Turbine cases
- Heat exchangers
- Motor bases and many more high impact assets.

▼ GeniSYS IV CNC Milling Machine.

GeniSYS™ IV On-site 3-axis CNC Milling Machine

GeniSYS

Hole Diameter:

7/8 - 11" / 22 - 279 mm

Hole Depths:

Up to 15.12" / 384 mm

▲ A typical thread before refurbishment

▲ New machined thread

▲ Enlarging a hole

▲ Coring out the centre of a bolt (minor diameter).

Included as Standard

The machine is supplied complete with the following items:

- GeniSYS IV milling machine
- Control System
- Laptop
- Motor and Cables
- Storage / Shipping Boxes
- Operator's Manual.

Tooling

Standard tooling packages available to support general milling and thread milling applications.

▼ Shown: MITT6A, MITT16A, MITT2A, MITT1A Isolation & Test Tools

Ultimate Versatility in Piping Isolation and Pressure Testing

Inline Isolation & Test Tools

MITT series tools obsolete traditional pipe cleaning and hydrotesting methods used for maintenance and construction operations.

Improve operator safety and reduce system downtime by eliminating cleaning requirements and limiting test pressure volume.

The MITT series tools improve safety by limiting the test pressure volume and reduce downtime by eliminating cleaning requirements.

Key benefits of the tools include:

- Significantly reduce maintenance project timelines
- Safely perform welding on hydrocarbon lines with the peace of mind of a positive pressurized hydrostatic isolation
- Achieve significant reduction in wastewater (<1,0 litres of water required for a 24 inch test)
- Patent Pending.

- **Combination Isolation and Test Tool assures vapor-free isolation for hot work and high-pressure capability between seals for testing welds with one tool**
- **Multi-schedule capability – up to 6 schedules covered per tool, 40 tools cover 154 pipe diameter / schedule combinations**
- **Lightweight, slim and versatile design – no crane required, able to mount in elbows and tees, able to test mismatched schedules**
- **High-pressure capability – test welds with relative ease up to 310 bar**
- **Self-centering tools are user-friendly and require minimal training**
- **Hydrodynamic capability for heat treating.**

MITT Series

Pipe Diameters:

3/4 - 40 inch

Water Capacity per Test:

0,4 - 3,0 litres

Maximum Test Pressure:

310 bar

Cost-Effective Spares

Buna 90 shore hardness seals and stainless steel seal backing rings provide additional pressure capacity for a low cost.

Ancillary Kit – MITTAK

All ancillary components required to safely isolate piping and test new welds (includes manual valves, gauge set, hoses, hand tools, fittings).

Pump and Reservoir

To match the full capability of the tools, the **MP350** hand pump and **MP10T** reservoir are recommended.

▼ MITT2A tool being torqued in a test stand for high pressure testing.

Enerpac 'Yellow Pages' stand for Hydraulic Information!

If selecting hydraulic equipment is not your daily routine, then you will appreciate these pages. The 'Yellow Pages' are designed to help you work with hydraulics. They will help you to better understand the basics of hydraulics, of system set-ups and of the most commonly used hydraulic techniques. The better your choice of equipment, the better you will appreciate hydraulics. Take the time to go through these 'Yellow Pages' and you will benefit even more from Enerpac High Pressure Hydraulics.

ENERPAC WARRANTY STATEMENT

Visit our website for the complete Global Lifetime Warranty or call your Authorized Service Center.

Learn more about hydraulics

Enerpac is certified for several quality standards. These standards require compliance with standards for management, administration, product development and manufacturing. Enerpac worked hard to earn the quality rating ISO 9001, in its ongoing pursuit of excellence.

DIN-ISO 1402

Enerpac Thermoplastic and Rubber Hoses have been tested and confirm to this Standard.

ASME B30.1-2015

Our cylinders fully comply with the criteria set forth by the American National Standards Institute (except RD, BRD, HCL, LPL, CUSP and JHA-Series).

Product Design Criteria

All hydraulic components are designed and tested to be safe for use at max. 700 bar (10.000 psi) pressure unless otherwise specifically noted.

Where specified, Enerpac electric power units meet the design, assembly and test requirements of the Standards Council of Canada (CAN C22.2 No. 68-92), and UL73 for the United States. Units were tested and certified for both USA and Canada by TÜV and by CSA, USA-OSHA-NRTLs., (Nationally Recognised Testing Laboratories).

EMC Directive

Where specified, Enerpac electric power pumps meet the requirements for Electromagnetic Compatibility per EMC Directive 2014/30/EU.

CE Marking & Conformity

Enerpac provides Declarations of Conformity or Incorporation, as applicable, and CE Marks for products according to the EU Directives.

ATEX 95 Certified

The S, W, DSX and HMT-Series torque wrenches, ZA, XA, LAT and ATP-Series air driven pumps, SWi-Ex-flange spreaders, HP-Ex hand pumps and the 144-type hoses are tested and certified to conform to the Directive 2014/34/EU "ATEX Directive".

The explosion protection is for Equipment Group II, Equipment Category 2 (Hazardous Zone Area 1) in Gas and/or Dust atmospheres.

Safety Instructions

When used correctly, hydraulic power is one of the safest methods of applying force to your work. And to that end we offer some DO's and

DON'Ts, simple common sense points which apply to practically all Enerpac hydraulic products.

- Lift slowly and check the load often
- Avoid standing in the line of force
- Anticipate possible problems and take steps to avoid them.

The line drawings and application photo's of Enerpac products throughout this catalog are used to portray how some of our customers have used hydraulics in industry.

In designing similar systems, care must be taken to select the proper components that provide safe operation and fit your needs.

Check to see if all safety measures have been taken to avoid the risk of injury and property damage from your application or system.

Enerpac can not be held responsible for damage or injury, caused by unsafe use, maintenance or application of its products.

Please contact the Enerpac office or a representative for guidance when you are in doubt as to the proper safety precautions to be taken in designing and setting up your particular system.

In addition to these tips, every Enerpac product comes with instructions spelling out specific safety information. Please read them carefully.

Jacks

Provide a level and solid support for the entire jack base area.

The entire jack saddle must be in contact with the load. Movement of the load to be in the same direction as jack plunger.

Never place any part of your body under the load. Ensure the load is on a solid support before venturing under.

Remove the jack handle when it is not being used.

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

Both couplers must be connected when using double-acting cylinders. Ensure return hose is fitted.

Do not use cylinder without saddle. This will cause plunger to "mushroom". Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 65 °C (150 °F).

General

**Manufacturer's rating of load and stroke are maximum safe limits.
Good practice encourages using only 80% of these ratings!**

Always read instructions and safety warnings that come with your Enerpac hydraulic equipment.

Don't override the factory setting of relief valves. Always use a gauge to check system pressure.

Pumps

Don't use handle extenders. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will ruin the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Use only genuine Enerpac hydraulic oil. Wrong fluid can destroy seals and pump and will render your warranty null and void your guarantee.

Hoses and couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Keep hoses away from the area beneath loads.

Don't kink hoses. Bending radius should be at least 115 millimetres. Don't drive over or drop heavy objects on hoses.

Don't lift hydraulic equipment by the hoses.

Never allow the cylinder to be lifted off of the ground through the couplers.

1 Cylinder

Applies hydraulic force.
Page 5

2 Cylinder Base Plate

For applications like lifting where additional cylinder stability is required.
Page 10

3 Pump

Provides hydraulic flow.
Page 75

4 Hose

Transports hydraulic fluid.
Page 128-129

5 Male Coupler

For quick connection of the hose to system components.
Page 130-131

6 Female Coupler

For quick connection of the hose end to the system components.
Page 130-131

7 Gauge

To monitor pressure of the hydraulic circuit.
Page 136-142

8 Gauge Adaptor

For quick and easy gauge installation.
Page 142-143

9 Swivel Connector

Allows proper alignment of valves and/or gauges. Used when units being connected cannot be rotated.
Page 143

10 Auto-Damper Valve V10

Used to protect gauge from damage due to sudden pressure pulses in the system. Needs no adjustment and allows correct positioning of gauge, prior to tightening.
Page 144-145

11 4-Way Directional Control Valve

Controls the direction of hydraulic fluid in a double-acting system.
Page 122-123

Single-acting push application, such as in a press.

The hand pump offers controlled cylinder advance, but may require many hand pump strokes in longer stroke applications when the cylinder capacity is 25 ton or above.

Examples of pump, hose and cylinder sets can be found on pages 62-65.

Single-acting cylinder with longer stroke used for lifting applications.

Double-acting cylinder set-up used for lifting applications where a slow controlled descent of the load must be maintained.

Double-acting cylinder set-up used in a push/pull application.

12 3-Way Directional Control Valve
Controls the direction of hydraulic fluid in a single-acting system.
Page 122-123

13 Safety Holding Valve V66
Controls load descent in lifting applications.
Page 144-145

14 Manifold
Allows distribution of hydraulic fluid from one power source to several cylinders.
Page 132-135

15 Needle valves V82 and V182
Regulates the flow of hydraulic fluid to or from the cylinders.
Page 144-145

Two point lifting set-up using single-acting cylinders.

Four point lifting set-up, using single-acting cylinders and directional control valves.

Flow

A hydraulic pump produces flow.

Pressure

Pressure occurs when there is resistance to flow.

Pascal's Law

Pressure applied at any point upon a confined liquid is transmitted undiminished in all directions (Fig.1). This means that when more than one hydraulic cylinder is being used, each cylinder will lift at its own rate, depending on the force required to move the load at that point (Fig. 2).

Cylinders with the lightest load will move first, and cylinders with the heaviest load will move last (Load A), as long as the cylinders have the same capacity.

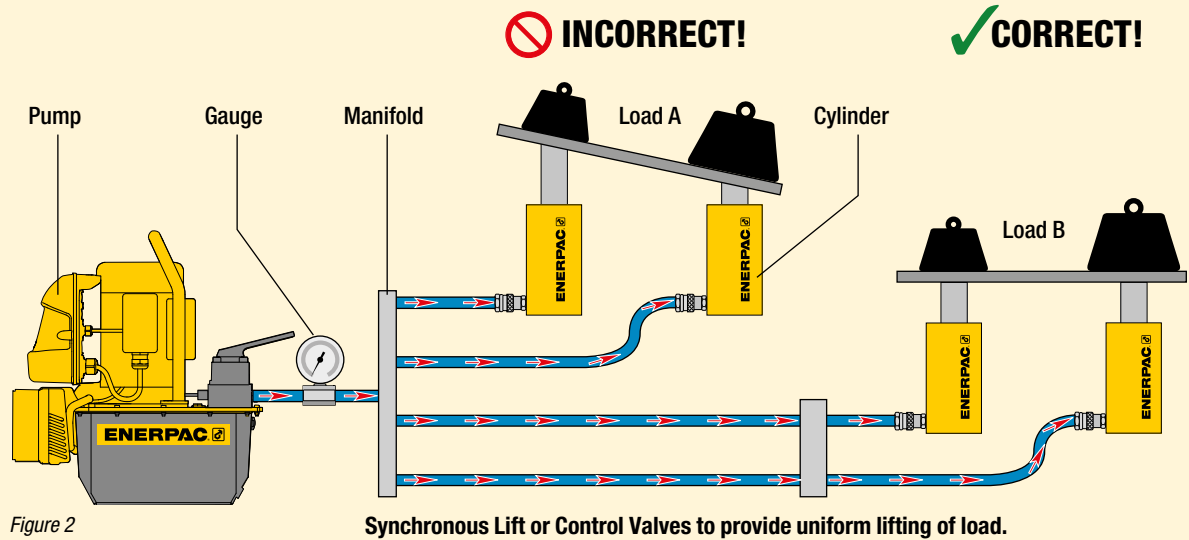

Figure 1

To have all cylinders operate uniformly so that the load is being lifted at the same rate at each point, either control valves (see Valve section) or Synchronous Lift System components (see section Heavy Lifting Technology) must be added to the system (Load B).

CAUTION!
When lifting or pressing, always use a gauge.

A gauge is your 'window' to the system. It lets you see what's going on. You will find the gauges in the System Components section.

Learn more about hydraulics

Visit www.enerpac.com to learn more about hydraulics and system set-ups.

Force

The amount of force a hydraulic cylinder can generate is equal to the hydraulic pressure times the “effective area” of the cylinder (see cylinder selection charts).

Force	=	Hydraulic Working Pressure	x	Cylinder Effective Area
F	=	P	x	A

Use this formula to determine either force, pressure or effective area if two of the variables are known.

Example 1

An RC106 cylinder with 14,5 cm² effective area operating at 700 bar * will generate what force?

Force = 7000 N/cm² x 14,5 cm² = 101500 N = 101,5 kN

* Note: 700 bar = 700 x 10⁵ N/mm² = 7000 N/cm².

Example 2

An RC106 cylinder lifting 7000 kg will require what pressure?

Pressure = 7000 x 9,8 N ÷ 14,5 cm² = 4731,0 N/cm² = 473 bar.

Example 3

An RC256 cylinder is required to produce a force of 190.000 N. What pressure is required?

Pressure = 190.000 N ÷ 33,2 cm² = 5722,9 N/cm² = 572 bar.

Example 4

Four RC308 cylinders are required to produce a force of 800.000 N. What pressure is required?

Pressure = 800.000 N ÷ (4 x 42,1 cm²) = 4750,6 N/cm² = 476 bar.

Remember, since four cylinders are used together, the area for one cylinder must be multiplied by the number of cylinders used.

Example 5

A HCL2506 cylinder is going to be used with a power source that is capable of 500 bar. What is the theoretical force available from that cylinder?

Force = 5000 N/cm² x 363,1 cm² = 1.815.500 N = 1815 kN.

Cylinder Oil Capacity

The volume of oil required for a cylinder (cylinder oil capacity) is equal to the effective area of the cylinder times the stroke*.

Cylinder Oil Capacity	=	Cylinder Effective Area	x	Cylinder Stroke
------------------------------	---	--------------------------------	---	------------------------

* Note: these are theoretical examples and do not take into account the compressibility of oil under high pressure.

Example 1:

An RC158 cylinder with 20,3 cm² effective area and 200 mm stroke requires what volume of oil?

Oil Capacity = 20,3 cm² x 20 cm = 406 cm³

Example 2:

An RC5013 cylinder has an effective area of 71,2 cm² and a stroke of 320 mm. How much oil will be required?

Oil Capacity = 71,2 cm² x 32 cm = 2278,4 cm³

Example 3:

An RC10010 cylinder has an effective area of 133,3 cm² and a stroke of 260 mm. How much oil will it require?

Oil Capacity = 133,3 cm² x 26 cm = 3466 cm³

Example 4:

Four RC308 cylinders are being used, each with an effective area of 42,1 cm² and a stroke of 209 mm. How much oil will be required?

Oil Capacity = 42,1 cm² x 20,9 cm = 880 cm³ for one cylinder

Multiply by four to obtain the required capacity: 3520 cm³

CAUTION!

Enerpac oil will compress 2,28% at 350 bar and 4,1% at 700 bar.

Key to cylinder dimensions

Dimensions shown in the Selection Charts of the cylinder section are identified on the relevant drawings by the capital letter references listed here: A for collapsed height through Z1 for depth of internal base thread.

- A = Collapsed height
- B = Extended height
- C = Cylinder body length
- D = Cylinder outside diameter
- D1 = Cylinder width
- E = Cylinder inside diameter
- F = Plunger rod diameter
- G = Oil inlet thread
- H = Cylinder bottom to advance port
- I = Cylinder top to retract port
- J = Saddle outside diameter
- K = Cylinder rod protrusion at collapsed height
- L = Plunger centre to side of base
- M = Mounting holes to plunger centre
- N = Length of smaller cylinder part
- O = Plunger hole or thread of saddle
- P = Plunger thread length
- Q = Plunger outside thread
- U = Pitch (BC) of mounting holes
- V = Thread of cylinder mounting holes
- W = Collar thread
- X = Collar thread length
- Y = Centre hole diameter
- Z = Internal base thread
- Z1 = Depth of internal base thread

Key to measurements

All capacities and measurements in the catalogue are expressed in uniform values.

The conversion chart provides helpful information for their translation into equivalent systems.

All ton values specified in this catalogue are metric tonnes and are for cylinder class identification only.

Please refer to the kN data for calculations.

Free Conversion Calculator

Visit enerpac.com and download the free conversion calculator.

Pressure:

- 1 psi = 0,069 bar
- 1 bar = 14,50 psi
- = 9,8 N/cm²
- = 100.000 Pa
- 1 kPa = 0,145 psi
- 1 MPa = 145 psi

Volume:

- 1 in³ = 16,387 cm³
- 1 cm³ = 0,061 in³
- 1 litre = 61,02 in³
- = 0,264 gal
- 1 USgal = 3785 cm³
- = 3,785 l
- = 231 in³

Weight:

- 1 pound (lb) = 0,4536 kg
- 1 kg = 2,205 lbs
- = 9,806 N
- 1 metric ton = 2205 lbs
- = 1000 kg
- 1 ton (short) = 2000 lbs
- = 907,18 kg

Torque:

- 1 Nm = 0,738 Ft.lbs
- = 0,102 kgf.m
- 1 Ft.lbs = 1,356 Nm
- = 0,138 kgf.m

Temperature:

To Convert °C to °F:

$$T^{\circ F} = (T_{\circ C} \times 1,8) + 32$$

To Convert °F to °C:

$$T^{\circ C} = (T_{\circ F} - 32) \div 1,8$$

Other measurements:

- 1 in = 25,4 mm
- 1 mm = 0,039 in
- 1 in² = 6,452 cm²
- 1 cm² = 0,155 in²
- 1 hp = 0,746 kW
- 1 kW = 1,359 hp
- 1 kN = 225 lbs

Cylinder Speed Charts

Cylinder Speed

This chart will help you calculate the time required for an Enerpac cylinder to lift a load when powered by a 700 bar Enerpac hydraulic pump.

The Cylinder Speed Chart can also be used to determine the pump type and model best suited for an application when you know the plunger speed required.

To determine: Cylinder plunger speed

An RC256 cylinder (25 ton) is powered by a ZE3-Series two stage pump. While lifting the load, the cylinder plunger travels at 2,8 mm per second. While extending towards the load, the cylinder plunger travels at 30,9 mm per second.

To determine: Best matching pump

Your 25 ton cylinder needs to move a load at a speed of 3,0 mm per second. Simply go down from the top of the chart, to the value of 2,8 mm per second. Follow the chart to the right to find that the ZE3-Series pump is most suitable for your application.

Millimetres of RC-Series cylinder plunger travel per hand pump plunger stroke

No Load indicates the plunger speed as the plunger extends towards the load (1st stage).

Load indicates the plunger speed as the load is lifted at a system pressure of 700 bar (2nd stage).

Example: At what speed (V) will the RC256 (25 ton) cylinder move when powered by a ZE3-Series pump?

RC256 Cylinder Effective Area = 33,2 cm²

ZE3-Series pump oil Flow (no load) = 6150 cm³/min

$$\text{Cylinder Plunger Speed (mm/sec)} = \frac{\text{Pump Oil Flow (cm}^3\text{/min)} \times 10}{\text{Cylinder Effective Area (cm}^2\text{)} \times 60}$$

$$\text{Speed V} = \frac{6150 \text{ cm}^3\text{/min} \times 10}{33,2 \times 60} = 30,9 \text{ mm/sec}$$

Ways

The (oil) ports on a valve.

A 3-way valve has 3 ports: pressure (P), tank (T), and cylinder (A).

A 4-way valve has 4 ports: pressure (P), tank (T), advance (A) and retract (B).

Single-Acting cylinders require at least a 3-way valve, and can, under certain instances, be operated with a 4-way valve.

Double-Acting cylinders require a 4-way valve, providing control of the flow to each cylinder port.

Positions

The number of control points a valve can provide. A 2-position valve has the ability to control only the advance or retraction of the cylinder. To be able to control the cylinder with a hold position, the valve requires a 3rd position.

Centre Configuration

The centre position of a valve is the position at which there is no movement required of the hydraulic component, whether a tool or cylinder.

The most common is the **Tandem**

Centre. This configuration provides for little to no movement of the cylinder and the unloading of the pump. This provides for minimum heat build-up.

The next most common is the **Closed**

Centre configuration, which is used mostly for independent control of multi-cylinder applications. This configuration again provides for little to no movement of the cylinder, but also dead-heads the pump, isolating it from the circuit.

Use of this type of valve may require some means of unloading the pump to prevent heat build-up.

There are many more type of valves, such as **Open Centre** and **Float Centre**. These valves are used mostly in complex hydraulic circuits and require other special considerations.

Open Centre

Float Centre

Directional Control Valves

3-Way Valves are used with single-acting cylinders.

4-Way Valves are used with double-acting cylinders.

Valves may be either pump mounted or remote mounted.

Pump Mounted

Remote Mounted

Valves may be either manually or solenoid operated.

Manually Operated

Solenoid Operated

Advance Hold Retract

Single-acting cylinder Controlled by a 3-way, 3-position valve.

cylinder plunger will extend.

Double-acting cylinder Controlled by a 4-way, 3-position valve.

cylinder port B to tank T.

A is closed: the cylinder plunger will maintain its position.

ports A and B are closed: the cylinder plunger will maintain position.

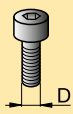

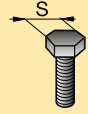

plunger will retract.

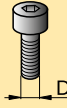

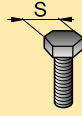

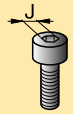

from cylinder port A to tank T: the cylinder plunger will retract.

* Heavy hexagon nuts.

Determine the maximum torque according to the bolt (nut) size and grade. Always consult the manufacturers instructions or engineering recommendations when making bolted connections.

IMPORTANT

The hexagon sizes shown in the tables should be used as a guide only. Individual sizes should be checked before specifying any equipment.

BSH-Series Heavy Duty Sockets

Use only Heavy Duty Impact Sockets for power driven torquing equipment, according to ISO2725 and ISO1174; DIN3129 and

DIN3121 or ASME-B107.2/1995.

Tightening Methods

Principally there are two modes of tightening: "Uncontrolled" and "Controlled".

Uncontrolled tightening

Uses equipment and/or procedures that cannot be measured. Preload is applied to a bolt and nut assembly using a hammer and spanner or other types of impact tools.

Controlled tightening

Employs calibrated and measurable equipment, follows prescribed procedures and is carried out by trained personnel.

Advantages of Controlled Tightening

Known, controllable and accurate bolt loads

Employs tooling with controllable outputs and adopts calculation to determine the required tool settings.

Uniformity of bolt loading

Especially important on gasketed joints as an even and consistent compression is required for the gasket to be effective.

Safe operation following prescribed procedures

Eliminates the dangerous activities of manual uncontrolled tightening and requires that the operators be skilled and follow procedures.

Reduces operational time resulting in increased productivity

Reduces tightening time and operator fatigue by replacing manual effort with the use of controlled tooling.

Reliable and repeatable results

Using calibrated, tested equipment, following procedures and employing skilled operators achieves known results consistently.

The right results first time

Many of the uncertainties surrounding in-service joint failures are removed by ensuring the correct assembly and tightening of the joint the first time.

Bolting Tools

For further information on Torque Tightening or other controlled tightening methods, please visit our website or ask for our **Bolting Tools Catalogue**.

Bolting Integrity Software

A comprehensive free on-line software solution for Bolted Joint Integrity.

Integral databases hold data for:

- ASME B16.5, ASME B16.47, API 6A and API 17D flanged joints
- Common gasket materials and configurations
- Comprehensive range of bolt materials
- Comprehensive range of lubricants
- Enerpac's Controlled Bolting Equipment including: Torque Multipliers, Hydraulic Wrenches and Bolt Tensioning tools.

Custom Joint information can also be entered.

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as a combined Application data sheet and Joint completion report.

What is Torque?

It is a measure of how much force acting on an object causes that object to rotate.

What is Torque Tightening?

The application of preload to a fastener by the turning of the fastener's nut.

Torque Tightening and Preload

The amount of preload created when torqueing is largely dependant on the effects of friction.

Principally there are three different "torque components":

- torque to stretch the bolt
- torque to overcome the friction in bolt and nut threads
- torque to overcome friction at the nut spot face (bearing contact surface).

Torque Tightening

Turning movement

Stretch of Fastener (Pre-load)

Preload (residual load) = Applied Torque *minus* Frictional Losses

Lubrication Reduces Friction

Lubrication reduces the friction during tightening, decreases bolt failure during installation and increases bolt service life. Variation in friction coefficients affect the amount of preload achieved at a specified torque. Higher friction results in less conversion of torque to preload. The value for the friction coefficient provided by the lubricant manufacturer must be known to accurately establish the required torque value.

Lubricant or anti-seize compounds should be applied to both, the nut bearing surface and the male threads.

Frictional Losses

Friction points should always be lubricated when using the torque tightening method.

Select the Right Torque Wrench

Choose your Enerpac torque wrench using the untightening rule of thumb:

- When loosening a nut or bolt, more torque is usually required than when tightening.
- For general conditions it can take up to **2½ times** the input torque to breakout.
- Do not apply more than 75% of the maximum torque output of the tool when loosening nuts or bolts.

Conditions of bolted joints

- Humidity corrosion (rust) requires up to **twice** the torque required for tightening.
- Sea water and chemical corrosion requires up to **2½ times** the torque required for tightening.
- Heat corrosion requires up to **3 times** the torque required for tightening.

Torque Procedure

When torquing it is common to tighten only one bolt at a time, which can result in Point Loading and Load Scatter.

To avoid this, torque is applied in stages following a prescribed pattern:

Torque Sequence

- Step 1** Spanner tight ensuring that 2 - 3 threads extend above nut.
- Step 2** Tighten each bolt to one-third of the final required torque following the pattern as shown above.
- Step 3** Increase the torque to two-thirds following the pattern shown above.

- Step 4** Increase the torque to full torque following the pattern shown above.
- Step 5** Perform one final pass on each bolt working clockwise from bolt 1, at the full final torque.

Breakout Torque

When loosening bolts a torque value higher than the tightening torque is normally required. This is mainly due to corrosion and deformations in the bolt and nut threads.

Breakout torque cannot be accurately calculated, however, depending on conditions it can take up to **2½ times** the input torque to breakout.

The use of penetrating oils or anti-seize products is always recommended when performing breakout operations.

Tensioning requires longer bolts

CORRECT

What is Bolt Tensioning?

Tensioning is the direct axial stretching of the bolt to achieve preload. Inaccuracies created through friction are eliminated. Massive mechanical effort to create torque is replaced with simple hydraulic pressure. A uniform load can be applied by tensioning multiple studs simultaneously.

Tensioning requires longer bolts, and a seating area on the assembly around the nut. Tensioning can be done using detachable Bolt Tensioners or Hydraulic Nuts.

Preload (residual load) = Applied Load minus Load Losses

What is Load Loss?

Load loss is a loss of bolt elongation depending on factors such as thread deflections, radial expansion of the nut, and embedding of the nut into the contact area of the joint. Load loss is accounted for in calculation and is added to the preload value to determine the initial **Applied Load**.

The preload depends on Applied Load and Load Loss (load loss factor).

GLOSSARY OF TERMS

Applied Load:

The load applied to a bolt during tensioning which includes an allowance for Load Loss.

Bolt Tensioning:

A method of controlled tightening which applies preload to a bolt by stretching it axially.

Breakout Torque:

The amount of torque required to loosen a tightened bolt. (Usually more torque is required to loosen a bolt than was used to tighten it.)

Elastic Range:

The range on a bolt's stress / strain curve where stress is directionally proportional to strain.

Plastic Range:

The range on a stress / strain curve where the tensile load applied to a bolt results in permanent deformation.

Load Loss:

The losses in a bolt which occur on transfer of load from a tensioning device to the bolt assembly (these may arise from phenomena such as thread deflection and embedding of the nut to the contact area of the joint, and is calculated as a factor of the length to diameter ratio of the bolt).

Load Scatter:

The spread of differing loads in a sequence of bolts after they have been loaded. It is mostly due to the elastic interaction of the bolts and the joint member; as subsequently tightened bolts further compress the joint, previously tightened bolts are subject to some relaxation.

Preload:

The load in a bolt immediately after it has been tightened.

Proof Load:

Proof load is often used interchangeably with Yield Strength but is usually measured at 0,2% plastic strain.

Tensile Point:

The point at which the tensile loading on a bolt causes the bolt to rupture.

Torque Tightening:

The application of Preload to a bolt by turning of the bolt's nut.

Ultimate Strength:

The maximum tension which can be created by tensile load on a bolt.

Yield Strength:

The point at which a bolt begins to plastically deform under tensile loading.

NOTE: Bolt is used as a generic term for a threaded fastener.

80% **Manufacturer's rating of pressure and load are maximum safe limits.** **80%**
Good practice encourages using only 80% of these ratings!

Tensioning Operation

Tensioning permits the simultaneous tightening of multiple bolts; the tools are connected in sequence via a high-pressure hose assembly to a single pump unit. This ensures each tool develops the exact same load and

provides a uniform clamping force across the joint. This is especially important for pressure containing vessels requiring even gasket compression to affect a seal.

Set-up using a 100% tensioning procedure

All bolts are tensioned simultaneously.

General Procedure

- Step 1:** The bolt tensioner is fitted over the stud.
- Step 2:** Hydraulic pressure is applied to the tensioner which then stretches the stud (bolt).
- Step 3:** The stud's nut is wound down against the joint face

- Step 4:** Hydraulic pressure is released and the tensioner removed.
 The bolt behaves like a spring, when the hydraulic pressure is released the bolt is under tension and attempts to contract, creating the required clamping force across the joint.

Set-up using a 50% tensioning procedure

Half the bolts are tensioned simultaneously, the tools are relocated on the remaining bolts and they are subsequently tensioned.

Less than 100% Tensioning

Not all applications allow for the simultaneous fit of a tensioning device on each bolt, in these cases at least two tensioning pressures are applied. This is to account for a load loss in those bolts already tensioned as the next sets are tightened.

The load losses are accounted for in calculation and a higher load is applied to allow the first sets to relax back to the target preload.

Read Instruction Manuals

Please refer to the product Instruction Sheets for safe use guidelines and detail on the correct set up and operation of the equipment.

Enerpac Bolting Integrity Software Solutions play a key role in implementing and managing an Integrity Programme for bolted connections. The software is used extensively within Enerpac and increasingly by a wide range of clients worldwide often interfacing with maintenance, construction and commissioning management systems.

- First developed over 20 years ago, we have continued to update and enhance the software based on user feedback, technology advances and our roles on Industry standard committees, to produce the most comprehensive suite of joint integrity software available.
- Recommended bolt loads for standard joints are derived from independently verified calculation methods and traceable back to standards

Integral databases hold data for:

- ASME B16.5, ASME B16.47, API 6A and API 17D flanged joints
- Common gasket materials and configurations
- Comprehensive flange and bolt materials
- Comprehensive range of lubricants
- Enerpac controlled bolting equipment includes torque, multipliers, hydraulic wrenches and bolt tensioners.
- Custom joint information can also be entered.

▲ Standard flange calculation menu (INFORMATE)

The Enerpac Bolting Software Suite includes:

- **Bolt-Up** - Online bolt load calculator. Free access and use on www.enerpac.com.
- **INFORMATE** - Advanced calculation and procedure software. Contact Enerpac for user licenses and dedicated support.
- **IDMS Integrity Data Management System** - A complete Integrity Assurance project management package for managing bolted joints from cradle to grave. Contact Enerpac for user licenses and dedicated support.

Bolt-Up

Bolt-Up is a simple to use online calculator, built upon the Informate calculation engine, providing reliable, repeatable bolt loads for:

- Carbon steel weldneck ANSI 16.5 standard flanges, using a limited range of bolt materials; selected gasket options and a fixed lubrication value.
- Inputting basic joint configuration information allows Bolt-Up to determine: bolt load; bolt stress and the required torque. These outputs are displayed alongside basic flange and bolt information e.g. joint thickness and bolt size/quantity.

Bolting Integrity Software

The software offers Tool selection, Bolt Load calculations and Tool pressure settings, as well as, a combined Application data sheet and Joint completion report.

This software includes following hydraulic tools selections:

- S, W, RSL, DSX and HMT-Series Torque Wrenches,
- HM-Series HydraMax®, GT-Series Bolt Tensioners and EAJ-Series AquaJack Subsea Tensioners.

Software Model Nr.	INFORMATE Subscriptions
BS01PP	Bolting Software 1 person purchase
BS01PAS	Bolting Software 1 person annual support
BS05PP	Bolting Software 5 person purchase
BS05PAS	Bolting Software 5 person annual support

▲ Enginered Joint menu (INFORMATE)

INFORMATE Bolt Load Calculation Software

INFORMATE can be used on a huge range of flanged joints and clamped connections in virtually any situation from process piping to custom-designed flange connections.

- Calculate bolt loads and stresses, determine tooling pressures for Enerpac torque and tensioning equipment; analyse existing connections and test custom designed connections.
- Extensive material database covering all common standards:
 - Common and industry specific lubricants
 - 200+ bolting materials
 - 500+ flange materials
 - 60+ gasket materials
- Enginered Joint Calculation Features - allows for different types of bolted application for non-circular or structural applications.
- Installed direct to the desktop or accessed via the internet, Informate is available in a single version that is configurable to client requirements and includes multiple international standards and the latest and forthcoming regulatory data, when taken with a maintenance package.

▲ Clamp menu (INFORMATE)

Integrity Data Management System (iDMS)

iDMS is a flexible data management and activity planning system specifically for use on assets featuring bolted connections.

Designed to store the entire lifecycle data relating to every critical bolted joint on an installation, it aids planning, ensures joint integrity, as well as reducing construction and maintenance schedules and costs.

- Provides managers and technicians with essential information about joint components used in assembly, in addition it specifies the tools and the torque or tension values to deliver a leak-free joint.
- Allows planner and maintenance engineers to rapidly build packages of work complete with all documentation and then track them to completion
- Whenever a joint is worked on, all of the previous history and experience of that joint is available, allowing any particular requirements of the joint to be taken into account proactively prior to joint assembly and tightening.

iDMS Custom Tailored Solutions available to meet client needs, for example:

- Embedded Informate bolted joint calculator
- Export and import of data to asset management systems
- Exporting data to populate customer documentation
- Colour coding of the joint provides an instant review of the status.

Contact Enerpac for User License

The Enerpac Academy is our in-house training program, offering Enerpac product operators and maintenance staff the opportunity to be trained in the safe use and maintenance of high-pressure hydraulic tools.

Operating these tools requires sound knowledge of how they work and how they should be maintained. Correct use of these tools increases safety and reduces risk – both for the operator and the environment in which the tools are used. Having the right training enables the operator to use the tools safely and properly.

- Safety focus for operators, tools and environment
- Dedicated in-house Enerpac training centers
- Both standard training courses and specialized training services
- Highly experienced training staff
- Develops alternative training options such as:
 - eLearning modules
 - vLearning sessions
 - Instructional videos

In-house Training Centres

Do you work with high-pressure hydraulic tools on a regular basis or even every day? The training courses are designed to be highly interactive with a strong hands-on element. Each training course is led by a qualified trainer, an Enerpac specialist capable of providing high quality training. A written or practical exam is part of certain training courses.

Training Centre Locations

Enerpac Academy offers a meticulously compiled training program covering tool knowledge, repairs and maintenance, and safe operation of Enerpac hydraulic tools. If you would like to schedule a training course, please contact Enerpac for a training calendar, application form, and brochure at www.enerpac.com.

- Ede (The Netherlands)
- Bangalore (India)
- Columbus, Wisconsin (USA)
- Perth (Australia)
- Singapore

In-Person Training

- Highly experienced training staff
- Class sizes range from 8 to 20, depending on class and location
- Commercial Sales, Service and Repair Class capabilities
- Most classes consist of theoretical and hands-on training.

The Power of Knowledge & Enerpac Maintenance Program

eLearning Modules

- Enerpac Training available on “your” schedule
- Courses available to support New Product Launches, Product Awareness Training and Enerpac Academy Courses
- Available to external viewers through Enerpac’s “LDMS” system.

EMP – Enerpac Maintenance Program

EMP is a preventive maintenance program. Your Enerpac Authorized Service Centre will check the tools on essential points: leaking, oil level and quality, maximum pressure setting, and damage. EMP reduces operational risks, increases safety and minimises extremely expensive delays in your operations. You will be advised about regular maintenance of the Enerpac tools.

- Work more safely
- Minimise operational risk
- Ensure tools are always available and in tip-top shape
- As good as new after repair
- Prevent downtime
- Advice on safe and effective use
- Maintenance when tools are not used.

vLearning Sessions

- Interactive training available on-line
- Sessions contain Technical Presentations, Hands-on product demos and end with a Q&A session
- Classes cover many topics, such as Product Operational information and Service & Repair Training
- Look for scheduling and registration details on www.enerpac.com

Instructional Videos

- Informational videos created with Enerpac Academy Training processes in-mind
- Topics range from product “how-to” videos to application and operational videos
- Videos are available on the Enerpac “You-Tube” channel and other venues, where appropriate.
